Ford Would Melt Ships Into Autos

TELLS PLANS FOR JUNKING STEEL BOATS

Manufacturer Proposes to Make Flivvers Out of Shipping Board Craft IF OFFER IS ACCEPTED

By EDWARD C. DERR
United Press Staff Correspondent
Copyright, 1925, by United Press

DETROIT, Mich., May 18.—Henry Ford proposes to put 400 steel ships of the U. S. shipping board fleet into the great melting pot of his automobile factories and turn out Ford automobiles. He is not interested in operating the shipping board vessels as a huge commercial fleet on the high seas.

These facts were revealed to the United Press in an exclusive interview with the multi-millionaire automobile manufacturer, granted in the inner office of his recently completed new office building at Dearborn.

"My business is making Ford automobiles and Fordson tractors—I'm not in the shipping business," Ford explained with emphasis.

Ford admitted, however, that he might be in the market for a limited number of larger and better constructed shipping board vessels for use in delivering his automobiles to foreign countries—he has three of these in operation already.

Now, Get This Straight

"But get this straight," he said. "These ships would be used in my business of making deliveries to foreign ports; they would not be common carriers except on return trips, when I'd bring back sugar and fruit and other products to make the return voyage pay."

And then Ford emphasized that word "pay," emphasized it strenuously.

"Make it pay—that's the object of business," and he pointed his finger at the soft upholstery of his big, comfortable chair.

Seven Killed In Motor Car Accidents

MILWAUKEE, Wis., May 18.—Seven persons were killed in auto accidents here during the last 24 hours. Fourteen persons were injured, some seriously in the crashes.

WOMEN HURT IN AUTO CRASH ON STATE HIGHWAY

One woman was seriously hurt, and another suffered minor cuts and bruises at midnight, when automobiles, driven by Paul Douglas, 34, 4655 Bermuda avenue, Ocean Beach, and C. W. Legeron, 1615 C street, San Diego, collided on the state highway, five miles south of San Juan Capistrano.

Mrs. Douglas, who was riding with her daughter and husband, is at the Santa Ana Valley hospital, suffering from a serious fracture of the skull and a fracture of the right clavicle. Her condition is serious.

The daughter, who received medical attention at the hospital for minor cuts and bruises, was later removed to her home.

According to the accident report, filed at the city police station, a Miss Fay Baird, who, it is thought, was riding in the Legeron car, also was injured. She received medical attention at the police station. She was not badly hurt.

A woman and a man were injured in an automobile crash on the state highway near Capistrano at 7:45 p. m. Sunday. They were brought to a local physician's office for attention, according to a report filed with the police. No names were given.

The condition of John Mon, a young man who was struck by an automobile near Bolsa, last Tuesday night, is slightly improved today. Physicians at the Orange County hospital said that Mon's condition was serious yesterday, and he was in a stupor during the day.

Little hope is held out for his recovery.

The condition of Marjorie Haines, Orange girl, and Charles Ring, Santa Ana youth, seriously hurt on the night of May 7, when the automobile in which they were riding was struck by a Pacific Electric car on West Seventeenth street, is little changed.

The Haines girl has never regained consciousness, it was reported today. Although Ring is conscious at times, his condition remains critical.

U. S. TACTFUL IN APPROACH OF DEBTORS

Different Methods Employed by Government In Its Dealings With Europe AWAIT FRENCH ANSWER

America Anticipates Long, Difficult Negotiations Before Agreement Reached

WASHINGTON, May 18.—The U. S. government, in approaching its debtors with a request that they take steps to settle their obligations to this country, is approaching each nation as an individual. It was officially denied to the United Press today by a high state department official that a circular note had been dispatched to the debtors powers, as reported.

On the contrary it was asserted, different approaches are made to each country, the financial situations of the respective governments being taken into consideration, and the department considers this phase of its action highly important and not to be misunderstood.

Approached by Diplomats

The approach to the debtors in each instance being made by the U. S. diplomatic representatives at the foreign capitals.

Suggestions from Paris that there is a difference of opinion between the state department and the American Debt funding commission were scouted by officials here today, who pointed out that the department, through its diplomats, is acting simply as the agent of the debt funding commission, which is charged by congress with handling foreign debts.

Pressure is being exerted for the present only upon France, Italy, Belgium, Czechoslovakia, and Roumania. The United Press is able to state authoritatively that a report of a communication having been addressed to nine governments is erroneous.

Interest on French Reply

Interest here centers on France's response, since there is evidence that Italy and Belgium will not act until France has repudiated her \$4,000,000 debt to this country. Although negotiations in France are expected to produce a definite offer within a month, this government is prepared for long and hard negotiations before a final agreement is reached.

BRITAIN TO PRESS FOR DEBT SETTLEMENT

LONDON, May 18.—In reply to an inquiry in commons today, Premier Baldwin declared there was no advantage at present in giving France and other allied debtors a time limit within which to press for settlement of the debt. He added that Great Britain "will take every opportunity to press for a settlement of the debt question."

YOUTH SENTENCED TO DEATH IN CHAIR

POTTSVILLE, Pa., May 18.—William Cavalier, 15-year-old slayer of his aged grandmother, was sentenced to the electric chair by Judge R. H. Koch, in Schuylkill county court here today. The trial proceedings required three minutes.

Young Cavalier showed no emotion as he was called before the court. He said he expected to escape the death penalty.

His attorneys immediately began an appeal to the state supreme court, but the appeal was denied, the board of pardons will be appealed to, with Governor Pinchot as a court of last resort.

Feet Jam In Frame; Suicide Try Fails

CHICAGO, May 18.—Percy Pugh, 30, held under \$100,000 bond for 16 robberies, attempted suicide today when he plunged through a window on the third floor of the criminal court building. Pugh's feet became caught in the frame and he hung suspended until a policeman dragged him back.

The prisoner was badly cut and is in a serious condition.

Pugh was being led through the state's attorney's office when he broke away, ran through several offices, leaped on the shoulder of a girl telephone operator, and made his dive.

Arrest Woman For Deaths Of 34 Persons

CARLSBAD, May 18.—Charged with responsibility for the deaths of 34 persons, including her son, two husbands and 31 lovers, Mrs. Julia Remick, famous Serbian beauty, is under arrest here. Physicians who have examined Mrs. Remick say her case is unprecedented pathologically, and that they believe her sane.

FRENCH ENGAGE RIFFIAN TROOPS IN SHARP FIGHT

PARIS, May 18.—French troops under General Freydenburg, after sharp fighting, succeeded in relieving the pressed outpost at Bou-toum, and the official communiqué on the Riffian struggle.

The Riffs used field artillery, but their firing was erratic.

On the eastern front, Riffian reinforcements were reported to have come up, while on the western line, General Colombat had reached El Kelas Sless.

GOVERNOR SIGNS BOND ISSUE BILL

SACRAMENTO, May 18.—The people of California will vote on an \$8,500,000 bond issue for state buildings at the next general election as a result of Governor Richardson's action in signing Senate bill No. 484.

This bill, which the governor announced yesterday has been signed, provides the legal machinery for the issuance of the bonds. The bill appropriates \$5000 for printing and lithographing of the bonds.

If approved at the election, the money would be used as follows:

New buildings for the University of California, Southern Branch, \$3,000,000.

New buildings for the University of California, Berkeley, \$3,000,000.

State building at Los Angeles, \$1,250,000.

Completion of state buildings at Sacramento, \$1,250,000.

Start War In L. A. On Lewd Journals

LOS ANGELES, May 18.—Postal inspectors launched a campaign today to stop the influx of indecent literature, said to be popular on local newsstands.

Clark E. Webster, chief inspector for Southern California, said today of lewd magazines were being mailed or shipped into Los Angeles by mail.

He said that U. S. Attorney Samuel McNabb, and intimated that steps would be taken to bar certain obscene matter from the mails.

"Considerable risque literature is being poured into Los Angeles, mainly by express, but have reason to believe some of it is being sent through the mails," Webster said. "We intend to take immediate steps to determine if any of this matter is being mailed, and if our investigation reveals that it is, the literature will be promptly barred, and its senders prosecuted."

DIES AFTER GOLF GAME

DETROIT, May 18.—Funeral arrangements were being made today for J. Dallas Dort, 64, pioneer auto manufacturer, who crumpled and died Sunday just after completing a round of golf. He came from apoplexy, physicians said.

FATTY PAYS TO PROTECT NAME, CLAIM

Arbuckle Is Declared to Have Put Up \$12,500 to Avoid Attacks By Clubs ON EVE OF MARRIAGE

Enters Alleged Contract Just Prior to Wedding; Is Given \$100,000 Job

LOS ANGELES, May 18.—What district attorneys described as a "weak case of blackmail," designed to extort \$12,500 from Roscoe Arbuckle, was dropped today when the film comedian refused to prosecute. The case involved an alleged effort of Arthur C. Arbuckle, the comedian's brother, to collect money said due him as a result of injury to his reputation growing out of the Arbuckle manslaughter case in San Francisco.

LOS ANGELES, May 18.—An alleged agreement whereby Roscoe "Fatty" Arbuckle, film comedian, agreed to pay Mrs. J. H. Murphy, San Francisco, \$12,500 to protect his name from attack by women's clubs, was made public today by the district attorney's office.

The contract was signed by Mrs. Murphy and Arbuckle, and was witnessed by Deputy District Attorney Ryan and Harold L. Davis. According to terms of the agreement, revealed by the district attorneys, the money was to be paid to Arthur C. Arbuckle, the film comedian's brother, through Mrs. Murphy.

The strange document was entered into Saturday evening, just prior to Arbuckle's marriage to Doris Deane, screen actress, at Pasadena. It caused the comedian to cancel his intended honeymoon to New York, and remain in Southern California pending possible further developments.

The district attorneys said today it would depend upon Arbuckle whether the case would be prosecuted.

Arbuckle said he was "too happy" over his marriage to prosecute anyone, indicating the case would be dropped.

"I have given my brother money on several occasions the past year," the comedian said. "I can't believe that he is behind this thing for that reason. The last time he asked me for money I didn't have it to give to him. He knows I will help him when I can. I am a happy man to prosecute anyone."

Arbuckle and Miss Deane were married at the latter's home in Pasadena Saturday night. The joyful comedian received a \$100,000 wedding gift from Roland West, film producer, in the form of a contract to direct and produce 10 two-reel comedies.

Arbuckle's new film job will give him the first real chance he has had since his acquittal in San Francisco of manslaughter to stage a comeback in the movies.

FATTY'S STORY IS BRANDED AS FALSE

SAN FRANCISCO, May 18.—Arthur Arbuckle's brother, "Fatty," today stamped the ex-stard's story in Los Angeles of a \$12,500 "blackmail scheme," as untrue.

The brother returned today from Los Angeles with Mrs. J. H. Murphy, mentioned by "Fatty" in his story, and both talked readily, in asserting the whole tale a fabrication.

Arthur Arbuckle declared he had stood behind his brother during his trials in San Francisco arising from the Virginia Rappe case, and has as a result lost money and a chance to work, so that he was in need of help from "Fatty."

This story was substantiated by Mrs. Murphy, who asserted she went to see "Fatty" on behalf of his San Francisco brother, and that he then "tricked" her into signing the "protection" document. She declared Arbuckle had himself prepared the papers she signed.

Claim Drive Will Close Up Rum Row

WASHINGTON, May 18.—The coast guard drive against liquor smugglers will ultimately break up the operations of the rum fleet and force it permanently out of business, a spokesman for Secretary of the Treasury Mellon said today. It was stated at the treasury department that the increased activity against rum runners "has only begun."

ON TRIAL FOR LIFE

William D. Shepherd, who went on trial in Chicago today on a charge of murdering his millionaire ward, Billy McCintock, by administering deadly typhoid germs. The state will demand the death penalty for Shepherd.

WOMAN CALLS BY PHONE TO FINANCE HALL

SACRAMENTO, May 18.—A woman was sought today by police in the belief that she may be able to shed some light on the mysterious disappearance of Joe Tanko, convict pal of Floyd Hall, who was captured Thursday night.

The identity of the woman is not known, but police believe she will be found within the next few hours.

Early yesterday the woman telephoned the sheriff's office and inquired how she might send money to Hall. She refused to reveal her identity, and declared she was talking from San Jose. It was learned later, however, the call was made from a local telephone.

On being told to send the money by messenger in the form of a cashier's check payable to Chief of Police McShane, the woman hung up the receiver. Efforts to trace the call proved futile.

Keep Watch on Banks

All banks were being watched closely today in event the woman attempts to secure the cashier's check. That she may be a friend of the two convicts, and has helped them hide while in this city, is the theory held by the police.

Hall today was positively identified as one of the two men who participated in the holdup of a Litzberg store here, April 17, at which time H. J. Litzberg was slain.

The identification was made by Gus Grillo, 68-year-old clerk of Litzberg's store. Several other persons identified Hall as participating in other escapades.

District Attorney J. J. Henderson has announced he will take the matter of Litzberg's murder before the grand jury, which is to be impaneled here Friday. This will be done in an effort to avoid the delays that might result from preliminary hearings.

May Demand Venus Change

The defense, represented by Ray Coughlin, local criminal attorney, has refused to make known its plans. It is believed, however, that the first move will be to demand a change of venue for Hall.

Meanwhile, the search for Tanko continues unabated. All roads, railroad lines and tourist camps are being closely guarded, and officers continue their daily rounds of rooming houses. Many of the searchers believe Tanko has succeeded in breaking through the cordon and is making his way toward the bay region, where he has numerous friends.

L. A. Plants Burn With \$50,000 Loss

LOS ANGELES, May 18.—Fire destroyed two plants in the industrial section here Sunday, causing approximately \$50,000 loss. The blaze was believed caused from spontaneous combustion. It leveled the main plant of the McCoy Roofing company, and an adjoining building occupied by the Williams Radiator company.

Take Senator's Body to St. Louis

WASHINGTON, May 18.—The funeral train bearing the body of Senator Selden P. Spencer, of Missouri, who died suddenly Saturday night, will leave here at 6:30 p. m. today for St. Louis. The funeral will be held at 3 o'clock Wednesday afternoon.

GERM DEATH TRIAL OPENS IN CHICAGO

Oust Prospective Jurors When They Oppose Capital Punishment Method

INSISTS ON INNOCENCE

Man Charged With Causing Demise of Millionaire Orphan Faces Court Ordeal

CHICAGO, May 18.—The state will demand the death penalty for William D. Shepherd, on trial on the charge of killing his wealthy ward, Billy McCintock, it was indicated today. The first two prospective jurors were dismissed by the prosecution when they said they were opposed to the death penalty.

With freedom and \$1,000,000 at stake, Shepherd went to trial today. His puffy cheeks a bit sunken, his complexion dimmed by his confinement in the county jail for more than a month, Shepherd went through his regular routine, made his bed and put his cell in order before being led to Judge Thomas J. Lynch's court, where the great legal battle is to be staged.

Deadly Typhoid Germs

The man, who is accused of enlisting the aid of a quack doctor and administering deadly typhoid fever germs to the "millionaire orphan," still protested his innocence as the hour for trial approached.

"This is a plot to rob me of the money Billy willed to me," Shepherd reiterated. "I'll be glad when this trial is over, because I know I will be found innocent of this foul charge and be freed from the tortures of my enemies."

Not since the days of the famous Leopold-Loeb murder case has the criminal court building been so crowded with eager court fans. Hundreds lined up before the court in an effort to witness the opening round in what is expected to be the most bitterly contested legal fight since Clarence Darrow saved the lives of his millionaire prodigies, the boys who killed Bobby Franks "for the fun of it."

Although Shepherd has been accused of a 16-year-plot to obtain the McCintock fortune, a plot started when he is alleged to have poisoned Billy's mother at Bayview, Tex., he goes to trial only on the charge of murdering Billy, the curly-haired boy over whom he had been custodian since his mother's death.

Doctor State's Witness

The quack doctor, Charles C. Fauman, is the state's chief witness. He testified before the grand jury, asserting that Shepherd caused the death of Billy by a safe and certain method of poisoning his wealthy young ward.

"I gave him typhoid germs and told him how to use them," Fauman said. "I told him they spelled certain death and he was pleased."

The second only to Fauman in legal importance and even greater than the quack doctor in eliciting sympathy of the jury is Miss Isabelle Pope, beautiful society girl, who was to have become Billy's wife, had not death come a few hours too soon.

Broken-hearted, Isabelle remained staunch during the days of the coroner's inquest and told frankly, through witnesses, of her love affair with Billy. It was important evidence. It included stories of Billy's life in the Shepherd home—she said he was unhappy and did not trust his guardian.

Girl Breaks Down

Then she broke down physically under the strain. With an aunt as traveling companion, Miss Pope went to California and Oregon on a prolonged vacation. The trip was beneficial and she has regained her health.

Today, Billy's sweetheart returned to Chicago "to see that justice is done."

"I am bitter toward no person," the girl said as she alighted from her train. "I am accusing no one. I would escape this dreadful ordeal if I could, but I feel it is my duty to tell the truth as I have seen it."

Jump Into Ocean As Yacht Burns

SAN PEDRO, May 18.—Four persons narrowly escaped drowning in the local harbor Sunday, when the pleasure yacht, Vivian W. caught fire, following an explosion, and they were forced to jump into the ocean.

Three of the party were seriously burned. The four, only passengers on the vessel, were rescued by the tug Pilot.

The party was composed of Dr. Eric R. Wilson, skipper of the yacht, Mrs. Wilson, A. E. Schaefer and Miss Dorothy Lore.

The Vivian W. was burned to the water's edge. She was valued at \$10,000.

Flames Destroy 2 Whittier Stores

WHITTIER, May 18.—Fire broke out in the heart of Whittier's business district today, destroying two stores at a loss of \$10,000.

The flames at first threatened a large downtown block, but were finally confined to the two frame structures housing a confectionery and bicycle shop.

The burned buildings were owned by J. H. Woodworth, of Pasadena. Firemen believe the blaze was caused by defective wiring.

Russian Break Is Denied by Britain

LONDON, May 18.—Great Britain is not contemplating opening a conversation with France or other allies with a view to breaking off relations with Russia, Under-Secretary MacNeill told Ben Smith, Laborite, in Commons today.

HARDY PIONEER OF 1873 GETS CALL TO REST

J. M. Beach, 78, retired rancher, and pioneer citizen of Orange county, died at the home of his son, Joe Beach, 1013 Riverline avenue, at 8 p. m., Saturday, following an illness of several months.

Mr. Beach, a former resident of Orange and Fullerton, had been ill since last November, when he removed here from Fullerton. He had been a resident of Orange county for 50 years, settling in Orange in 1873.

Born in Essex county, N. Y., in 1846, Mr. Beach removed to Michigan with his parents at the age of 18 years. He came to California from that state.

Surviving him are his son, Joe Beach, and one daughter, Mrs. Maude Lemon, who resides in Vancouver, B. C.

Funeral services will be held from the Smith and Thullil funeral parlors at 2 p. m., tomorrow, and burial will be in Fairhaven cemetery.

During the early years of his life in Orange county, Mr. Beach was actively engaged in the fruit industry, and owned several orange and lemon groves in the northern part of the county. He later retired from active fruit growing and took up the work of raising fruit trees. He had been interested in oranges throughout his life here.

HUNTING TREASURE, CRAZE IN HUNGARY

BUDAPEST, May 18.—Treasure hunting has become almost a mania with Hungarians, since some remarkable discoveries of ancient treasures were recently made.

Children playing in a garden unearthed golden rings and trinkets, which experts believe, date back to 60 B. C.

The government has seized all treasures which have been found and threatened those who seek to hide future treasure trove with imprisonment.

A golden bowl is among the latest discoveries.

A syndicate has been formed to dig in a number of building plots for treasures. Some treasures which have been unearthed have long been unrecognized as such and have been used as toys for children.

PIONEER RESIDENT OF SANTA ANA DIES

Mrs. Rosa M. Hoefler, 73, a resident of Santa Ana for the past 23 years, died at her home, at 1717 Bush street, shortly before noon today, after a lingering illness.

She was born in Germany, and located in this country, later moving to Santa Ana in 1902.

Funeral services will be held from the German Evangelical church, corner 10th and Main streets, at 2 o'clock Wednesday afternoon and burial will be made in Fairhaven cemetery.

Mrs. Hoefler is the widow of C. Hoefler, and is survived by the following children: Mrs. Mary Kikmeir, Pipestone, Minn.; William C. Hoefler, Santa Ana; Arthur Hoefler, Owensmouth, Calif.; and by Mrs. Clara Andres, Mrs. Rosa C. Lutz and Mrs. Helen Steadman, all of Santa Ana.

FIND WEE TOTS IN CHINESE FACTORIES

SHANGHAI, China, May 18.—How far the east is benefited by the adoption of western ways is the question raised by the report of the child labor commission at Shanghai.

"Young children, certainly not more than 5 years of age, were seen working with incredible rapidity in a match factory," is one sentence in the report.

"In silk factories children work, standing, for 12-hour shifts, with not more than an hour off for a meal, and a new form of occupational neurosis is indicated in a peculiar and rapid up-and-down movement of the body by means of alternately relaxing and straightening of the knees," is another sentence.

This commission was set up by the council of Shanghai. The city itself is an international settlement governed by an elected council in which the British predominate, every non-Chinese citizen being subject to the jurisdiction of his own consular court, while the Chinese are provided for by a mixed court in which the native magistrate sits with a foreign assessor. In this way the government of 20,000 foreigners and 750,000 Chinese is carried on.

Shocked by native industrial conditions, the council appointed the commission in regard to child labor and was able to secure the services of Miss Adelaide Anderson, formerly chief inspector of factories in Britain. The report of the commission has created a sensation in England as well as in Shanghai.

MRS. PEABODY, PIONEER HERE, ANSWERS CALL

Mrs. Sarah A. Peabody, pioneer citizen of Santa Ana, and wife of H. A. Peabody, former Santa Ana postmaster, and one time owner of the Santa Ana Blade, died at the home of her daughter, Mrs. Ed Barker, at Ventura, Saturday, according to word received here.

Funeral services were conducted in that city at 2:30 o'clock yesterday afternoon. Burial was at Ventura.

Mrs. Peabody was a resident of Santa Ana for approximately 35 years, prior to her removal to Ventura, more than a year ago. She is survived by another daughter, Mrs. Sallie Powell, of El Portal street, Santa Ana, and by two sons, George T. Peabody, of Newport Beach, and Henry Peabody, who resides in the Philippine Islands. Ray Stedman, 105 East Third street, Santa Ana, is a nephew of Mrs. Peabody.

The New York Tennis club, founded in 1886, is now the oldest lawn tennis club in the metropolitan district.

During the season of 1908 the Milwaukee club of the American Association established the unenviable record of being shut out by opposing clubs 31 times.

Rockingham Park, at Salem, N. H., one of the best known race tracks in New England, has changed hands and will be converted into an up-to-date auto speedway.

Fish and game commissioners of the western states and Canada have been invited to attend a Western Outdoor Life Conference to be held in Spokane, June 17-18.

Court Notes

The Garber Brick and Tile company, of Olive, was named defendant today in a suit on file in superior court, in which the plaintiff, F. F. Pfeiffer, demands \$300. This sum is alleged to be due on a note, Attorney Guas Hagenstein, of Fullerton, represents Pfeiffer.

E. S. Gregory, of Fullerton, had today filed suit in superior court against W. J. Viliott, for \$700 on a note, together with \$70 interest and \$150 attorney fees. Marks, Lauer and Collins, Fullerton law firm, appears in the case for Gregory.

W. A. Thayer and his wife, Lillian Thayer, of Santa Ana, were made defendants in a suit on file today in superior court, in which Stuart and Richert, Los Angeles firm, asks judgment for \$300, said to be due on a note. Attorney W. H. Thomas represents the plaintiff.

Says Husband Paid Little To Support Child

Declaring that her husband, Joseph Szafrinski, manager of Orange county's public golf links, at Newport Beach, has contributed only \$30 for support of their child, since their separation last October, Mrs. Nora Szafrinski today had filed suit in superior court asking formal custody of the child and \$50 a month for its support.

The Szafrinskis fought a divorce battle before Judge Z. B. West a few weeks ago and both failed to win a decree. At that time, the court declined to make an order regarding support of the child, Leo, aged 8.

Mrs. Szafrinski claims that her husband has an earning capacity \$400 a month and owns property worth \$3000.

In their divorce trial, both charged cruelty, but the court ruled that neither had provided sufficient proof of the charges.

Birth Notices

BAKER—Born to Mr. and Mrs. M. Baker, 714 North Grand avenue, at home, May 16, 1925, a daughter.

BAKER—To Mr. and Mrs. P. R. Baker, Paulino, May 18, a daughter.

POLLARD—To Mr. and Mrs. Walter J. Pollard, Tustin, May 17, a son, Robert.

Death Notices

A WORD OF COMFORT
How little of the sea you can carry away in your hand. Though you return a thousand times there will always be more awaiting your coming.

God's love is inexhaustible. To the limit of your capacity today take what your life needs of Him; there will be more for you tomorrow.

The master has never given to any man less of himself than that man sought and fitted himself to receive. The strength to live through today's perplexity and to fulfill today's duties is yours for the asking.

BEACH—At the home of his son, J. M. Beach, 1013 Riverine avenue, Chula Vista, Calif., May 17, 1925, at 2 p. m., from Smith and Tutill's change, Rev. Will A. Betts officiating. Interment in Fairhaven cemetery.

Mr. Beach leaves a son, J. M. Beach of 1013 Riverine avenue, and a daughter, Mrs. W. F. Lemon of Victoria, B. C. He had been a resident of Orange county for 25 years, having come to Orange in 1873.

HOEFER—At her home, 1717 Bush street, May 18, 1925, Mrs. Rosa M. Hoefer, aged 78 years. Funeral services will be held Wednesday, May 20 at 2 p. m. from the German Evangelical church, corner 10th and Main streets, Smith and Tutill in charge.

Mrs. Hoefer is survived by the following children: Mrs. Mary Elmer of Pipestone, Minn.; Wm. C. Hoefer of Santa Ana, Arthur Hoefer of Oxnard, Oxnard, Calif.; Mrs. Clara Andres, Mrs. Rosa C. Lutz and Mrs. Helen Stedman all of Santa Ana.

CARD OF THANKS
We wish to take this means of expressing our appreciation for all kindness shown us since the death of our darling son and brother, Glenn. Also for the many beautiful floral offerings.

MR. AND MRS. O. E. RICHARDS.
MR. J. D. RICHARDS.
MRS. CLARK COOTER.

Silver Cord Lodge No. 505, F. & A. M., will meet in special session Tuesday evening, May 19, at 7:30 o'clock to confer the first degree. All Entered Apprentices invited.

WARD SUTTON, W. M.

MUSHROOM FARM NOW
NEW YORK, May 18.—Abandoned ice houses near New York have been converted into mushroom farms, and a crop valued at \$600 can be produced in one of the largest of these structures each day.

The WELL-DRESSED MAN
By BEAUNASH
Correct Clothes To Meet The Obligation Of Every Occasion

FOLLOW STYLE; DON'T CHASE IT!
Style is a good servant, but a bad master; a first-rate handle, but a weak stick. It is curious that in this country, dedicated to freedom, so little of it is exercised in men's dress. That's because many Americans run after the rainbow of "the latest thing" regardless whether or not it favors and flatters the individual. Style is only as good for you as it looks on you. Style may be admirable or abominable. Follow style; don't chase it. Style is never the most important consideration in choosing clothes. Becomingness is. The stream of ridicule that has been poured upon men's dress is not due to fashions themselves, but to their adoption by those to whom they are totally, often grotesquely, unsuited. A hollow-cheeked man under an extreme broad-brimmed hat is ridiculous, but the broad-brimmed style isn't. A double-breasted suit upon a frankly fat man is ridiculous, but the double-breasted style isn't. Brogue shoes encasing an excessively large foot are ridiculous, but the brogue style isn't. A bow-knot tie beneath a round, moon-like face is ridiculous, but the bow-knot tie isn't.

Johann Kasper Lavater, the Swiss author, summed up the true mission of fashion, when he wrote: "Be not too early in the style; nor too long out of it; nor at any time in the extremes of it." Dress with independence and individuality. Adopt only those effects which complement your type and figure. Remember, also, that sometimes a fantastic fashion is originated to conceal a physical defect. For instance, the derby that once came "way down upon the head" was introduced by a style leader who had protruding ears. Balloon-like trousers were first worn by a how-legged English earl.

The double-breasted, one-button suit, portrayed in the accompanying sketch, is a type that is acquiring some vogue for warm-weather wear to which the two-button style is unusually not so well adapted. The single button serves as a sort of anchorage in front, holding the folds of the coat together loosely, but sufficiently and producing a full-chested look. The lapels are peaked. The pockets are the sportsmanlike patch style. The coat is only slightly waist-curved and has no vent.

It is undeniable that very wide-cut trousers are the most comfortable, but they do not look well on most men, giving them a thickset, sailor-like appearance. Unless they are firmly supported to swing clear of the instep, such trousers sag out of shape and trail at the heel. Nobody can say that this effect is anything but ugly and untidy.

The Cheerful Cherub

I overlook my past mistakes,
Excuse them and condone them—
Or, if they hurt my self-esteem,
With firmness I disown them.

Local Briefs

Santa Ana Iowans were gratified today at the announcement that one of their members, Freeman Bloodgood, had been selected as a speaker at the big gathering of Iowans for the annual summer picnic at Bixby park, Long Beach, Saturday, May 23. The announcement was made in a letter received by Judge E. T. Langley, who at once issued a call for all former Iowans to attend the all-day basket picnic.

Dr. M. C. Myers, well known San Francisco physician, connected with the Southern Pacific Railway company, is registered at Hotel Santa Ana today. Other arrivals include Mr. and Mrs. F. Carl, Houston, Tex.; Mr. and Mrs. E. A. Moser, Houston; Mrs. F. O. Roach, San Diego; E. A. Hanna, Los Angeles; Frank Butterworth, Los Angeles; H. A. Linscott, Los Angeles; W. H. Kegley, Ontario.

F. B. Lewis, a retired capitalist of Sierra Madre, and Mrs. Lewis, are guests at St. Ann's Inn. Mr. Lewis came here to look over his land holdings, located in the Costa Mesa district, now being tested for oil deposits. Other arrivals are W. F. Weller, San Francisco; Mrs. J. M. Crobe, Los Angeles; and Mr. and Mrs. C. S. Dunning, Los Angeles.

A marriage license was issued at Riverside to Herman L. Carter, 21, Riverside, and Margaret D. Thomason, 18, Santa Ana.

Members of the Seventh regiment, United States Volunteers' association of 1898, met in Los Angeles Saturday evening to perfect plans for memorial services which are held annually on Memorial day, at 11 a. m., at the monument in Pershing square. Among Orange county men present at the meeting were Frank Rowe, of Santa Ana, and Carl Christensen, of Garden Grove, both former members of Company A. It was announced here today that the cornerstone of the new patriotic hall, being erected at Eighteenth and Figueroa streets, Los Angeles, by the county of Los Angeles, will be laid at 3 p. m., Sunday, May 31. All veterans are urged to attend the memorial exercises and the cornerstone laying.

Mrs. May Thomas, daughter of Mr. and Mrs. J. W. McClung, 133 Ninth street, Huntington Beach, died at the Glendale research hospital Sunday at 12:30 o'clock p. m. Funeral services will be held from the First Christian church, Eighth and Orange streets, Huntington Beach, at 10 o'clock Wednesday morning.

Five Orange county court of honor meetings were announced today by Scout Executive Roland E. Dye. They are as follows: May 20, district 4, intermediate school, Anaheim; May 22, district 3, Olive school, Olive; district 5, La Habra; May 27, district 1, Costa Mesa; May 29, district 3, Scout headquarters, Santa Ana.

HUNT WOMAN SEEN LEAVING BABE ON PORCH

A well dressed woman, wearing a large grey picture hat, was being sought today by police in connection with the finding of a blue-eyed, dark-haired baby girl on the front porch of a vacant house at Huntington Beach, Friday afternoon. The woman who left the baby was seen by John Yost, a street worker at Huntington Beach. Yost furnished Huntington Beach officials with a description of the woman, who, he said, was of medium height and was driving a light coupe.

While authorities are searching for the unknown mother of the baby, many applications are being made at the Orange County hospital by persons who wish to adopt the child. Nurses and authorities at the hospital declare that they are reluctant to part with the baby, who, they claim, is one of the best behaved infants that has ever come under their care. The baby weighed six and one-half pounds this morning, according to the nurse, who proudly pointed out the excellent shape of the tiny head. "She is a very fine child," the nurse declared.

The baby girl was found at 1:55 Friday afternoon, on the front porch of a vacant house at the corner of Olive and Twenty-first streets, in Huntington Beach. She was discovered by Mrs. T. L. Oden, of 2112 Magnolia avenue, who heard the baby cry while on her way past the house. Mrs. Oden ran to the home of Mrs. L. E. Launder, of 321 Twenty-first street, and they removed the tiny bit of humanity to the Launder home before calling the police.

Yost in his report declared that the woman suspected of abandoning the baby stopped for a short time before the house at about 12 o'clock. He said that he did not notice anything unusual in her manner and failed to notice whether or not she carried a bundle. The baby was found two hours afterward. Yost, who was nearby during the entire time, said that he saw no one else near the house.

According to Dr. R. E. Hawes, of Huntington Beach, who was called when the baby was found, the girl had been born only a few hours. She had been wrapped in two women's union suits, a white cotton petticoat, and a man's dark woolen shirt. No marks of identification were found on the articles.

Fraternal Calendar

Sycamore Rebekahs—Will hold dance for all Rebekahs, Odd Fellows, their families and friends in the I. O. O. F. hall Tuesday night, starting at 9 o'clock. The Chapman orchestra will furnish the music.

Knights of Pythias—Will confer Page and Esquire ranks in the K. of P. hall Wednesday night, at 7:30 o'clock.

Order of De Molay—Officers will meet in the Masonic temple tonight, at 6:30 o'clock.

Daughters of Veterans—Will meet at 2 p. m., Tuesday, in the G. A. R. hall.

Past Noble Grands association of Toroso Rebekah lodge—Will meet at the home of Mrs. M. C. Cooper, 144 West Seventeenth street, Thursday at 2 p. m.

Women's Relief Corps—Will meet Thursday afternoon, at 2:30 o'clock, in the G. A. R. hall.

Neighbors of Woodcraft—Will hold a short business session, followed by a "kid" party, in the M. W. A. hall tonight, starting at 7:30 o'clock.

Society

Aid Society

Congregational—The four sections of the Congregational Aid society will meet Wednesday, three of them in the afternoon at 2 o'clock and the fourth in the evening. The north-east section will be entertained at the home of Mrs. S. J. Hales, 1727 North Main street; the north-west with Mrs. B. R. Ford, 411 West Seventeenth; the south-west with Mrs. L. M. Smith on South Main street and the south-east will banquet at the church in the evening hours.

First M. E.—On Wednesday afternoon at 2:30 o'clock, the Foreign Missionary society of the First M. E. church will meet at the church where members will present a dramatization of "The Price of Pleasure." The lesson on "The light of a new way for South America" will be presented by Mrs. Will A. Betts.

First Christian—Meeting at the community house of the First Christian church Wednesday afternoon at 2:30 o'clock, the Aid society members will have an important business session promptly at 3 o'clock. Mrs. T. D. Knights the president, has suggested that each bring her own needlework as there will be none provided for the friendly social hour.

Past Matrons

The date for the May meeting of the Past Matrons' association of Hermosa chapter, O.E.S. has been advanced from the fourth Tuesday to Thursday, May 21, when Mrs. George Safely, Mrs. A. W. Griffith and Mrs. Hervey T. Trueblood will entertain at the Masonic temple.

Luncheon at 1 o'clock will be followed by the usual business and social afternoon. Roll call will be answered by each in turn with their reasons for leaving their native state for California.

PICNIC PARTY CHARGED WITH HAVING BOOZE

A picnic party in Orange County park yesterday, at which the picnickers played what an officer said was stud poker and drank what he termed "liquor," was interrupted by Deputy Sheriff Jack Meek. He cited James L. Riddell, 1249 West Thirty-ninth street; C. Bowman, 1030½ West Twenty-third street; J. E. Russell, 653 East Fifty-sixth street, all of Los Angeles, to appear Tuesday morning before Justice of the Peace G. W. Ingle, at Orange, to answer to a charge of possessing intoxicating liquor.

Meek said the liquor consisted of half a quart of gin and a pint of bootleg whiskey. He did not arrest Miss Beth Humphrey, 1507 West Forty-ninth street, Mrs. Bowman and Mrs. Russell who he said were members of the party. The picnic, according to the deputy sheriff, was held in Hall canyon.

A. C. McKennon, who gave a Hollywood address, was arrested Sunday in Santiago canyon by Meek on a reckless driving charge, after he had attempted to drive his car with one hand, the other hand encircling the waist of a motion picture extra girl, according to the officer.

Meek declared he had arrested the pair only a few moments before for trespassing, after they had got out of their car and started across a field. McKennon will answer to the double charge tomorrow morning before Justice of the Peace Ingle.

LONG DISTANCE CRYSTAL.

PARIS, May 18.—A French scientist is said to have developed a crystal set that will pick up radio programs for 300 miles and operate a loud speaker for shorter distances. The crystal is a form of "ferro-silicon," and is made in an electric furnace through a fusion of sand and iron.

Pioneer Spirit Is Extolled At Last Sad Rites

Funeral services for J. P. Williams, 90, pioneer citizen of Orange county, and father of Superior Judge R. Y. Williams, and W. B. Williams, of Santa Ana, who died at his home at 1601 North

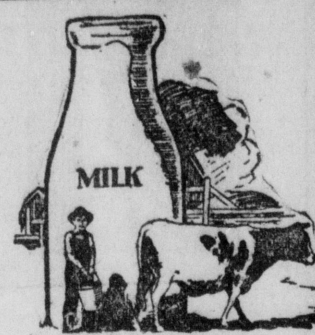

Main street, Thursday night, were held from the Smith and Tuthill funeral parlors Saturday afternoon, at 3:30 o'clock.

Commenting on the pioneer spirit which led Mr. Williams first to Minnesota from his New York home and then to California in the early 80's, the Rev. P. F. Schrock, pastor of the Congregational church, who had charge of the services, praised his life, which, he said, was one of upbuilding throughout.

Mrs. F. W. Slabaugh sang two solos. Members of the family acted as pallbearers. Burial was in Fairhaven cemetery, where the body was laid at rest by the side of Mrs. Williams, who died only a short time ago.

Special—6 bars Ivory and 1 Chipso for 50c. Phone Anderson's. Free delivery.

Flu flees at Loma Linda treatment rooms, 413 N. Broadway.

ABSOLUTELY

Safe Milk is Pasteurized

PASTEURIZATION CANNOT MAKE BAD MILK GOOD BUT IT DOES MAKE GOOD MILK SAFE

Pasteurized Milk is milk that is heated in specially constructed glass-lined containers at a temperature of 142 degrees F. and held at this temperature for thirty minutes. This is far below the boiling point but it is high enough to kill any disease germs that might have come in contact with the milk. It is a method of making good milk better, for we obtain the cleanest and best milk to be had. But the best of milk may receive germs from the air or other sources so it is just plain common sense to use this simple, practical method to make the milk absolutely safe.

Insist on Pasteurized Milk

—Ask Your Physician.

It Takes Nothing Away. It Adds Safety

MILK—
Increases body weight.
Increases rate of growth.
Increases physical power and skill.
Increases mental alertness.
Increases rate of school progress.
Increases resistance to disease.
Increases social adaptability.

"Pasteurization is the only ABSOLUTE guarantee against disease even in high grade milk."—Ira V. Hisecock, assistant professor of Public Health, Yale University School of Medicine.

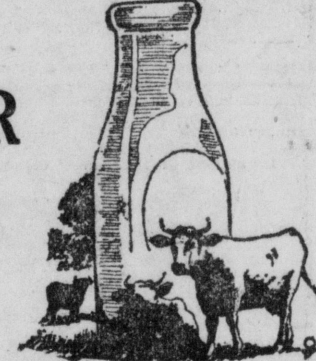

Milk is the most important of all foods—perfect, complete, protective.

Milk contains an additional substance, lacking in nearly all other foods.

Milk is one of the cheapest foods.

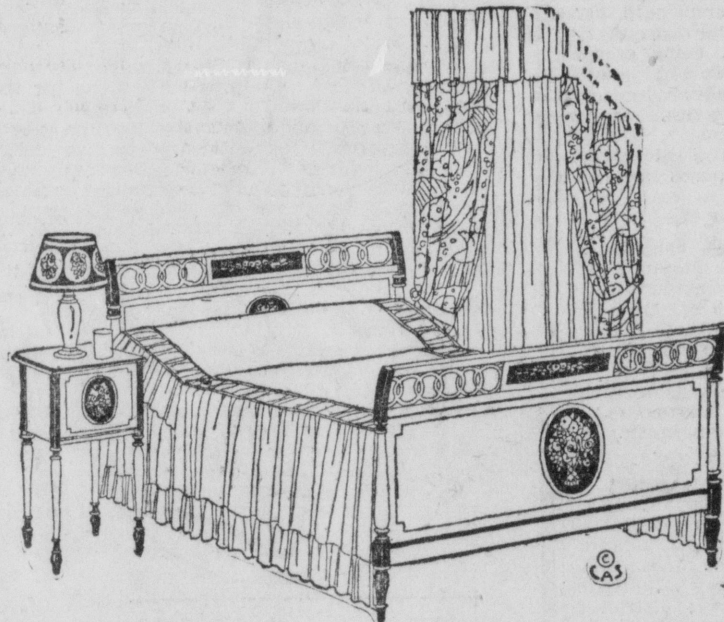

There is no substitute for milk.

Drink, at Least, A Pint of Milk Each Day

Make the Cost Count!

THAT'S the sensible way of counting the cost. Get full return for every dollar you put into furniture. There is only ONE way. Buy good furniture. Good furniture is not costly, —but any other kind is!

Make sure of quality when you buy and your dollars will bear interest throughout your life. Ours is a furniture service dedicated to sound investment. Whatever you buy here pays for itself many times over in service.

The Romance of Furniture

It was a true Colonial four poster bed similar to this in which George Washington slept at Mount Vernon.

REDUCE WEIGHT

The Safe Natural Way
No Diet—No Drugs!

...You can starve yourself and lose weight. It is dangerous. You can take drugs. Beware of this! You can bend and stoop and roll and touch your toes. This is good for you, but it is tiresome. Why bother when thousands of women and men, too, have reduced weight through the simple, harmless, natural Veronica System of Weight Reducing? This system is nothing more or less than drinking daily a few glasses of a pure mineral water—Veronica, bottled just as it comes from the Springs. This is all there is to it. Fat is caused by improper assimilation of food. When Veronica causes the organs of the body to function normally, perfect assimilation of food is restored. Excess weight is lost without lines or flabbiness appearing. Start this treatment. You will be delighted when the fat begins to disappear.

Veronica is sold by all Drug Stores
Send for booklet—Veronica Springs Company, Santa Barbara, California.

Betrothals Weddings Receptions

Sisters-In-Law Greet
Many Close Friends
At Smart Parties

Very spring-like and very French were the appointments for a pair of delightful bridge luncheons with which Mrs. W. N. Prince and Mrs. Walter Vandermaast chose to entertain a number of their friends on two successive days, Friday and Saturday of last week.

The two events were pleasant contributions to the smart affairs which characterized the week and the Inn offered its usual charming setting. The hostesses who are sisters-in-law chose blue and yellow for their color scheme and utilized the golden wealth of Scotch broom to complement the cerulean tints of larkspur and corn flowers.

Guests were grouped at small tables in the dining-room, each table bearing a pretty basket of Scotch broom and corn flowers, the handles tied with graceful tulle bows. After an enjoyable menu was deftly served by the Inn management, the hostesses led the way to the great foyer where tall baskets of the predominant blossoms, were arranged in decorative effect among the eleven tables called in to play for each event.

On Friday, Mrs. Vandermaast and Mrs. Prince were assisted in their pleasant duties of greeting guests and bestowing prizes, by Mrs. Ray Chandler, Mrs. Fred Chapman and Mrs. Hubert Dale. On Saturday, Mrs. Charles Claytor, Mrs. M. A. Faxon and Mrs. Murray Vandermaast, a bride of only a few months, were the friendly aides.

Each day most attractive prizes, wrapped and tied to conform to the blue and gold color scheme, were bestowed on those whose scores merited recognition. Mrs. Mark Lacy scored high on the earlier afternoon, with Mrs. Don Andrews second and Mrs. Joseph P. Metzgar, third. On the final afternoon, Mrs. Guy Gilbert won high honors, Mrs. Emrys D. White, second and Mrs. James Metzgar, low.

Friendly Group Meets For Bridge Evening

Among the frequent social affairs shared by a little group of congenial folk was an evening at bridge presented Friday night by Mr. and Mrs. Frank Witmer at their South Garney street home.

Those scoring high in the game were Mrs. Percy Bowne and T. P. Ham while Mrs. Harry Kenyon and Mr. Bowne had to accept consolation for their low scores. Following the friendly contest, Mrs. Witmer served a delicious salad with water and coffee at the tables arranged with pretty linens and centered with spring blossoms like those used throughout her home.

Sharing the pleasant evening with the hosts were Mr. and Mrs. Kenyon, Mr. and Mrs. Percy Bowne, Mr. and Mrs. T. P. Ham, Mr. and Mrs. Ben Keeler and Mr. and Mrs. Fremont Kutnosky.

Vocalist Pleased Over Contest

Madame Manuela V. Budrow was highly gratified today when results of the recent vocal contest among high and intermediate school pupils of Anaheim, were announced and she learned that her pupil, Miss Eunice Hilton of Anaheim High school, was adjudged winner.

The youthful vocalist has a clear full mezzo-soprano voice and was the unanimous choice of the three judges, Miss Mary O'Donahue, teacher of music in Polytechnic High school, Los Angeles; Jay Plova, first flutist of Los Angeles Philharmonic orchestra and Louis Curtis, a teacher at Lincoln High school, also of the Angel city.

Madame Budrow announced today that her next recital would be an event of the first week in June at the Ebell auditorium.

Ebell Club
While the weekly teas of the Ebell society are highly enjoyable features, interest of the members is centered just at present in the plans of the ways and means committee for a huge spring-time bridge party for all friends of the society, scheduled for Thursday afternoon, May 28.

It is hoped to make enough at the affair to tide the clubhouse over the summer months when income will be small indeed but expenses will go merrily on. The largest crowd of card players ever assembled at the clubhouse is anticipated by the hostesses. A unique feature will be the gift system, for in addition to the attractive prizes which will reward skill among bridge players, each person attending will receive a pretty souvenir gift whose nature remains the closely guarded secret of but four members of the committee.

They maintain the most maddening secrecy in regard to the gifts, only assuring the holders of tickets that the articles are all alike and are worth in actual cash, one-half the value of the paid admission. Such a unique feature was only made possible through the cooperation of a generous minded corporation which makes the pretty articles. However the announcement is proving of the utmost interest among members and friends, for womankind too dearly loves a surprise to refrain from buying a ticket in order to be present to receive the pretty gift.

Delphian Circle
All Delphians and their guests who plan to attend the luncheon with which the chapter will bring its splendid year to a close next Friday, are asked to assemble at Ebell clubhouse at 12:30 o'clock. Luncheon will be served promptly at 1 o'clock in order that the section rooms may be cleared for another party which is to be held there. Delphian members will entertain their guests in the lounge during the remainder of the afternoon.

LOVELY PAGEANT EFFECT AT LATE AFTERNOON NUPTIALS

Mr. and Mrs. Nelson Visel (Miss Holly Lash) whose wedding at the First Methodist church Saturday afternoon was the outstanding event of the week's social activities.

Enhanced by the loveliness of flowers, small children and charming girls, the setting for Saturday afternoon's nuptials of Miss Holly Lash and Nelson Visel was one of the most attractive ever devised at the First Methodist Episcopal church. It was appreciated and enjoyed by hundreds of friends of the popular young couple, assembled at the church in time to hear the half hour of music preceding the ceremony.

A wealth of early summer bloom brightened the ante rooms and corridors leading to the auditorium but within the church everything was in soft green with ropes of asparagus plumosus fern, verdant leafy branches and tall palms banked at the altar. From the garlands of fern swayed three snowy wedding bells and each pew was marked by a spray of fern tied with soft pink tulle. Two tall baskets of pink gladioli offered the high lights.

The recital preceding the appointed hour for the nuptials opened with organ music played by Mrs. W. B. Snow with whom Miss Lash has had such close associations. The music had a charming significance, each number being selected for its beauty and appropriateness. The program opened with MacDowell's "At a Trysting Place" and continued with "Tomorrow" by Richard Strauss and Debussy's "Romance." An exquisite rendition of "Meditation" from "Thais" was the violin solo played by Ollimae Enlow Matthews with Earl Fraser at the piano and Mrs. Snow at the organ. Mrs. Matthews was as charming in appearance as in performance, a petalled frock of beige and scarlet worn with scarlet slippers.

No more beautiful rendering of Reginald De Koven's "Oh Promise Me" could be imagined than that of a quartette composed of La Rue Phipps Mayer, Cecil Fraser, Willits Taylor and Reginald Monroe Sharpless and Reginald singing to the organ accompaniment of Miss Ruth Armstrong.

Ellis Rhodes was soloist and his numbers were particularly lovely and well chosen, "Beloved It Is Morn" and "Believe Me If All Those Endearing Young Charm." Miss Armstrong remained at the organ and Mr. Fraser took his place at the piano for the organ-piano rendering of the Bridal Chorus from Lohengrin, and the pageant-like wedding party entered. The bride is a past mistress of the art of pageantry and her wedding will remain in the minds of her friends as an outstanding evidence of her skill.

Six bonny wee lassies entered and marched slowly down the aisle, three in each group, each wore a filmy white frock adorned on one shoulder with a chou and flying ribbons of delicate pink. Swinging from shoulder to shoulder was a green garland of fern with small wedding bells of Cecil Brunner buds. The little girls' expression of Miss Lash, were Luella Doris Crosby of Yorba Linda, Marjorie Gowen, Charlene Lowell, Neva-Fae Gerdis, Natalie Neff and Anna-Lee Williams. Walking sedately, they formed a snowy phalanx of childhood at the altar where the Rev. Will A. Betts, the Rev. Dr. Lywood of Long Beach, Mr. Visel, the bridegroom and his best man, Clyde Whitney, awaited the approach of the lovely bride.

The group of ushers, Messrs. Henry Power of Los Angeles, Orlyn Robertson and M. R. Charbonneau took their places at the altar and the three bridesmaids entered to march slowly down the aisle. Gowned alike in everything but color the three girls made a most effective picture, each with a great cluster of mauve sweet peas tied with flaring tulle bows. Thin frocks were of taffeta with straight color the three girls made a most effective picture, each with a great cluster of mauve sweet peas tied with flaring tulle bows. Thin frocks were of taffeta with straight color the three girls made a most effective picture, each with a great cluster of mauve sweet peas tied with flaring tulle bows.

Upon their return they will be at home to their friends at the pretty place in Orange which is all in readiness for occupancy and which will be filled with the countless exquisite wedding gifts which have been showered on them. Mr. Visel will continue his ranch developing operations and Mrs. Visel will continue a part at least, of her studio work, to the satisfaction of her friends and admirers.

Among the members of the wedding party, Mrs. A. J. Visel, mother of the groom, was charmingly rosy-tinted in powder blue with lovely lace to harmonize and wore a corsage of sweet peas. Mrs. Mayer was in peach georgette and Mrs. Willits in orchid. Miss Ruth Armstrong wore emerald green beaded in crystal and Mrs. Snow was gowned in soft crepe and lace.

COLOR IT NEW WITH "DIAMOND DYES"
Beautiful home-dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.—Adv.

June Bride-elect Is Honor Guest at Dainty Party

Miss Christine Schenck whose marriage to Floyd Rogers will take place June 19, was complimented last Saturday afternoon with a little party at the home of Mrs. William Armstrong of Greenville.

Mrs. Armstrong chose pink, yellow and orchid for her color scheme and the living room contained French bouquets of pink and orchid sweetpeas, pink larkspur and yellow snapdragons. The other rooms contained bouquets in separate colors of sweet peas, Japanese broom and on the dining table a large cut glass basket contained orchid sweetpeas and purple larkspur, all the flowers coming from the garden of the hostess.

Fourteen guests were invited to bring thimbles and each girl hemmed a cup towel and put her own initials on it, after which she presented it to the bride-elect. Then an old fashioned clothes-basket was placed before the honor guest who found it filled with most useful and practical gifts to be used in her kitchen. Miss Schenck found a recipe-filing cabinet in the basket and asked each girl to take a card and write a favorite recipe for her to try at a later date.

Mrs. Armstrong served a strictly "home-made" menu on individual trays. Each tray contained chicken salad, hot biscuits, pink and yellow nut cups filled with salted nuts and orchid candies, and French pastry with icing in the three dainty shades. Each guest, except the honoree, also found on her tray a tiny corsage of pink and yellow Cecil Brunner buds tied with orchid tulle. When the honor guests objected, the hostess found for her a much larger bouquet of the same variety.

Guests invited were Mesdames John Sauters, Glen Tidball, Charles Winans, Irving Meyer, Emmet Rogers, Jasper Osborne, the Misses Sadie McClain, Anne Segerstrom, Ida Segerstrom, Leslie Smith, Ruth Armstrong, Bertha Armstrong, Doris Schenck and the honor guest Miss Christine Schenck.

Gay House Party At "Our Village"

Facing their duties at Roosevelt school with a zest because of a happy interval of play-time, a little group of teachers at that school were today recalling the pleasurable events of a week-end at the beach from which they returned late last night.

Leaving directly after school Friday, the lively group motored to Laguna Beach where they had a cottage awaiting them. The two days of their stay were filled to overflowing with hikes, climbs, swims and beach sports.

In the party were Miss Margaret Grant, Miss Pearl Camblin, Miss Isabel Lindsay and her sister, Mrs. Albert Conultz, Miss Esther Jean Davis, Miss Gladys Campbell, Miss Betty Renshaw of Anaheim, Miss Verna Wells, school principal and her mother, Mrs. N. E. Wells.

San Bernardino Is Scene of Quiet Wedding

Their many friends were today extending congratulations and good wishes to Mr. and Mrs. Herrick Merigold who were returned from a short honeymoon in San Bernardino and Riverside following their quiet marriage of Thursday, May 14 in the former city.

Mrs. Merigold was Mrs. Anna M. Flower, daughter of Mrs. J. H. Walker, 514 East Second street. Friends of the two young people have anticipated the wedding as an event of the summer but were kept in ignorance of the date decided upon until they received word of the nuptials. The bride wore a lovely ensemble of white and sunset crepe de chine and a becoming hat to match. The ceremony was read by the Rev. Mr. Dye of the First Baptist church, San Bernardino.

The happy young couple returned to this city last night and are already established at their new address, 709 West Pine street. Mr. Merigold is with the Dale Hardware company.

Gay Party Follows Musicians' Picnic

Following the enjoyable picnic which Orange county musicians shared last Friday at the county park, Mr. and Mrs. Myford M. Carrillo asked the members of Dymart's orchestra and their wives, to spend a merry evening at their pleasant home, 719 West First street.

Garden flowers brightened the home in an attractive manner and Mrs. Carrillo arranged tables for bridge which was the chosen diversion of the picnicers. The game was most informal and was followed by a social interval during which refreshments were served.

Enjoying the hospitality of Mr. and Mrs. Carrillo were Mr. and Mrs. R. L. Dymart, Mr. and Mrs. H. T. Dymart, Mr. and Mrs. William Elliott, Mr. and Mrs. Barnes, Mr. and Mrs. "Jimmie" Briggs, Mr. and Mrs. Charles Rhinard and Mr. and Mrs. Robert Baird.

Parent-Teachers Assn.

Lincoln P.T.A. meeting, originally scheduled for Thursday afternoon, May 21, has been postponed until some date nearer the close of the school year. The date will be announced in good time by the association secretary.

\$15,781 DAMAGE SUIT FOR STAGE CRASH ON TRIAL

Evidence both on and off the wit-
ness stand was presented today
to a jury in Superior Judge R. Y.
Williams' court, where the trial
of a \$15,781.50 damage suit
brought against the Motor Transit
company by Anna Angelo, Tujunga
business woman, was in progress.

R. H. Patterson, driver of a Pick-
wick stage which collided with a
Motor Transit stage at Fifth and
French streets, Santa Ana, was on
the witness stand, describing the
accident, in which the plaintiff
claims to have incurred injuries.

The evidence from off the wit-
ness stand consisted of vocal and
facial signs of grief and agitation
on the part of the plaintiff herself.
Sobs were emitted and fearful sig-
nals of distress were shown.

Plaintiff claims to have suffered
concussion of the brain, besides
bruises, shocks and dispirations, when
the two stages collided, last Aug-
ust 30. She is proprietor of a vari-
ety store at Tujunga, and was
riding on the Pickwick stage at
the time of the accident.

Patterson testified that he was
driving slowly south on French
street and had started to turn east
on Fifth street, when the other
stage, traveling at a rate of 30
miles an hour crossed Fifth street,
tried unsuccessfully to dodge his
stage, and struck its front end
with a rear wheel. His passengers
were shaken up, he said, and Anna
Angelo complained of having her
side hurt.

Other passengers and witnesses
of the collision were summoned
to the stand by Attorneys Bryce
P. Gibbs and W. H. Thomas, re-
presenting the plaintiff. The Los
Angeles firm of Becker, Smith
and Burke represents the defense.
A special venire of jurors was sum-
moned to hear the case.

FORD WOULD MELT SHIPS INTO AUTOS

(Continued from Page 1.)

usable part of the boats on the
market. There would be a howl
then from the boiler makers, the
engine and pump manufacturers.

Willing to Pay Fair Price

"My proposal is entirely differ-
ent. I'm willing to pay the govern-
ment what the ships are worth,
and if I get them I'll scrap them
to the last ounce of iron and steel
and brass.

"I'd buy derricks and all the other
machinery necessary to strip them
to the bone. I'd take the boilers out
of them and if any of them were
usable, I'd use them. If any of the
pumps were in working condition,
I'd find a place somewhere in my
business to use them.

"Then all the metal that was left
I'd pour into my melting pots and
make Ford automobiles and trac-
tors.

"I wouldn't sell a dime's worth
of things I found on those ships—
either in this country or abroad."

Then Ford turned to the topic of
preventing future wars.

"War is brought about because
ignorant people are misled into
hatred and finally into fighting,"
Ford said. "The thing to do is to
enlighten the people in the back-
ward countries."

"Now, if I ship Ford tractors in-
to Russia—as I'm doing now—I
give them a chance to develop vast
stretches of fertile soil. I ship
them Ford automobiles and they
get to travel and mingle with other
people. In that way, they be-
come educated in that way, they
will avoid being suckers, led to
another slaughter, another World
war.

May Object to Melting

"There may be some in this
country who will object to having
these government ships melted up
into Ford automobiles. It should
be one of the last lessons in the
folly of war. They are useless now
—and I propose to convert them
into instruments of peace and pros-
perity.

"Mr. O'Connor knows his busi-
ness and sees all this. If some other
members of the shipping board
or congressmen block the deal, it
will be because they are the pup-
pets of the international financiers,
who already are scheming to throw
the world into another war so that
they can make more money."

"All this talk about being afraid
of Japan—that's part of the
scheme, and the newspapers that
foster hatred toward Japan are
owned by men who are acting as
publicity men for the plotters."

Ford brought the interview to a
close with a repetition, pounding
one tanned fist into another to
emphasize his words:

"The best way to spell patriot-
ism is p-a-y. Remember that is the
keynote."

**Americans In New
Victory at Geneva**
GENEVA, May 18.—Chairman
Burton, of the American dele-
gation to the arms traffic conference,
gained a new victory today when
a sub-committee on traffic statis-
tics agreed with the American
viewpoint that the final statistics
committee should be drawn from
the principal nations rallying the
convention.

COBB AND SPEAKER MAKING LAST STAND AS AMERICAN LEAGUE MANAGERS, CLAIM

NEW YORK, May 16.—Two fa-
mous players, American league
stars for years, are said to be
making their last stand as man-
agers.

They are Tytus Raymond Cobb
of Detroit, greatest ball player
of all time, and Tris Speaker, out-
fielder extraordinary of the Cleve-
land Indians.

Cobb and Speaker are known
to be the highest-priced managers
in the American league. He
are working on a one-year con-
tract.

It is said that Cobb's stipend
as manager and player calls for
\$60,000, while Speaker's figures
read something like \$50,000.

Babe Ruth, baseball's greatest
attraction, gets \$52,000, or \$1000
weekly the year round.

While \$60,000 appears like a
lot of money for a player-manager,
but Cobb easily earns it, when
delivering in that capacity. He
hasn't delivered the last two
years.

As a manager he has failed to
get the results that the experts
feel he should. Detroit is gener-
ally regarded as the strongest ag-
gregation in the American league.

Cobb has three good catchers,
about 10 capable pitchers, two in-
fields of almost equal strength.

The Referee

When did the Philadelphia Ath-
letics last win the American league
pennant?—W. F. F.

The Athletics last won the pen-
nant in 1914. They were defeated
by the Boston Braves in the world
series in four straight games, how-
ever.

A claims that Jack Bentley of the
New York Giants had a higher bat-
ting average than Rogers Hornsby
in 1923. B says that Hornsby was
tional league that year and topped
the list. Who is right?—F. T. Y.

Both are correct in a sense.
Rogers Hornsby was the batting
champion, but two players, Stein-
ender and Bentley, had higher av-
erages. Bentley batted .427, Horns-
by .384, a difference of 43 points.
However, Bentley was at bat only
89 times to 424 for Hornsby, and
really didn't qualify for the cham-
pionship.

SHORT SPORTS

NEW YORK—Jack Coffey, base-
ball coach at Fordham University
and former manager of several
minor league clubs, has been ap-
pointed eastern scout for the Cin-
cinnati Reds. Manager Jack Hend-
ricks announced.

NEW YORK—Paavo Nurmi,
world's champion runner who
was cleared of charges of ex-
tortion Saturday by the A. A.
U., will sail for Finland on
May 23. He may run a special
half mile and mile races for
records on the Harvard track
before he leaves. Nurmi is
understood to have told friends
he may return to this country
to make his home.

NEW YORK—Tommy Griffith,
veteran Brooklyn outfielder who
was traded Saturday, joined the
Chicago Cubs in Boston today. The
player the Robins will get for him
has not been announced but it is
understood to be Midget Adams, a
young infielder.

AMSTERDAM — Amsterdam
has decided definitely not to
give up the 1928 Olympic
games, the Holland committee
announced in making an appeal
to the public for funds to pro-
tect the games. The failure of
the government to pass a sub-
sidy to finance the games was
blamed upon partisan politics.

NEW YORK—Bennie Marinelli,
young New York jockey who was
injured seriously in a spill at the
Jamaica race track last Friday,
was reported in a critical condition
today. Mark Fator, rider for the
Ranococas stables, sustained a frac-
tured shoulder in the same spill.

SCORES PIANO "TYRANNY"
LONDON, May 18.—"Thank
heavens, the gramophone has now
destroyed the tyranny of the
piano," said Compton Mackenzie,
the novelist, during a lecture. "In
fact, there is a beautiful justice in
the gramophone's outstanding
failure to reproduce adequately an
instrument that had done so much
to hinder the development of
music."

To the Stockholders of the Orange
County Bond and Mortgage Corpora-
tion:

You will please take notice that the
annual meeting of the stockholders
of the ORANGE COUNTY BOND &
MORTGAGE CORPORATION will be
held at the office of the Corporation,
601 N. Main Street, in the city of
Santa Ana, County of Orange, State
of California, on Tuesday, the sec-
ond day of June, 1925, at eleven A. M.,
for the purpose of electing Directors
for the ensuing year, and transaction
of such other business as may prop-
erly come before the meeting. Dated
at Santa Ana, Calif., May 8, 1925.

PETER PALM,
Secretary of the Orange County
Bond & Mortgage Corporation.

BASE BALL SIMPLIFIED by BILLY EVANS

When is the batsman automati-
cally out on a third strike even
though the catcher does not retain
possession of the ball?

The batsman is always out on
a third strike regardless of
whether the ball is caught, when
there is a runner on first base
and there are less than two out.

Before this rule was put into
the playing code, the baserunner
was at the mercy of a smart cat-
cher. He would purposely drop
the ball forcing the runner to ad-
vance and usually make a double
play.

The present rule, with a runner
on first and less than two out,
gives the baserunner proper pro-
tection, since the batsman is au-
tomatically out and no other play is
possible unless the runner or run-
ners seek to advance at their per-
il on the dropped third strike.

When two are out it is compul-
sory that the third strike be caught
to retire the batsman.

SOLDIERS, BRIGANDS FIGHT

LONDON, May 18.—Sofa dis-
patches relate encounters between
1500 soldiers and brigands whom
the military were sent to subdue.
The brigands were reported to
have plotted wrecking of the Simp-
son-Orient express.

46 DIE IN BLAST

BERLIN, May 18.—Latest re-
ports from Dortmund place the
dead in the Dortfeld mine disas-
ter in which a depot containing
tons of dynamite exploded Satur-
day at 46, with 20 injured. More
than 400 miners escaped alive.

Kennedy Radio Sales and Service are Authorized Dealers for Kennedy Radios

9 out of 10

In TEN successive homes where Model XV was dem-
onstrated in competition with other radio sets, Ken-
nedy was the undisputed selection of NINE!

This store, as original
Kennedy dealers, is still
headquarters for Kennedy
Radio equipment.

We were certain, from
the first of broadcasting,
that Kennedy sets were
the best, and for that
reason, we have not
changed to any other
make.

It will mean a great
deal to you in the selec-
tion of your set to note
that over 500 Kennedy
sets have been sold from
this store.

This 90 per cent Kennedy
favoritism is indicative of the
sentiment in favor of Kennedy
generally. Time and again we
have proven it.

That's why you owe it to your-
self and your family to consider
such a set—one that continues to
hold such popularity.

True musical lovers—the mas-
ter shoppers of the world—choose
the Kennedy.

And the wonderful tonal qual-
ities are brought in with an ease
of operation and simplicity that is
as marvelous as the results them-
selves.

We would rather show you
Kennedy superiority in your home
than tell you.

CUTICURA HEALS RED PIMPLES

On Face. Scaled Over and Itched and Burned Terribly. Could Not Sleep.

"My face broke out with small pimples which later grew larger and were very red. The pimples scaled over and itched and burned terribly, and I could not sleep at night because of the irritation. The trouble lasted about six weeks.

"My mother recommended Cuticura Soap and Ointment so I sent for a free sample. It helped me so I purchased more, and after using three cakes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." (Signed) Miss Stella Dudley, Stratford, Wash., June 7, 1924.

Cuticura Soap, Ointment and Talcum promote and maintain skin purity, skin comfort and skin health often when all else fails.

Soap 25c, Ointment 25c and 50c, Talcum 25c. Sold everywhere. Sample sent free. Address: Cuticura Laboratories, Dept. B, Malden, Mass.

25c Cuticura Shaving Stick 25c.

FUN, HILARITY, WIDOW BOOSTS HOLD SWAY AT PORT BONDS ON COUNTY PICNIC SAFETY GROUND

It's all over—the annual picnic of Orange county employees at Orange County park, Saturday afternoon. It was a scream from the sound of the whistle for the first event in the afternoon to the last when the delightful dance music furnished by Louis Heffner's orchestra.

Dr. P. W. Slabaugh, county purchasing agent; Earl Abbey, deputy county clerk and Herbert Eldridge of the assessor's office, were the "bright minds" developing the brilliant program—a program that entertained approximately 450 county employees and some of their friends. The fun was fast and furious, with some of the county officials casting dignity aside and joining in actions they would not countenance except in the spirit of providing entertainment for their colleagues.

The attendance was larger than at any of the previous annual picnics of the county employees and the amusement features were better—previous events had set a high mark in this respect.

Beginning with a mock wedding, amusing from start to finish, the county officials did not stop their fun-making until late in the afternoon, when a boat race was featured.

"Wedding" Makes Big Hit
The wedding scored the biggest hit of the afternoon in the form of amusement. Miss Jeff Brown, of the health department, took the part of the bashful bride, and the "bridegroom" was John Lamb, tax collector for the county.

Costumes for the wedding must have been dug up from trunks that came across the country in a covered wagon. The acting on the part of the wedding principals was most amusing.

Jesse Elliott, constable, acted the role of parson. The bride and bridegroom marched to the tune of Mendelssohn's wedding march, rendered by Mrs. George Chapman. Frank LaBard was the ringbearer, while Miss Dorothy Beck acted as a flower girl.

J. L. McBride, dressed in clothes at least a decade old, acted as the father of the bride, and the mother, also garbed out of fashion, was Mrs. Schell.

Acted Lovelorn Swain
R. R. Miller, in knickers and a boy's shirt, stood nearby, in the role of disappointed lover.

The second event of the afternoon's entertainment was a balloon-blowing contest between several of the heads of county departments. Alex P. Nelson, district attorney, was considered the "poorest" blower in the contest and was awarded a bicycle pump.

A race on kiddie kars was staged between Justice Whitney, county recorder, and Margaret Livingston, county librarian. Miss Livingston won and was awarded a box of cookies. Mrs. Whitney received a bottle of milk.

In an old clothes race, in which Walter Gregg and Hattie Powers comprised one team, and Dave Wettlin and Mrs. Birdie Swanwick, the other, prizes were awarded to the latter.

Approximately 20 girls, employees of the various county offices, participated in a cracker-eating contest. The first girl who could whistle after eating a given number of crackers was declared the winner.

Members of the sheriff's department, together with officers of the state traffic department, were next on the program in a pop-drinking contest. Prizes were awarded to F. G. Yoder and Jesse Elliott.

The last contest of the afternoon before the official call for dinner was sounded, was a unique boat race between teams captained by District Attorney A. P. Nelson and County Supervisor Tom Talbert. Oars were taken from the skiffs and poles substituted. Each team had six men whose task was to transport a young woman across the lake, change with a colleague on the other side, and get back.

Exhibit Huge Still
One of the features of the afternoon's entertainment was a huge still, captured somewhere in the "wilds" of Orange county and which was placed on exhibition near the center of the park. "White mule," in the form of water, dripped from the copper coil throughout the afternoon. The still gave a clear idea of how "moonshine" stills were operated.

Dr. Slabaugh announced dinner at 5:30 o'clock and 400 happy but hungry persons sat down to the long tables and were served by a number of high school boys, who assisted W. K. Duffy in offering the pleasure-lovers a real county park dinner. Fifty persons were served at a second table.

Slabaugh Is Re-elected
Following dinner a brief business meeting of the employees' association was held in the pavilion. Dr. Slabaugh was re-elected president and he named Miss Whitney as secretary and treasurer. The election and appointment were greeted with an outburst of applause that indicated the high regard in which the two officials are held.

The name of Dr. Slabaugh was presented by the nominating committee, composed of Sam Jernigan, sheriff; J. L. McBride, superintendent of county roads, and R. P. Mitchell, superintendent of public schools.

Creation of a fund by assessing each employ \$1 was proposed by Dr. Slabaugh and a suggested plan was presented in detail by W. C. Jerome, county auditor. The fund would go to the family of an employee following his death. The subject was discussed by T. B. Talbert, chairman of the board of supervisors, and A. P. Nelson, district attorney, and finally was referred to the officers' association, which will work out details of the plan. It was given authority to place the fund in operation.

Whether the assessment should be on the basis of salary received by an employee or on a flat basis of \$1 per member was left to determination by the association. The first fund will be raised when the plan is put into effect and thereafter an assessment will be made

Among the Orange county residents working for harbor improvement is Mrs. Florence Granger, of 2417 Valencia avenue, widow of E. H. Granger, who was one of the eight persons who lost their lives when the fishing launch "Adieu" was smashed to pieces by ground swells at the entrance to Newport harbor, June 8, 1924.

In an interview today, Mrs. Granger declared that, if harbor bonds are voted, it will mean improvement of the entrance, and this will in turn obviate repetition of the catastrophe which saddened Santa Ana last summer.

"It takes some terrible disaster such as the one which happened last June to make one realize the necessity for proper safeguards," said Mrs. Granger today. "I believe that, if the harbor entrance had the improvements which are planned under the proposed bond issue, the launch would not have been overturned and broken to pieces."

"It takes money for such work as is necessary at the harbor, but surely human life is of far greater value than dollars."

"When the time comes for voting on the bonds, if the people will consider that the expenditure of money at the harbor may mean the saving of human life, I believe that the bonds will carry by a big majority."

Of the 13 Santa Ana men and boys who chartered the "Adieu" on that fateful Sunday morning, but five were rescued. Those who lost their lives were Chris J. Ems, F. L. McCune, Fred Pientner, Dr. J. G. Kelly, E. H. Granger, H. Newton Thornton and his two sons, Davis and Allen.

The accident occurred when the "Adieu" ran into four heavy ground swells, the last of which mashed the boat to pieces and tossed the occupants into the angry sea. Had the entrance been improved as proposed under the contemplated bond issue, the catastrophe would never have happened, it is believed.

Jack Spratt's Kin Dies In New York
NEW YORK, May 18.—Mrs. John King Van Rensselaer, 76, author and collector, died suddenly at her home.

Although she traced her descent from a Scotchman, John Baldoun Spratt, said to be the "Jack Spratt" of nursery rhyme fame, Mrs. Van Rensselaer took special pride in the Dutch ancestry of her husband and made herself an authority on the history of the Dutch colonization of New Amsterdam.

At the time of the death of an employee. It was pointed out that a fund of \$300 to \$400, immediately available, would be of great service to the family of a deceased employee.

A cake walk, by R. R. Miller and Miss Hazel Joyce, and a stunt by Harold E. Wahlberg, interspersed the dancing program, which started at 7 o'clock. Heffner is a member of the state motorcycle squad and donated the services of his orchestra.

3 Weeks Vacation De Luxe To Hawaii
—the Enchanting Land of Perpetual Spring.

May and June are pre-eminently "Flower Months" in Hawaii. The brilliant riot of colors that carpet hill and valley in this paradise land is at its height now.

Make the round-trip now on the palatial steamship City of Los Angeles. An all-inclusive expense tour covering auto and rail trips to outstanding points of interest on the islands, including a visit to the Volcano—and everything necessary. Steamship, Sightseeing and Hotel Expense for the entire three-week trip—can be made for \$323.50, and up—according to steamship and hotel accommodations selected.

LATE ALASKAN MAP SHOWS DISCOVERIES

WASHINGTON, May 18.—A number of topographical discoveries made by government geologists exploring Alaska for oil, are shown on a map issued by the department of interior through the geological survey.

Several hundred new tributaries and branches of the Colville river, and changes of its basin, were charted. The eastern mouth of the Chipp River, 50 miles wide, was found in the extreme north of the territory and this, with the upper river, 150 miles long, was named Ikkipuk river.

The map also shows the reappearance of icy bay, eight miles wide, on the edge of the Malantina glacier in the southern part of Alaska, which has appeared

twice before and later filled up. The entire rampart of mountains crossing northern Alaska, 600 miles long, was named "Brooks range."

The discovery of "Aniakchak crater," six miles in diameter and a half-mile deep on the Alaskan peninsula, 40 miles from the town of Chignik, also is disclosed on the map.

Suggest Change In Vocational Training Plan

That each high school in the state of California arrange its vocational training courses so as to fit in with the particular requirements of the community in which it is located, was the opinion arrived at the Fifth Vocational Guidance and Research conference, held Saturday at the Chaffey union high school, according to J. A.

Cranston, city superintendent of schools.

One of the principal addresses of the conference was made by Superintendent Cranston who emphasized the urgent need of giving practical effect to vocational training courses. He stressed the point that with the limited number of high school students who can afford to go to college, it is imperative that such training be given students that will enable them to make their own living after leaving high school.

Such a policy would take cognizance of the value of academic subject, it was brought out by Cranston, who suggested that this phase of school work be employed to give the vocational training an all-round education.

Mrs. Anna L. Horwitz, of Anaheim, is convalescent at the Santa Ana Valley hospital, following a serious operation.

Coolidge Smokes 10-Cent Cigars

NEW YORK, May 18.—President Coolidge smokes 10-cent chevron cigarettes, preferring them to expensive cigars. Charles D. Hilles, a close friend of the president, made the disclosure at a meeting of the Ohio society.

Hilles related that a friend of the president, noting the chevron cigarettes, had sent him a box of expensive cigars. Two weeks later the friend called at the White House and was offered a cigar, observed that the box was the same as he had presented to the president and only three cigars were out of it.

The president explained by telling a story of Jim Jackson of Northampton at a church social. Offered a large plate of strawberry ice cream, Jim said:

"I won't have any, thank you. I am afraid it might spoil my taste for prunes."

Confidence!

THE largest-selling tire made in any Pacific-Coast-owned factory is the C-T-C.

Today the largest-selling tire, a year ago C-T-C was "on its way up"! Two years ago it was a babe in the industry. Three years ago, an idea. Four years ago—an ideal!

Yet it has taken twenty-five years' tire-building experience to build C-T-C!

Behind C-T-C stands a staff of engineers whose experience in Akron factories runs back more than a quarter century! They know tires!

When you need new tires, let us show you what the C-T-C can do. Or, better still, call in now and get acquainted with this tire that has "made good" quickly because of remarkable mileage records.

"Quality will never be sacrificed to meet a price"

SEEKS \$25,000 FOR DEATH AT RAIL CROSSING

The first anniversary of a crossing accident near La Habra, that cost the life of James T. McGuffin, Los Angeles motorist, was marked today by the filing of a \$25,000 damage suit on behalf of his widow.

Mrs. McGuffin, represented by Attorney Bertrand J. Wellman, Los Angeles, instituted proceedings in the superior court against the Pacific Electric Railway company, the Los Angeles and Salt Lake Railroad company, William B. Hester, a Pacific Electric motorman, and Seward N. Johnson, towerman employed by the railroad company at a double crossing on the state highway south-east of La Habra.

In her complaint, the widow charged that a combination of negligent circumstances and actions on the part of the two railroad companies and their employees was responsible for her husband's death. McGuffin died of injuries received on the night of May 18, 1924, when his car crashed through a lowered crossing gate and stalled on the track in front of an on-rushing Pacific Electric car.

The two railroads cross the state highway within a few feet of each other at that point, and one set of gates serves both crossings. The tower and watchman are maintained, it is said, by the Los Angeles and Salt Lake Railroad company.

On the night of McGuffin's accident, Johnson was on duty in the tower and Motorman Hester was operating the Pacific Electric car. At its approach, Johnson lowered the gates ahead of McGuffin, but according to the widow's complaint, the only illumination on the gate was one dim red light.

McGuffin, it was claimed, could not see the gates and thought the red light was the tail-light on a car ahead of him. He turned out to the left to pass the supposed car, and crashed through the gate. The motor of his car stalled directly on the P. E. track and the automobile was carried 150 feet along the track by the trolley car, it was said.

3 Months Wed, Deserted, Bride Claims

A wedding, a honeymoon of three months, and then—Deserted! That was the experience of Doris A. Randle, according to her suit for divorce from George A. Randle, which action was on file today in superior court.

The couple married in Toronto, Canada, Feb. 9, 1924. Three months and three days later, on May 12, 1924, Randle suddenly left his bride, she charges.

Mrs. Randle, now a resident of Santa Ana, has retained Kenneth H. Burns to represent her.

K. OF C. WILL MARK EIGHTH ANNIVERSARY

Santa Ana council No. 1842, Knights of Columbus, will celebrate its eighth anniversary with a program at the council hall, Fourth and French streets, at 8 p. m., tomorrow, it was announced today.

Frank P. Jenal, past grand knight of the Los Angeles council, will be the principal speaker. He was the chief speaker at the dedication of the K. C. hall here, three years ago.

Dr. V. A. Rossiter, district deputy, will preside during presentation of the scheduled program, arranged under direction of J. Oden Markel. At the Fresno convention, held recently, Dr. Rossiter was elected state council representative to the national convention to be held at Duluth, Minn., August 4, 5 and 6.

George Ravenkamp, grand knight of the Santa Ana council, has issued invitations to 20 councils in the Southland and to six district deputies. It is expected that a large number of visitors will be present.

The evening will conclude with a banquet, arranged by Clyde Ashen.

Police News

W. L. Moore, 501 East Fourth street, reported to police yesterday that a suspicious-looking man was in front of his home, making sketches of the windows and doors.

L. L. Lounsbury, 2002 Orange avenue, reported to the police yesterday that his garage was entered by burglars Saturday night and several tools were stolen.

Thieves stole the hood off the automobile of Mrs. Eva Area, 1023 West Second street, while the car was parked near the Santa Ana high school, according to a police report. Police suspect an owner of some stripped-down car, they said.

Radio expert at Hawley's.

CALIFORNIA FIG SYRUP—CHILD'S BEST LAXATIVE

HURRY MOTHER! Even a fretful, peevish child loves the pleasant taste of "California Fig Syrup" and it never fails to open the bowels. A tea-spoonful today may prevent a sick child tomorrow.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

SHOOTS MAN IN FIGHT OUTSIDE BATH PAVILION

Newport Beach police today were seeking the identity of three men, one of whom is thought to be seriously wounded, following a fight which took place near the Corona Del Mar pavilion, shortly after midnight between two of the men and Capt. T. W. Sheffield, manager of the pavilion.

Sheffield is reported to have shot at one of the men, who wandered off in the darkness. Blood-stains on the sand near the pavilion indicate that the man was wounded, police said.

According to Sheffield, who sleeps at the pavilion, he was awakened shortly after midnight by sounds outside. He arose, turned on the light and opened the door of the bathroom. Three men were standing on the porch. They attempted to enter, he said, and he opened fire. The trio fled. He ran out on the beach and offered to fight them, and two of the men returned.

Captain Sheffield's story was to the effect that the men jumped on him and after overcoming him bound and gagged him, using a coil of wire. He managed to free himself an hour later and notified police.

That robbery of the pavilion was the motive for the attack on the bathroom, was the opinion of police who investigated. A large amount of money, taken in over the month's notice been given; also \$50 in unpaid overtime and \$312 for traveling expenses.

Police are continuing their search for the wounded man.

You And Your Friends

Please Phone or Mail Items

Mrs. Geo. H. Winsworth of Los Angeles, who has been the guest of Mrs. Wallace B. Johnston of 2935 North Bush street, has returned home. Mrs. Winsworth is prominent in women's club work in Los Angeles where she has just been elected president of the Cosmos Club.

Mrs. George Kimball, 917 West Fifth street, left Saturday morning for Bristow, Oklahoma, to visit her sister whom she has not seen for thirty-two years. The trip will include Sherman, Bonham and Dallas, Texas, where Mrs. Kimball will visit friends and relatives and attend the Confederate reunion at the latter city. She expects to return in about a month.

E. B. Griley of 427 Fruit street left yesterday to attend the department convention of the G. A. R. at Sacramento. Mr. Griley is a member of the Long Beach band which will render a program of music at the meetings.

Miss Alice Titchenal went to Seal Beach Saturday to visit her daughter until Wednesday.

Mrs. A. A. Schlusman of 1201 West Fifth street spent the weekend in Long Beach and San Pedro, attending at the former city a miscellaneous shower given for her daughter, Mrs. Ruth Brooks, a recent bride, and a party for members of the Eastern Star. At San Pedro Mr. and Mrs. Schlusman enjoyed a pot-luck dinner with a group of friends.

Mr. and Mrs. M. Niederkorn, who have been spending their honeymoon in Santa Ana, guests at the home of Mrs. Gordon M. Hauck, who is a sister of Mrs. Niederkorn, left today on the Southern Pacific for their home in Milwaukee, Wisconsin. They are favorably impressed with this city and have about decided to return in the fall and make their home here.

Mr. and Mrs. Ray Ellis of Pasadena visited yesterday at the home of Mrs. V. Phillips, 121 South Birch, and other friends here. Mr. and Mrs. Ellis are former residents of Santa Ana, and their home was at 437 South Broadway.

Mrs. A. D. Bishop of Orange left on the Southern Pacific yesterday for Sacramento.

Mrs. Agnes Mills who for the past five months has been visiting in the home of her son, W. L. Mills, 701 1/2 South Main street, left for her home in Billings, Mont.

Mrs. A. W. Boynton of Torrance, a teacher in the high school at that city, and formerly Miss Mabel Taylor of Santa Ana, was a guest yesterday at the home of Mr. and Mrs. R. Z. Ballard of 703 Hawley street.

Mrs. J. Edmund Snow, Mrs. Mary B. Robertson, and J. V. Kelsey and Mrs. V. Day of Garden Grove, returned Saturday from Fresno where they attended the state convention of the P. T. A. as delegates.

A. P. Giannini, of San Francisco, chairman of the executive committee of the Bank of Italy, was here Saturday in conference with officials of the Santa Ana branch of the financial institution.

Mr. and Mrs. M. M. Smith, formerly of Santa Ana, now at Beverly Hills, motored to San Francisco last week from which point Mrs. Smith left for Seattle. She will leave there May 16 by steamer Princess Mary for Skagway where she will remain until September 1. Her two sons, Jack and Dan Kirmse will join her upon the closing of school June 25. Mr. Smith returned to Beverly Hills.

THE GAMBLING FEVER. LONDON, May 15.—A new book on Monte Carlo by Charles Kingston relates that a Spaniard named Garcia, starting with a few francs, won more than \$600,000 in the casino. He resolved to keep the money and never gamble again. Two years ago a duke asked him to show him how he won his money. The gambling fever came back and he lost all his fortune.

FILES SUIT TO COLLECT WAGE AND EXPENSES

The Invador Oil company, with headquarters in Huntington Beach, was made defendant today in a superior court suit brought by W. D. Crawford, its erstwhile assistant secretary, who demands \$572 judgment as an amount he claims due him in unpaid salary and expenses.

Crawford states in his complaint that he was employed in a secretarial capacity by the oil company in May, 1924, upon the agreement that he should receive a salary of \$300 a month, and a suitable habitation furnished by the company; also \$12 for each eight hours of overtime, and his traveling expenses when called out of the city.

It was further agreed, he claims, that he should not be discharged without a month's notice, and only upon resolution of the board of directors.

On April 1, 1925, he was summarily dismissed without notice and without action by the directors, he declares. He asks \$200 for the salary he would have received had a month's notice been given; also \$50 in unpaid overtime and \$312 for traveling expenses.

Attorney Roland Thompson, of Santa Ana, is counsel for Crawford.

"STUDY IN AMERICA" NEW YORK, May 18.—"You don't have to go abroad to study music," says Madame Schumann-Helk. "We have just as good teachers here in America as they have abroad."

SPICER'S

Smart Coats for Springtime's Warmer Days

—Whatever your selection may be—it will prove most fashionable, for every coat is true to the mode, fashioned of the best of fabrics, such as Charmeen, Poirer Twill, Suede, and Botany Flannel. Upon inspection you will note the superior quality of the workmanship and careful attention given to details. All important factors that show these are higher priced coats and emphasize the low prices at which they are being sold. Prices are \$14.75 upward to \$75.00.

The Charm Of The Summer Modes—Silk Coats

—The simplicity of these coats is most striking. Quality of fabric and workmanship and infinite care to details no matter how intricate lends richness. Some have collars of self material, others of tiny fur or tie at the neck bows which give an added touch of elegance. The materials are Satins, Bengaline, and Faille. The collection is rich with radiant variety of smart styles—the season's best types. Priced at \$29.75.

You Were Born Lucky ---If You Read This

The Largest Unleased Acreage in the Greenville Section IS NOW PUT ON SALE!

The people who now own land south of Santa Ana to the ocean have a reputation for being "born lucky."

Notice, please, that we are not saying anything about oil—yet.

Now, with a hundred and ten acre tract being put on the market for sale INCLUDING ALL OIL RIGHTS you, too, have an opportunity to be "born lucky."

This tract will be subdivided, streets

will intersect it. You can buy one lot or fifty, one acre or fifty.

You be the judge about that. This is not an oil promotion ad. We are selling good healthy California dirt—110 acres of it. It is worth the prices asked, oil or no oil.

Incidentally the land is leased around this tract, on every side and direction.

Drilling operations commence at once on adjoining property.

That's the story.

Drive West on Edinger Street to

SANTA ANA GARDENS

Stop at the tract office, corner Edinger and Newport Road and get the details for yourself. Or, if you desire information go to your telephone and

ORGANIZATION DECLARED KEY TO VICTORY ON ELECTION DAY

Formation of Intelligent
Body of Patriotic Women
Is Safeguard to America

SHOULD ALIGN WITH
ONE OF TWO PARTIES

Miss Nellie E. Kelley Ex-
plains Republicans' Pur-
pose of Fighting Radicals

Something of the spirit of the movement so successfully launched last Friday night for the tying in of Santa Ana with the California Federation of Women's Republican clubs, may be gained from the splendid address of Miss Nellie E. Kelley, national organizer of Republican Women's clubs, and the remarks of those who followed her on the program.

"It is no longer safe to hunt for the so-called 'best man.' Under our form of government, we must choose the best man, whose campaign for office is participated in and sponsored by a party which stands responsible to the people of this country for his and its acts. It should be borne in mind that good government affects vitally the home, the school and our very lives."

Thus did Miss Kelley emphasize the vital character of party organization and fealty.

In a clear and concise manner, Miss Kelley outlined the history of the American government, declaring that our free institutions and constitutional guarantees are not the products of accident, but growths of the spirit of freedom that led the Pilgrim fathers to give up their worldly all and embark for the shores of America to establish homes and participate in the pursuit of happiness.

Success in Organization
"Organization is the keynote of success," she said, "and in the formation of an intelligent patriotic body of women lies one of the strongest safeguards for the maintenance of the institutions which we all cherish so much. The sooner we women learn that, unless we align ourselves with one of the two major political parties, we are political tramps, the better off we shall be, and likewise our government," she declared.

The speaker hurled an unexpected bomb into her address when she openly asserted that the international peace movement has become so permeated with radical and Bolshevik propaganda that it is today the tool of radicals of every description. She finished by explaining that one of the principal aims of the Republican women's movement is to combat alien and radical propaganda.

The only other scheduled speaker was J. P. Baumgartner, editor of The Register, who declared that the formation of women's Republican clubs would not only help the party, but work for the welfare of the country as well. He called attention to the fact that, long before given the ballot, the American woman was an important factor in the nation's political life. While her aims and desires at that time were not registered at the polls, they were nevertheless expressed through her husband and kinsmen.

School of Politics
He ventured the belief that the formation of women's political clubs will furnish their members a needed opportunity of familiarizing themselves with the work-

(Continued on Page 10)

LUMBERJILLS WORK IN LUMBERMILLS; CUT UP TIMBER HEWN BY LUMBERJACKS

MARSHFIELD, Ore., May 18.—Equal rights means equal work here. Where there's a lumberjack there's a lumberjill closely. Which means that the big Port Orford cedars which the lumberjacks cut down are cut up by the lumberjills, who are for the most part

wives or sweethearts of the 'jacks. The war introduced 'jills to the lumber camp, but peace has not taken them away. Instead, the employers are getting to like the 'jills more and more every day.

The 'jills wear flannel shirts and breeches, jacks and jills doing the same work get the same pay; and that is an inducement which attracts scores of school teachers during vacation time. All this the men don't mind—but they do complain that they can't cuss as much as they used to.

THIELE RESIGNS AS MANAGER OF ST. ANN'S INN

Received with expressions of regret throughout local club and business circles, was the announcement today that Theodore B. Thiele, manager of St. Ann's Inn, and widely known hotel man, has resigned his position with the hotel company.

Thiele, who succeeded Noah W. Gray, as manager, when the latter resigned six months ago, has been connected with St. Ann's Inn for more than two years. Since he was promoted to the position of manager, he has received several tempting offers, and he leaves Santa Ana to accept an attractive position with one of the largest hotel concerns in the country. It is understood that, in his new position, he will manage a large tourist hotel, catering to high-class patronage.

The retiring hotel official is well known in hotel and travel circles throughout the country, having held various important positions. For a number of years, he was general manager of the Territorial Hotel company, of Hawaii, operating the fashionable Moana hotel on Waikiki Beach, the equally exclusive Seaside hotel, on the Honolulu beach, the Royal Hawaiian hotel, and the Alexander Young. He has also been connected with the Del Monte hotel, Monterey; Byron Hot Springs hotel, and other resort and tourist establishments.

ANCIENTS BANNED IDLER
ROME, May 18.—"No loafing" signs were inscribed on the walls of the taverns of ancient Pompeii. A translation of the inscription is, "Lingers, depart; this is no place for idlers."

Varied Program Is Arranged for Junior Chamber

The program for tonight's dinner meeting of the junior chamber of commerce at Ketter's cafe will include a motion picture showing the manufacturing of valves, a song, "Politics," by Major Anderson, selections by a "mystery" orchestra, numbers on a steel guitar by Dorothy Belle Robinson, and vocal and instrumental numbers by Ray Simpson.

The committee in charge of the gathering this evening consists of Charles Swannor, chairman; George Wheeler, M. S. Robinson, H. L. Budding and Carl Sargent. The meeting will start promptly at 6:30 o'clock.

First steps in the formation of athletic teams within the chamber were taken Saturday when a sports questionnaire was sent to each member of the organization. By this method it is expected that the most popular games will be determined and teams will be organized accordingly. Walde Anderson is chairman of the committee in charge.

Sports listed on the questionnaire are golf, bowling, tennis, baseball, football, volleyball, basketball, indoor baseball, horseshoe, tossing and polo.

Members are urged to either mail or bring the questionnaires at once to Anderson at 310-12 North Broadway.

FALL'S INDIAN POMPEII.
THREE RIVERS, N. M., May 18.—The ruins of a buried Indian village have been found on the ranch of former Secretary of the Interior Fall, near here. Archaeologists are now excavating the ancient town.

JUST HAVE TO SWAT.
LONDON, May 18.—British scientists recently almost lost their lives in experimenting with "Lewistite," a poison war gas in a closed room, but it had little effect on several common house flies which happened to be in the laboratory.

UPKEEP OF PLANES
WASHINGTON, May 18.—Army estimates show that it costs from \$400 to \$3000 a year to operate an airplane.

NURSE WAS SICK

Had Become Nervous and Lost Strength, But Took Cardui and Now Feels Fine.

Cape Girardeau, Mo.—Mrs. Kate Hunze, of 1017 Harmony St., this city, is a practical nurse of long and valuable experience. "I read of Cardui and decided to try it. It did me good after two bottles. I was less nervous and seemed to have more strength. I ate, my appetite was so good, until one day my husband laughingly said, 'You will have to let up on the Cardui.' And what I ate, too, seemed to strengthen and help me. I improved and surely am glad I took it."

Thousands of other women have had experiences with Cardui similar to that of this practical nurse. They have found that the tonic effects of its purely vegetable ingredients were just what they needed to help restore their appetites, to bring them easily and naturally back to normal health and strength.

Take **CARDUI** THE WOMAN'S TONIC

ALL READY FOR WATER MEETING AT PLACENTIA

Arrangements were complete today for the meeting at Placentia tomorrow night, at which time William Mulholland, builder of the Los Angeles aqueduct, will be the main speaker on the subject of Southern California water conservation. Secretary Charles Lee, of the Placentia Chamber of Commerce, said today he expected 600 persons to attend the meeting, which is to be held in the Placentia grammar school auditorium.

Secretary Lee said he scratched the talk on Orange county harbor from the program in order to devote the entire time to discussion of water conservation problems. Bernard Moody will open the meeting with a short talk on the Boulder Dam project, illustrating his remarks with lantern slides. Mr. Mulholland will follow. Others expected to speak are Congressman Phil Swing, State Assemblyman S. C. Hartranft, State Senator Chester M. Kline and S. C. Evans, mayor of Riverside.

The Orange county board of supervisors will attend in a body. Lee said Col. W. S. Finley had advised him. A. H. Lake, of Garden Grove, president of the Orange County Associated Chambers of Commerce, estimated that 100 members of that organization would attend, according to the secretary.

A feature of the meeting will be the discussion after the talk by Mulholland, at which time auditors will be allowed to ask him questions concerning the matter under discussion, Lee said.

Music Pupils In Recital Tonight

TUSTIN, May 18.—Music lovers in Tustin will be given a treat this evening at the Tustin Union high school when pupils of Miss Mildred Marchant, pianist, and whistler, will appear in recital which will start promptly at 7:30 o'clock.

Among those who will be heard on the program in whistling and piano numbers will be Alta Fisher, Wilda Kellams, Audria Fey, Margaret Rust, Evelyn Walker, Ruth Weiss, Edgar Pankey, Hugh Walker, Gertrude Pollard, Catherine Ahrens, Eleanor Leiby, Muriel Lambert, Ned Hatch, Beulah Joiner, Wilma Hatch, Mildred Pyatt, Marion Leiby, Thelma Johnson and Adahurth Ellis.

HONOR ORANGE MAN AT STATE MEETING

ORANGE, May 18.—Cyrus A. Palmer, of this city, former grand warden of the California Odd Fellows, was named Friday, at the annual convention of the organization, in San Francisco, as deputy grand master.

BONFIRE OF MILLIONS
ROME, May 18.—A huge bonfire of 100,000,000 lire in bank notes recently marked the inauguration of the new governmental policy of reducing the circulation of paper money.

Radio supplies at Hawley's.

TOURISTS OPEN SUMMER'S RUSH TO CALIFORNIA

Extra Sections of Trains
Required to Transport
Throng to West Coast

A veritable tidal wave of tourists is rolling into Southern California this week, following the opening of the out-west summer excursion rates, which became effective May 15, according to advices received by Harry Baade, local passenger agent of the Santa Fe railroad.

Indicative of the heavy westward travel was the train movement last Friday and Saturday, when not less than 16 sections of the California Limited left Chicago, besides several extra sections of other standard trains, carrying for the first two days several thousand tourists and homeseekers.

"From all indications," declared Baade, "the travel to California this summer is going to be better than last season, which is attested by the heavy bookings at our Chicago and other offices in the east. The good agricultural, financial and other conditions in the middle west and eastern states, are having a very marked effect on California-bound travel."

BURGLARS LOOT 2 LOCAL HOMES OVER WEEK-END

Burglars who entered the house through an unlocked rear door, looted the home of H. E. Yost, 2422 Santiago street, last night, while the family was away, according to a report made to the police today. Clothing valued at \$375 was taken.

A man and a woman are being sought in connection with the burglary by the police, who discovered footprints in the soft dirt around the house. An overcoat, valued at \$100, a fur neck-piece, valued at \$125, skirts, a coat and a handbag were among the articles taken.

One who visited the home of C. S. Sherman, 607 Fruit street, Saturday night, took a brown leather cowhide purse, valued at \$25, according to a police report. Entrance was gained through the rear door.

SHORTRIDGE PAYS VISIT TO SANTA ANA

U. S. Senator Samuel M. Shortridge, of California, and son, Samuel M. Shortridge Jr., were guests at St. Ann's Inn yesterday. The noted colon, who ranks high in the councils of the Republican party, is visiting Southern California for the purpose of obtaining first-hand information on a number of public improvement projects necessitating federal legislation.

While here he conferred with a number of prominent officials and business men regarding Orange county projects, the tariff question, transportation and freight problems, and other matters affecting the economic interests of the county.

Senator Shortridge is one of the members of the upper house who has consistently supported the Orange County Harbor project.

Mother Asks She Be Awarded Child

After pursuing her estranged husband from California to Indiana, where she says he fled with their child in order to get beyond the jurisdiction of the California courts, Mrs. Louise Tindall, who was successful in the east in regaining possession of the child, today asked the superior court to award custody to her and prevent repetition of the husband's alleged action.

Glenn M. Tindall, the husband, is named defendant in the suit, which was filed through Attorneys Scarborough, Forgy and Reinhardt. Glenn Jr., aged 2, is the tiny "bone of contention" between the couple.

When a dispute arose between them over possession of the baby, Tindall settled it last April by taking the boy and leaving for Indiana, according to the complaint. Mrs. Tindall refused to accept defeat. She followed and brought her son back to California. Now she wants the courts to settle the affair. She is financially able to provide a home and education for the child, she states, and asks no help from the father.

ACID-THROWING FLAPPER MAY BE FREED FROM JAIL

Here are Darby Day Jr., scion of Chicago capitalist, and his flapper bride, Mrs. Bernice Lundstrum Day. The bride has been convicted in Los Angeles of throwing acid in her husband's face and has been sentenced to one to 14 years in San Quentin. Her attorney hopes to get her out of jail, pending an appeal for a new trial.

CONFER ROYAL ARCH DEGREE ON CANDIDATES

With members of the order present from all parts of the Southland, the Royal Arch degree of Masonry was conferred on three candidates Saturday afternoon in a natural amphitheater, located in San Diego canyon, six miles northeast of Orange.

A group of grand officers, including Charles H. King, Sebastopol, grand high priest; Daniel Richards, San Francisco, grand lecturer; Albert McLees, San Diego, deputy high priest; Rudolph Beck, Oxnard, past grand high priest; E. B. Spencer, Los Angeles, past high priest, and Arthur Cavanaugh, Sawtelle, deputy grand lecturer, were present.

The four Orange county chapters, Santa Ana, Anaheim, Fullerton and Orange were in charge of the ceremonies, which started at 2 o'clock and lasted until 4:30.

Royal Arch Masons from San Diego, Long Beach, Los Angeles, San Pedro, San Bernardino and Glendale were present for the degree work, luncheon was served. It is hoped to hold a similar ceremony each year, Carl Kaufmann, high priest of Santa Ana chapter, said today.

Reelect O'Neal Exchange Chief

SANTA BARBARA, Cal., May 18.—Louis O'Neal, San Francisco, was reelected president of the California Exchange club Saturday, defeating Lewis H. Smith, Fresno, by a close vote.

The delegates spent the afternoon as guests of the Yacht club and concluded their annual get-together with a dance at the Arlington Hotel.

Dr. George Sabich, Bakersfield, national president, made the main speech of the conference, reviewing the work of the National Exchange club in health development and prevention of cancer.

SCOUTS TO HAVE EXHIBIT AT FAIR

The Boy Scouts will have the usual exhibits at the county fair here in September, and in addition will act as guides at the fair, it was stated today by Roland E. Dye, scout executive.

Ample space will be reserved for scout exhibits and many individual and troop premiums will be awarded, Dye says. "The fair committee is most enthusiastic over Boy Scout participation at the annual county fair," said Dye today. "The scouts are only too glad to help make the fair a success, and they feel that they have real friends in the fair organization."

Phonographs repaired. Fix-it Shop, 105 E. 3rd. Phone 2520.

NEW HIGHWAY TO BE THEME OF GATHERING

The Greater Manchester Boulevard association will hold a mass meeting this evening, in the Buena Park school auditorium. Keen interest is being shown by residents of both Los Angeles and Orange counties in development of this 100-foot paved highway, which is planned to extend from Playa del Rey to Santa Ana and on to San Diego.

Already assured through Los Angeles county, interest centers on northern Orange county, as to where it will traverse.

With the guarantee of more than 51 per cent of the right-of-way secured through Buena Park, Anaheim and Fullerton are putting forth every effort to a claim on this highway. According to the plans from the regional planning commission of Los Angeles county, it is hoped to follow a direct line to Santa Ana 450 feet north of the Southern Pacific, with connections for Fullerton and the Santa Ana canyon.

To establish a definite program in Orange county, representatives from all sections of the county are expected at Monday's meeting.

Hugh Pomeroy, secretary of the regional planning commission, of Los Angeles county, will be the main speaker of the evening. The board of supervisors will also be represented. Secretary George Raymer, of Fullerton, expects a delegation of 25 or more from his district. Secretary George Reed, of Anaheim, will bring 50 from there, and with Orange and Santa Ana as other communities represented, a lively meeting is anticipated.

Los Angeles county, headed by Sam Dudley, who will preside at the meeting, will bring a delegation. Secretary George Reed, of Anaheim, will bring 50 from there, and with Orange and Santa Ana as other communities represented, a lively meeting is anticipated.

NEBRASKANS WILL MAKE HOMES HERE

Not less than nine families from Fremont, Neb., have already taken steps to dispose of their property holdings in that city for the purpose of making Santa Ana their future homes, according to Frank Koss, partner of the K-B Drug company, 615 North Main street, this city, who has just returned from Fremont, his old home town.

Of this number, two families will arrive in Santa Ana within the next three weeks, and the remainder will reach here as soon as they have completed sales of their property.

Koss said that the intending residents include two lawyers, one broker, one physician, one newspaper man and four retired business men.

In addition to this number already making preparations to come here, at least 12 more families are planning to settle in Orange county, Koss said.

Ladies are invited to attend McFadden's Free Cooking School tomorrow, 2 to 4 p. m.

ORANGE SHOW AT ANAHEIM PROMISES TO BE BIG EVENT

Valencia Growers Select
Best Specimens of Fruit
For Fifth Annual Exhibit

COMPETITION KEEN
FOR PRIZE AWARDS

Revue of Orange County
Bathing Girls Will Be
Feature of Final Day

With the seasonal harvest of valencias well under way, Orange county growers are busy with the task of selecting the most magnificent specimens of the summer orange for display in the fifth annual California Valencia orange show, to be given May 22 to June 1, in a permanent exposition park in Anaheim.

Substantial cash prizes, in addition to cups and embossed certificates of award, are offered exhibitors of valencias in more than 20 classifications of the fruit, and competition among the growers is keen.

Promise Unusual Displays.
In view of the quality evidenced by the fruit of the region this year, visitors to the show will see the most magnificent display of the thin-rind orange ever assembled. In addition, great interest is being shown in the grapefruit, lemon and avocado and semi-tropical sections, and notable exhibitions are promised in each class.

The citrus division of the show will include a score of huge displays entered by chambers of commerce and orchard associations of the Southland, both fixed and animated, and the entire wall of the citrus salon, 130 by 250 feet, will be lined with a rack display of fruit, comprising one continuous exhibit 750 feet in length, representing practically every grower in the California.

Farm Bureau Day.
A notable feature of the show will be the celebration of "Farm Bureau day," on May 28, when officials of the extension division of the University of California will present in afternoon and evening, illustrations of the latest advances in the practice of citrus culture.

Each day of the show is dedicated to an organization or district, and a special program of entertainment, both afternoon and evening, is being arranged.

Great interest is manifested in the Orange county bathing girls' revue, on June 1, the last day of the exposition, when the fairest maids of the district will compete for substantial cash prizes in displaying the smartest of 1925's modes in bathing attire. Applications for contest are being received in numbers by F. B. Harden, of Anaheim, bathing revue manager.

SECOND BAPTIST CHURCH RALLY

Sunday, May 24, at 2:30 p. m. The Second Baptist Church (Colored) 1808 W. 8th St., will have a Rally, at which time Dr. F. T. Porter, pastor of First Christian Church, will preach. Rev. G. W. Hill, pastor, for the first time is making a special appeal to the churches of the city, through their pastors, to be represented in this rally.

Please bring or send a donation. Address all communications to the pastor, G. W. Hill, 1808 W. 8th St., city.

Last Chance

Pictures 7; Vaudeville 8:30;
Pictures 9:30

Stage and Screen

Patrons of Walker's theater will receive a real treat tonight and tomorrow night when Santa Ana's well known lyric soprano, Hazel Landers Hummel, with the support of an instrumental and vocal male quartette consisting of Maurice Waug, R. S. Briggs, Verd Napier and Ed Hummel will present a most colorful prologue for the picture "Pampered Youth," adapted from Booth Tarkington's prize novel, "The Magnificent Ambersons."

Special lighting effects, a beautiful setting, harmonious voices make of this a delightfully entertaining offering that is bound to be appreciated by every one.

Additional vaudeville numbers are on the Walker program.

"PAMPERED YOUTH" NOW AT WALKER'S

"Pampered Youth," which is showing at Walker's theater, is a screen adaptation of Booth Tarkington's famous novel, "The Magnificent Ambersons." The novel won the Pulitzer prize in the year it was published as being the best novel of the year to represent the wholesome atmosphere and the high standards of American manhood. While writing this story the author wrote a friend that he was trying to dig deeper than ever before, and to present something worth while in a literary way.

"LIGHTHOUSE BY THE SEA" CLOSES TONIGHT

Any picture in which Rin-Tin-Tin, the famous Warner dog star appears, is always a delight, but "The Lighthouse by the Sea," which closes at the Yost theater tonight, proved a rare pleasure because of Louise Fazenda, the popular comedienne of the movies, who plays the leading female role.

Rin-Tin-Tin and Miss Fazenda are the pivot around which the whole exacting photoplay revolves, from the majestic drama of the sea, against which the story is set, to the bitter struggle between revenue officers and an unscrupulous band of bootleggers, operating along the coast that is lit up at night by the lighthouse that thwarts evil plans.

"Euterpe," Collier Jr., Matthew Betz, Douglas Gerrard and Charles Hill Malles support Rin-Tin-Tin and Louise Fazenda in this screen version of Owen Davis' stage success.

The picture is admirably directed and mounted, while the absorbing flow of the story carried the audience along with it, faster and faster, until the climax finished the tense, exciting picture and everybody dropped back into their seats, well satisfied with an evening thoroughly enjoyed.

DOUGLAS M'LEAN'S LATEST AT WEST END

"Introduce Me," Douglas MacLean's new screen comedy which had its initial performance at the West End theater last night, cannot be compared with any other MacLean picture.

It is so much superior to anything this bright and youthful star has ever given to the screen that other MacLean successes cannot even be mentioned in the same review.

If you have never laughed at a movie before in your life you will laugh at "Introduce Me." The picture has a delicious vein of humor, laughs which come with gasping suddenness, a beauty of background and a finish in its technique which will make this photoplay historic in the development of the American screen farce.

ELECTION DAY IS VICTORY DUE TO ORGANIZATION

(Continued From Page 9.)

ings of party government and organization. By attending meetings and discussing matters as they are presented for consideration, they will soon become more conversant with the big issues which are facing the country and demanding solution. Moreover and equally important with respect to political efficiency, they will learn how to play the game of politics.

"By nature women seek the best there is in government, and the political party that appreciates the fact that there is an upward trend in political thought, with higher ideals, and acts accordingly, will become the dominant party," he declared.

Wide Sphere of Activity
"There is no limit to which the women may go into the political field. By adopting a platform, saying that there shall be no more war, they would represent a tremendous force for the preservation of peace," the editor observed.

A touch of local color was introduced in the proceedings by S. M. Davis, local attorney. When called upon by the chairman, Mr. Davis directed attention to the disgraceful spectacle presented by the bootlegging interests in openly defying the government by the operation of rum fleets along the Orange county coast. Vigorous participation on the part of women in public affairs and party government would put a stop to such open defiance of law and authority, he remarked.

Mr. Davis also vigorously expressed the opinion that women in politics could do much to forward the peace movement. He concluded by declaring that parties cannot live on dead issues.

Others to voice their approval of the undertaking were City Attorney Z. B. West Jr., District Attorney A. P. Nelson, Attorney A. W. Rutan and Assistant District Attorney Charles N. Mozley, all of whom responded briefly to the call of the chair.

NAME OLIGER TREASURER OF AERO LEAGUE

A. L. Olinger, secretary of the Santa Ana Chamber of Commerce, was made treasurer of the Western Aero League, organized in Santa Barbara Saturday, at a conference of prominent airmen of the state, held for the purpose of further developing civil and commercial aviation.

Other officers were elected as follows: Dr. T. C. Young, of Glendale, president; Earl Ovington, Santa Barbara, vice president; Howard I. Wood, Glendale, secretary. Dr. Young is a licensed aviator and has several planes.

Ovington was the first aviator in America to carry mail.

"The organization will have a membership composed of aero organizations, air lines, aviation fields, chambers of commerce interested in furthering aviation, airplane manufacturers, allied industries, aviators and others interested in aviation," Olinger said.

"It is planned to have standard landing fields in every community in this section of the country in order to insure safe flying from city to city. The organization also will have a map department showing all landing fields in and around the Pacific coast states."

The next meeting of the organization will be held at Ross Field, Arcadia, on Saturday, June 13.

WAS TREE HIS TOMB?
HAMBURG, Ia., May 13.—The bones of a man and several small coins, dated in the '50s, were recently found in a hollow tree near here. It is believed a pioneer hid in the tree to escape the Indians and then could not free himself.

Tortured for years by varicose veins
Trouble entirely healed by Resinol

Chicago, Ill., Oct. 23:—"I had suffered from varicose veins for 2 1/2 years and had doctored continuously without results as I could not keep off my feet. The pain was so great that I could not sleep and I cried at night until I was completely exhausted. My hair was turning gray and I thought I would lose my mind. Last summer my son had a sore on his chin and Resinol healed it, so I decided to try it myself. In little less than a week I obtained relief and in six months time the trouble was entirely healed. I cannot tell you how thankful I am—I am the happiest woman in the world and I owe it all to Resinol." (Signed) Mrs. Gussie Newman, 2424 Orchard St.

BOOTH TARKINGTON'S PRIZE NOVEL "The Magnificent Ambersons"

Picturized Under the Name

"Pampered Youth"

With a Great Cast of

ALICE CALHOUN, ALAN FORREST

CULLEN LANDIS, BEN ALEXANDER

Every Booth Tarkington novel is a best-seller. "The Magnificent Ambersons," the story from which "Pampered Youth" was adapted, won the Pulitzer Prize of \$1000 as the great American novel of the year in which it was published.

A love story that grips and holds because it's about real human folks in a real every-day setting.

SLAYS FOR \$10

REAL WET WORLD

Frank Weller, 60, La Grange, Ill., hammered and chopped his wife to death because she would not give him \$10 to buy liquor. Weller readily confessed. Police arrested Mike Portner, also on a murder charge, who is said to have sold liquor to Weller.

This was a wet "world" until police noticed its peculiar equator. Examination revealed that the northern hemisphere was detachable and that within the globe was an oasis—a liquor cache. Theoretically, police say, this cache may be within the Volstead law as all intoxicants in the decanter were below the equator.

Grasshoppers ascend mountain heights to 18,000 feet.

S. A. SCHOOL NEWS

Julia Lathrop

Drama Club.
Miss E. Anderson's Drama club entertained the other groups last Friday in the English room. The program announced by Beth Westcott consisted of a piano solo, "Polish Dance," Ruth Breckenridge; trio, "Bygones," "Once Upon a Time" and "Wyoming," Joan Fairfield, La Verne Travis and Florence Magill, accompanied by Teresa Bement; reading, "Hah-ah, Not Me," Irma Bean; minstrel show, endmen, Roger Hearn and Clarence Siddoway; ballad singer, Frank Hilligass; circle, Jack Bean, George Horton, Jimmie Cooper, Washington Jones, Edward Sugden and Vincent Dixon.

A Trip.

The business training class No. 1, of Julia C. Lathrop school visited the First National bank, recently with Mrs. Webber, the teacher. Mr. Hanson directed the class through the different compartments of the bank, and carefully explained each one.

The members of the class were Pablo Avila, Ruth Baker, Howard Bear, Mildred Cooper, Maise Croghan, Leonard Dookins, Charles Doherty, Evelyn Dysart, Harper Goff, Francis Griset, Paul Gustin, Gladys Hale, Roger Hearn, Frank

Hilligass, Margaret Hickey, Myrtle Illingworth, Herbert Jackson, Clifford Kent, Dowl Kingrey, Ruth Kottman, Vivian Larson, Ernestine Lemon, Arthur Mitchell, Maxine Moomaw, Elizabeth Nicholson, Alvin Price, Kenneth Prince, Van Pomroy, Harold Rector, Clarence Siddoway, Carroll Stewart, Mildred Thompson, Robert Tucker and Newell Vandermast.

Ernestine Lemon.

The Hiking Club.
The Hiking club had a very interesting trip to The Register of Rice last Friday.

The small club of twenty girls enjoyed the trip very much; it proved to be one of the most interesting trip to The Register of Rice.

Operetta.

The presentation of the operetta "Windmills of Holland," given by the Girls' and Boys' Glee clubs with the help of Miss Cornell's chorus class, is being eagerly looked forward to. The practicing is progressing nicely and if you do not go, you certainly will miss an evening of rare enjoyment.

The characters are very well chosen; one of the most interesting is the part of Mynheer Hertogenbosch taken by Clarence Siddoway. In the operetta, Clarence, like Old Rip, is always nosing into other people's business and one of his pet sayings is, "Vol is it?" We are glad to see that, strange to say, he seems to have a good opinion of himself. The two boys, Hans (Roger Hearn) and Frans (Howard Bear) are, as usual, handed the mitten by two girls Wilhelmina (Ferdina Peters) and Hilda (Henrietta Scheffer). They find out that it is not so easy to find another sweetheart. The others taking important parts in this operetta are Frau Hertogenbosch (Ines Willson) and Bobankee (Frank Hilligass).

We hope to see you all out May 23 as this is going to be one of the best ever put over by the Glee Club and Chorus classes of Julia C. Lathrop.

Honor Society.

A meeting of the Honor society was held in the music room, May 6, 1925.

A very enjoyable program was given although it was extemporaneous. It was as follows:

Vocal duet—Eugenia Gilbert and Eva Dean Caskey.

Piano solo—Mary Elizabeth White.

It was decided that a meeting be held Wednesday, May 13, between the Honor societies of this school and Frances Willard. A twenty minute program will be given by each school after the business meeting.

P.T. A.

May 19, 1925, at 3 o'clock, the millinery club, sewing and cooking classes of the school will give, for the pleasure of the P.T. A. and mothers who are not members, a final exhibition of the term's work.

The little exhibition is in the form of a fashion show entitled "The Dream Girl." It is to show the work which the classes have accomplished during the term, and to arouse the interests of the parents to a further degree, in the school life of their children. All who would be interested in the quite unique exhibition of these three departments, are welcome to come and comment, criticize, or praise our work.

I. X. L. Club.

The organization of the boys was perfected in September, 1924, and the name I. X. L. club adopted. "Put Lathrop First" was the motto chosen and the purpose of the club was expressed in the constitution as follows:

"The object of the club shall be to express at all times the ideals of true boyhood and to keep physically strong, mentally awake, and morally straight at all times."

The boys showed their efficiency in assisting the Every Girls club to feature the school fair last fall which was a great success.

The boys showed very good spirit and cooperation in greeting the new boys at the party the first of the semester.

The recent disbursements have been for seats for the athletic field and for mirrors for the boys' dressing room.

The present officers are: President, William Dugger; vice president, Walter Jordan; secretary, Jack Rimal; treasurer, Alfred Parks; reporter, Vincent Dixon; sergeant-at-arms, Charles Dobbie; yell leader, Don Smith.

WEDS RICH YOUTH

To bob or not to bob never worried Miss Bess Gilbert, University of Texas campus sorority leader and said to be one of the prettiest coeds at the school. She has just married Frank Kemp of Wichita Falls, ex-son of the Texas railroad king.

Frances Willard

The Fair May 21-22, Afternoon and Evenings
"On going to press"—a few days before the great fair of the 21 and 22, names signed up for entries are:

Antiques and Curios, Viola Stafford, Vivian Herr, Boss Simmons, Helen Hamilton, Robert Northcross, Chester Cook, John Hoy.

Foreign Dress, Helen Slabaugh, Rodney Yould, Kathleen Barr.

Stamps and Coins, Glenn Shaw, Rodney Yould, Jose Ojeda, Vivian Herr, Robert Cline, Sherrill Spurgeon, John Hoy.

Rabbits, Lucille Erskine, Gertrude Avas, Teddy Roth, Asa Herter.

Lizards and Turtles, Robert Northcross, Frank Mansur, Rodney Yould.

Chickens and Ducks, Gladys Van Horn, Elizabeth Roehm.

Plemons, Eugenia Davenport, Richard Robbins.

Dogs and Cats, Miss Biggin, Herbert Sammis, Edwin Gilliland, Elizabeth Roehm, Vivian Ladd, Eugenia Davenport, Ralph Lessinger, Walter Wilson, Mildred Paul, Viola Stafford, Mamie Sue Hill.

Art and Statuary, Birdie Jackson, Mary Hilton.

Boats, Handwork, etc., Forbes Freeman, Frederick Hermon, Mary Hilton.

Campfire Materials, Bobby Goodrich.

Spider's Trap Doors, Chester Cook.

Ore from Gold and Silver Mines, Georgia Gail Pennock.

Swimming Party

The baseball boys enjoyed a swimming party at Long Beach last Monday afternoon. Seven cars left immediately after school and all the boys were enjoying the swim by 4 o'clock.

The 9th grade relay team defeated the 8th grade team by a fraction of a mile in an exciting relay race.

Mr. Kellogg fell into the water and got his bathing suit wet. After the swim we "did the pike." The boys seemed to enjoy "Fun House" more than anything else, and we hear that the pike was completely out of ice cream when we left.

For particulars about the "Fun House" see Marvin Johnson, Charles Webber, or Oliver Halladay.

Enjoying the trip were Kenneth Early, Robert Ashton, Warren Sullivan, Russell Sullivan, Woodrow Covington, Ernest Velarde, Oliver Halladay, Ernest Smith, Emmitt Rink, Russell Goetting, H. C. Rutledge, Harmon Howard, Wylie Carlye, Rolfe Vinzant, Jerome Prylie, Edward Shepard, Roy Mullens, Homer Norris, Earl Homan, Fletcher Buxton, Marvin Johnson, Johnston Haddon, Clarence Eddy, Malcolm Gibbs, Lee Gross, Mr. Kellogg and Mr. Archer enjoyed the outing with the boys.

Honor Society

The Honor society of the Julia Lathrop entertained the Honor society of the Frances Willard school at their school last Wednesday afternoon. They furnished part of the program and some was furnished by Willard pupils.

Following the assembly program light refreshments were served.

CLUB NOTES

Commercial Club
Since the Commercial club has been organized the members have learned more about different business methods of many different lines. We have also enjoyed some interesting and worthwhile trips.

Miss Briney deserved much credit as the commercial club teacher because she has made each meeting interesting and valuable. The members are all sorry that a week ago Friday was the last meeting and we hope that there will be another such club next year which is as well organized and well led as the Commercial club of '25.

Scrap Book Club
The scrap book club held their last club meeting during school hours on Friday, May 8. The girls were surprised with a party given by Miss Fitz who served ice cream and wafers. The girls gave a yell for her directed by Evelyn Morrison.

After the party the girls made an A. B. C. book which they are planning to give to the Day nursery. Before school is out the club expects to visit the woolen mills which will be a very interesting trip. They plan to finish their scrap books during meetings which will be held after school. Everyone in the club has enjoyed the past meetings and wish they were to continue.

Ruth Smith.

Special Assembly
Last Thursday an interesting assembly was given by the Music Club. It was a pay assembly and the money received will be added to the music club treasury. It was a splendid assembly and well worth the price. The furniture was loaned by the Chandler Furniture company.

Every Girls' Assembly
The 4a girls entertained the Every Girls' club with a splendid program last Friday during the regular assembly period. After the business meeting several entertaining numbers were enjoyed. Frances Alsop took the part of a little girl in her home listening to a radio program which was as follows: A reading "When Yo' Daddy Comes Home" by Carnelle Swain; a number from the girls' quartet including Marguerite Lentz, Reta Martin, Adahuth Ellis, and Enid Bowles, accompanied by Dorothy Maroon; a pianologue "My Sister's Best Fellow" by Katherine Barr accompanied by Elva Cook; a reading "The Highwayman" by Dorothy Maroon; pianologue "Woes of a Boy" by Enid Bowles accompanied by Dorothy Maroon; piano solo "Tarentella" by Adahuth Ellis; a mysterious song by Helen Hendricks and Emma Tannenbaum; two songs by Miss Dorothy Smith of the faculty, Drigo's "Venetian Serenade" and "The Song of India."

The last number on the program was a short play "The Spanish Dancer," in which the following girls took part, Lillian Neuman, Carnelle Swain, Marguerite Lentz, Helen Hendricks, Margaret Waggener, and Helen Stein.

For the best in Cut Flowers and Floral Designs phone FLOWERLAND 2326.

Spurgeon

The high sixth music class of Spurgeon school under the direction of Miss Dorothy Carothers, put on a recital of two part songs, readings and orchestra music the afternoon of May 8, in celebration of music week. Parents, friends and school mates formed an appreciative audience and enjoyed the sweetness of tone and harmony for which the class is noted. Mozart's "Minnet" and "Old Black Joe" were especially appealing with the two part harmony.

Following is the complete program:

Songs—The Lambkins, "Fireflies," "Swallows" Evening Song, "The Catbird," "Lightly Row," "The Alarm Clock," and "The Bluebird." Music by the orchestra; reading, John Estes; "Cat Tails," Mary Du Bois; "The Walrus and the Carpenter," Alice Lamb; songs, "The Minnet," "Anvil Chorus," "O Worship the King," "Old Black Joe," "A New Kind of Fairy Tale," "The Star Spangled Banner."

A very interesting health program was presented at the P.T. A. meeting Thursday afternoon, on the front lawn. The green grass, vine-covered walls, and a background of palm branches served to make an appropriate setting for the program. Ten children from Miss Brecheen's fourth grade gave a group of health readings. Little John Brunner recited "He Wouldn't Use His Tooth Brush." "Children of Other Lands" were represented by 10 pupils from Miss Morgensen's class who told of health customs and habits of other children. They were dressed in costumes.

A health play, "From Danger Valley to Safety Hill," was presented by the high sixth grade and directed by Miss Blesener.

The characters in the play were as follows: "King of Good Health," Ralph Gordon; "Herald," Kenneth Kingrey; and "William Friend," "Mary, the child in Danger Valley," Harriet Vance; "Mother," Mary Du Bois; "Vegetables," Sadie Shields; "Spinach," Perry Jackson; "Beets," Robert Wendell; "Carrots," Acacia Manzo; "Potato," Hershel Donahy; "Bread," James Daneri; "Oatmeal," Lynn Chamberlain; "Butter," Carl Bower; "Fruit," Juanita Wallace; "Orange," Consuela Mendola; "Apple," Juanita Romero.

"Plum," Lodi Willis; "Raisins," Avery Hughes; "Peanuts," Francis

Bixler; "Egg," Norma Wilson; "Meat," Edward Miller; "Water," Alice Hanson; "Steak," Roy Lindsey; "Flour," Phillip Gerrard; "Fresh Air," Alberta Greene; "Sunshine," Alice Lamb; "Coffee," Dale Bore; "Sweet," Charles Stein.

The costumes were very clever and pretty. John Estes and Milton Arnold were stage managers. The advanced orchestra played several pleasing selections, William Friend and James Daneri played a violin duet.

Following the program the P.T. A. held a business meeting. The following officers were re-elected for next year: president, Mrs. E. C. Phillips; vice president, Mrs. Marshall Keeler; secretary, Mrs. H. C. Files; treasurer, Mrs. W. C. McFarren.

The chairman of the milk serving committee reported that since April 13, over 2000 bottles of milk had been served to the children. The ways and means committee, with Mrs. John Estes as chairman, served orangeade, and thereby added to their treasury.

Countless efforts have been made to reproduce the steel blue or grey-blue of old Irish glass, but none has been successful.

The collection of brains in the medical museum of Cornell University is said to be one of the finest in the world.

You Remove the Risk
We Remove the Dirt

Does your family play with dynamite?

The pan of gasoline used for washing in the home kills more people than "live" wires. Mothers, fathers and children are its victims. There may be a gas stove in the house, or somebody lights a match, or a piece of silk is rubbed in or near the fluid—then an explosion! Such fires mean almost certain death or disfigurement to someone.

Cleaning fluids used in the ordinary way almost always leave spots or discolorations on the garment. Wrung or drained out of the fabric, they always leave one edge partly soaked with grease.

Master cleaning does away with dangers and takes out ALL the dirt, CLEAR THROUGH the cloth. It looks better, lasts longer, leaves no odor, puts life into the goods and makes it wear better. The clothes are insured by us against fire and theft until they are returned. Send your cleaning to the Crescent Cleaning Co.

HOOKED TARPON MAKE FRANTIC STRUGGLES FOR LIBERTY

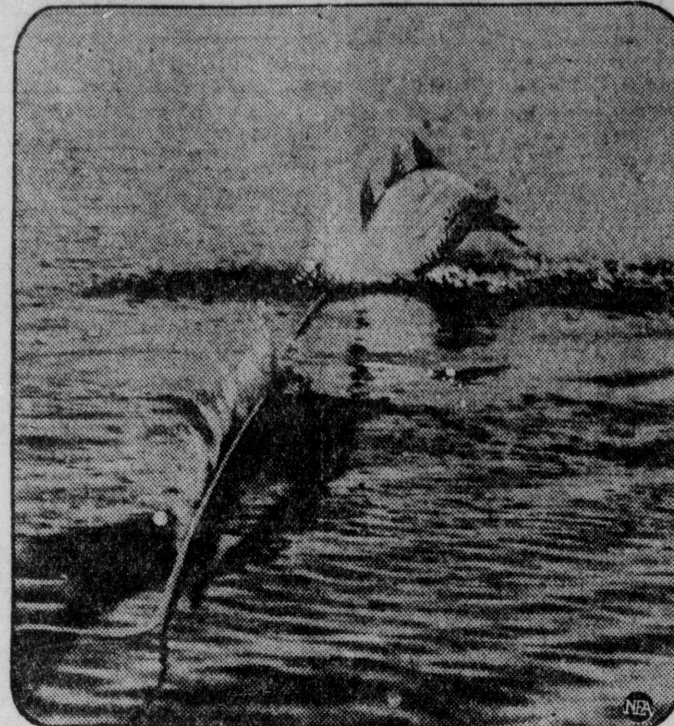

The first gigantic leap of a hooked tarpon. Mouth wide open, gills extended, head swelled up like a balloon, he leaps 18 feet in a frenzied effort to shake the hook from his mouth. Tarpon have been known to throw the hook from their mouths a distance of 50 feet.

At the height of his leap. Writhing in rage he shakes his mighty body in a vain effort to snap the line which holds him fast.

Like a terrier shaking a rat, this huge tarpon shakes his head just before hitting the water in a last effort to break the line. He puts all the strength of his 184-lb. body and all the skill of the cleverest game fish into his frantic endeavors.

Fighting, ever fighting, is the hooked tarpon. Sometimes they will play with the hook in their mouths for half an hour and then toss it out with a clever shake of the head, as did this wily fellow who is shown going back home with a great splash.

Louis F. Kramer, who set out from New York recently on a 10-year hike around the world to search for "truth" in every land, is shown here with his lone companion, Philo.

Several firemen were injured and property damage of \$1,000,000 was sustained when the city hall at Birmingham, Ala., was destroyed by fire. The public library, housed on the top floor, was a complete loss.

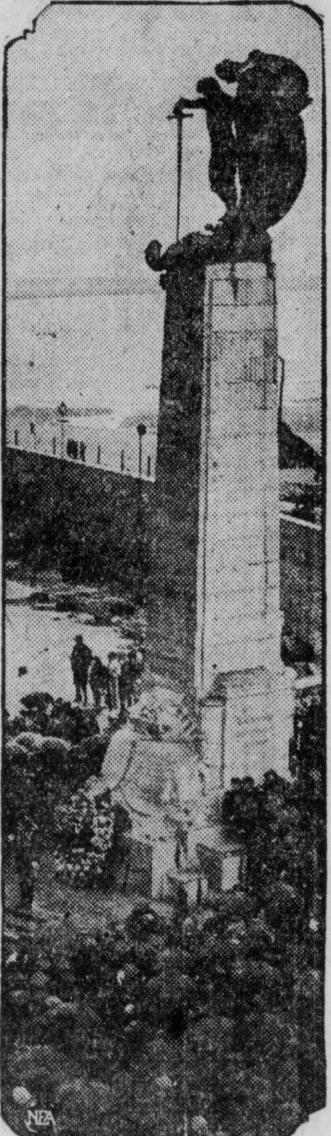

Mlle. Suzanne Bianchetti, famous beauty of Paris, is soon to arrive in America, where she has contracted to play the leading part in several big film productions.

In reports from England, it is said that Senator Marconi of wireless fame is to wed Miss Elizabeth Paynter, daughter of Colonel and Mrs. Paynter of Boskenna near Penzance, England. Here they are shown together.

Mrs. Reginald Vanderbilt was one of a party received at a recent levee held by the Spanish rulers. Mrs. Vanderbilt is shown in the costume obligatory on all attending court functions.

Here is shown King Albert of Belgium addressing the crowd on the occasion of the unveiling of the Zeebrugge memorial in commemoration of the British raid on the Mole during the World War. The memorial is a granite column 70 feet high, surmounted by a copper figure of St. George and the Dragon.

At least these iron workers, shown giving an aerial concert on the 22nd story of a New York skyscraper, evidently worked faster on account of their music, for they made a building record of 10 floors in 10 days.

Not one of these kids was born with a silver spoon in his or her mouth. But who are you—judge, doctor, lawyer, society leader, editor, manufacturer, banker, millionaire or plutocrat—that you would not trade place with any one of them? Dirty and ragged, yet healthy and happy. Look at their faces! They are enjoying what we have to enjoy but once in this life, the untrammelled freedom and joy of childhood, the one imperishable heritage of mankind. Here in this nameless group may sit a future president, a great world leader, a nobleman of God, a perfect mother. Much of their future depends on their physical well-being.

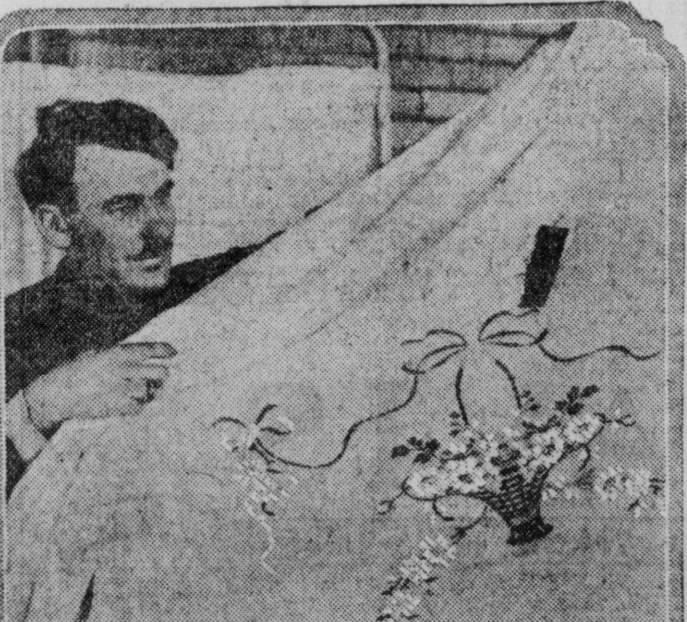

Poor Fifi doesn't have to stay home now in loneliness while his dotting mistress goes to the matinee. For one New York theater has provided a check-room where your pet dog or cat may be checked while you are enjoying the show.

Princess Dmitri Goltzine, formerly Frances Stevens of New York, is going to settle in England, where she will race her string of 22 horses, including the star steeplechaser, Sunshine. The princess is shown with two of her thoroughbreds, Sunshine on the right.

An interesting snapshot of a "header" in the Flapping Races at St. Buryan, Cornwall, England. The horse failed to clear a stone hurdle and landed on his snout while his rider was catapulted free. Neither were injured.

H. B. McDermott, bed-ridden for six years at a St. Paul (Minn.) hospital, won over 1000 Minnesota women in a fancy needlework contest. The winning piece was selected solely on merit, the judges selecting the work by a number system.

Clement F. Scully, of St. Paul, Minn., thought he was giving his children a treat when he brought a wild cub bear back from a hunting trip in Montana. But the cub escaped, took to a tree, and Scully had plenty of trouble getting it down.

Let Tanlac restore your health

If your body is all fagged-out and run-down, if you are losing weight steadily, lack appetite, have no strength or energy—why not let Tanlac help you back to health and strength?

So many millions have been benefited by the Tanlac treatment, so many thousands have written to testify to that effect that it's sheer folly not to make the test.

Tanlac, you know, is a great natural tonic and builder, a compound, after the famous Tanlac formula, of roots, barks and herbs. It purges the blood stream, revitalizes the digestive organs and enables the sickly body to regain its vanished weight.

You don't need to wait long to get results. Tanlac goes right to the seat of trouble. In a day or so you note a vast difference in your condition. You have more appetite, sleep better at night and the color begins to creep back into your washed-out cheeks.

Don't put off taking Tanlac another precious day. Step into the

WAR VETERANS OF 1898 PLAN PARK MEMORIAL

Twenty-nine of the gallant young men who marched out of Santa Ana on the morning of May 5, 1898, as members of Co. "L," en route to San Francisco to join forces of Uncle Sam organized for quashing the ambition of Spain to give the old United States a good trouncing, met yesterday at the reunion of the company at Orange County park, and appointed a committee to erect some time during the coming year, a monument to the memory of the troopers who have died since the Spanish-American war.

W. A. Greenleaf, G. P. Campbell, E. B. Collier, C. W. McNaught, M. C. Cooper and Robert Northcross were named as a committee to take charge of the details, which include financing, selection of a location in Orange County park, building of the monument and arrangements for a copper plaque to contain the names of the members of the company.

Preserve Names of Dead
A plaque made from the Maine already has been secured, and on this will be engraved the names of the dead, who are, Louis W. Baker, Guy W. Halladay, William E. Northcross, C. L. North, David Bush, Lee Carmack, Thomas Y. Dilley, George H. Magill, Edward N. Kuizenga, John Lowe, Frew W. Lutz, Alonzo Day, John Johnston, Perry O. Lyon and Linton Manuel. As discussed yesterday, the monument will be a large rock, placed on a concrete foundation. The big boulder will be brought in to the park from some point in Santiago canyon.

So far as is known to members of the company, the company is the only unit of the Spanish war veterans to hold a reunion annually, and it is said the attendance is larger than at reunions of other companies that are held once in a while.

With Charles Waffle and M. V. Allen in charge, the veterans yesterday enjoyed a splendid picnic dinner. Most of the members were accompanied by their families.

Following dinner, Col. S. H. Finley, as chairman, called the comrades together for discussion of the memorial project. It was recalled that the flag the company carried out of Santa Ana was presented to the company by citizens, the Honorable J. W. Ballard making the presentation speech. J. A. Turner raised the money to pay for the colors.

The company was halted on its march to the Southern Pacific depot and presentation was from an improvised stand in front of what was the Fairbanks drug store, adjoining the present entrance to the G. A. R. hall on East Fourth street. Efforts will be made to have Judge Ballard present at the reunion next year, when the monument will be unveiled.

Addresses Follow Dinner
At the informal gathering following dinner, addresses were made by Clyde Bishop and Lou Barrett, the latter now having direction of recreational parks in national forests in California and other western states.

There were a number of comrades present who had not met since the company was mustered out 26 years ago. The company did not see active fighting and never got away from San Francisco.

Present at the reunion were Col. S. H. Finley, C. W. McNaught, M. C. Cooper, D. D. Adams, W. A. Greenleaf, Robert Northcross, B. E. Johnson, G. P. Campbell, E. G. Glenn, J. H. Mefford, Clyde Bishop, E. B. Collier, Santa Ana; Glenn Talbot, Glendale; J. O. McGowan, H. P. Higley, Long Beach; L. A. Barrett, Belmont, Calif.; J. C. Ellis, F. S. Webb, Los Angeles; D. D. Field, O. S. Kurtz, Gary M. Field, M. V. Allen, C. E. Waffle, Orange; Charles E. Bowman, Tustin; C. W. Hannah, Hollywood; E. R. Bradbury, Huntington Beach; W. B. Powers, Pasadena; George K. Fox, Laguna Beach; W. W. Prichard, Anaheim.

Letters were read from J. J. Wilms, who is farming near Dallas, Tex., and A. R. Stedman, who is with a water company at Selma, Calif.

Grape Juice Is Stolen; Reward Of \$50 Offered

Thirty gallons of home-made grape juice were stolen from the basement of the home of Mrs. Esther Raymond, 610 East First street, Saturday night, according to a report filed with the police.

Mrs. Raymond offers a reward of \$50 for the arrest and conviction of the burglars and the recovery of the juice.

Entrance was gained by breaking a lock on the door. Two men, seen recently in the neighborhood, are thought by Mrs. Raymond to be responsible for the theft. A five-gallon jar of home-made preserves also was taken. The grape juice was in a 25-gallon keg, and a five-gallon jar. It was said to be valued by the owner at \$300.

TYPICAL YANK

Robert Muffler's father came from Germany in 1900. His mother came from Hungary in 1907. Now Robert is known as Philadelphia's most "typical American boy" to graduate from grammar school. A medal denoting the honor was presented him by the American Legion. The honor was awarded on qualifications of honor, courage, scholarship, leadership and service.

STARTS MYSTERY

Joanna Southcott started an age-old mystery when she left a sealed box concealed in the west of England at her death. After long years it seems now about to be opened. Only four people know where it is hidden, and it may be opened only in the presence of 24 bishops. The prelates say now they will attend.

Depth Finder

Perfection of a new sounding device especially designed for the speedy mapping of the ocean floor by means of echoes from the sea bottom, was announced to the American Geophysical Union, at a meeting in Washington, by Dr. H. C. Hayes, U. S. navy physicist and inventor of the sonic depth finder and other submarines signaling devices.

The new apparatus will be given a rigorous test on the U. S. S. Dallas within the next few weeks and is expected to displace the larger and more costly machines now in use.

The present sonic depth finder was not designed for survey work. Dr. Hayes explained, but was originally designed during the war as a means of finding the range of an enemy ship by triangulation. The idea of sending a sound to the ocean floor and determining the distance to the bottom by the time it took to receive the echo was conceived when he was unable to get two ships for experimental purposes as at first planned.

The application of the range finder to survey work was so promising, that it was never used for the purpose for which it was built. The new depth finder is similar in operation to the old, but is much smaller and cheaper, as well as more accurate. It is especially designed for survey work.

Dr. George W. Littlehales of the hydrographic office of the navy reported to the union that surveys by means of the original sonic depth finder are now being made by the battle fleet operating in the Pacific. These surveys are made in the ordinary course of the voyage and in the last year remarkable results have been obtained in many parts of the world.

Dr. Littlehales told of the discovery of a hitherto unknown bank in the supposed deep China sea by a ship equipped with this device. Another bank was discovered by a ship traveling from Gibraltar to New York, while another vessel quickly demonstrated the non-existence of a bank reported in the Pacific off San Diego, Calif.

SAFETY DRIVE IN CALIFORNIA P.-T.A. REQUEST

Enactment of legislation against obscene literature; a general revision in the system of distribution of films and magazines to allow theater owners and news dealers more latitude in selecting releases and publications suitable for their customers; establishment of adequate agencies for locating and taking care of needy blind children; and the launching of a state-wide safety traffic campaign accompanied by a vigorous drive against reckless motorists, are urged in resolutions adopted by the California Congress of Mothers and Parent-Teachers associations at their convention held last week in Fresno.

News of the action taken by the state organization was brought back by Mrs. J. Edmund Snow, who as president of the fourth (Orange county) district attended the state meet.

Work of the girl scouts drill reserve, boy scouts and kindred organizations were approved by the state body, Mrs. Snow declared.

The credentials committee making an official report on the convention attendance gave the following figures: 657 delegates, one national officer, 12 state officers, 12 state chairmen, 14 district presidents and 43 federation presidents present.

The Orange county delegation, headed by Mrs. J. Edmund Snow, president of the district organization, included the following members: Mrs. J. V. Kelsey, Garden Grove; Mrs. V. Day, Garden Grove; Mrs. H. L. Backs, Anaheim; Mrs. Ida Hughes, Anaheim; Mrs. H. E. Axup, Anaheim; Mrs. J. W. Bould, Westminster; Mrs. Floyd L. Benson, Katella; Mrs. Earl Morris, state chairman of committee on education, Santa Ana; Mrs. Mary B. Robertson, Santa Ana.

Care and training of children in the pre-school age, so as to fit them for study, and the training of young men and women for the serious responsibilities of parenthood, formed the keynote of the

convention proceedings, according to Mrs. Snow.

Some of the subjects taken up at the convention will be further discussed at a series of round table conference to be held in the county, and at the annual institute of the district P.T.A., to be held here next September. It was announced.

For thousands of years the merchandise going to Szechuan, China, with its 90,000,000 population, has been hauled through the rapids of the Yangtze river by sheer man power at the end of a 1000 foot rope.

In the vicinity of Canton Christian College on Honan Island, China, more than half of the land is given over to graves, and in many places they are so close that one can step from one to another.

Come and bring a friend to Moffatt's Free Cooking School, tomorrow, 2 to 4 p. m.

BICYCLES Repaired, sold. Fix-it Shop, 105 E. 3rd. Phone 2520.

Trade Your Old Tires for Goodyear Balloons

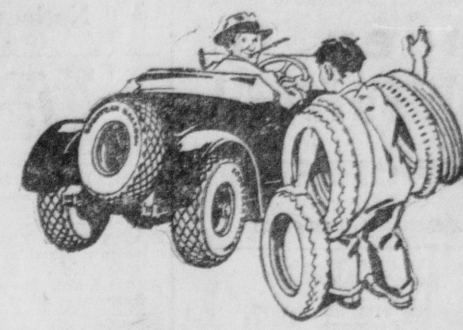

Now get us right, we are not in the tire trading business. We sell tires. But...we'll give you a mighty fair allowance for your present tires on Goodyear Balloons.

There's no reason to wait until later on and run the chances of trouble on the road.

Come around now—tomorrow—and take a look at these tough, hard-boiled Goodyears.

More plies of Goodyear Supertwist, more Goodyear rubber; famous All-Weather Tread.

(If you prefer high pressure tires—we'll take them on trade, of course).

Repair Them?
SURE!

Suppose one of your tires has given good mileage and then it has an accident—are you going to toss on the scrap heap all the rest of the mileage you have paid for? No—not if you bring that cripple to us. We'll give you satisfaction, and the cost—in miles—is way low.

HOW TO ANSWER BLIND CLASSIFIED ADS

In answering blind classified ads, (for instance, Box 35, Register, or other similar address), please be careful to use the proper address given in the ad. Write address plainly. Letters brought to the Register office do not require stamps. Always include your answer in sealed envelope.

T. F. (TILL) FORBID ADS
If an advertiser who has made application for credit and opened an account with The Register Publishing Company in the regular office desires to have any "blind" advertisement published, it must be accompanied by a "T.F." order to that effect. An advertisement without this order will appear regularly until countermanded by written order.

BOX OFFICE REPLY
The Register postoffice department is conducted for the benefit of patrons who wish answers to their questions. Advertisers are furnished with identification cards, which must be presented at the postoffice for the protection of our patrons. Replies are not given out except on presentation of box card.

No record is kept of the names and addresses of patrons using the Register postoffice, and therefore no information concerning these advertisers can be supplied. A charge is made for the words "Box A-34, care The Register."

Orange County Ideal Location for Many Industries

SEE FRESH ERA FOR INDUSTRY WHEN NEWPORT IS DEVELOPED

Direct Service By Water Is Expected to Accentuate Interest In County

NUMBER OF PLANTS STEADILY GAINING

Land Available at Reasonable Cost; Distribution Is Comparatively Low

By HORACE FINE

Orange county possesses many advantages for successful operation of industrials, and the rapidly increasing number of manufacturing enterprises locating here is evidence that executives are coming to recognize some of the advantages.

There are many things that enter into consideration of a location for a manufacturing plant, and Orange county is not lacking in any one item that spells success for a manufacturing enterprise properly financed and efficiently managed.

And while the county possesses numerous advantages, the further advantage of direct service through a port undoubtedly will be available within the next two or three years. It is believed that voters of Orange county next fall will approve a bond issue of \$1,200,000 for further improvements of Orange county harbor. The contemplated improvement will equip the port for handling ocean traffic, and when that is accomplished the problem of low freight rates will have been solved.

If it may be said that Orange county has one disadvantage as an industrial section, it is the differential freight rates as between a port and an interior point.

Orange county possesses what are said to be the best opportunities of any suburban section on the Pacific coast. It can offer low-priced sites consistent with low distributive costs—and distributive costs, even without the harbor, are not as excessive as at some other points inland.

Many Advantages
Products manufactured in Orange county have an advantage over north Pacific coast points in markets of Southern Nevada, Southern Utah, New Mexico, Arizona and southern California, and are on an equality in distribution with Salt Lake City and points north and east.

Both steam and electric railroads enter or run through the county—the Santa Fe, Southern Pacific, Union Pacific and the Pacific Electric railways. Virtually every community of any size in the county is touched by one or more of these rail lines.

Fuel is an important factor in a manufacturing enterprise. Several oil fields in the county offer a permanent supply of fuel, both crude oil and natural gas. Competition between the two types of fuel has been effective in lowering prices, who are forced by the supervision of the railroad commission.

Hydro-electric power is available and may be had at a reasonable price. The best of service and a substantial supply of power is assured.

Plenty of Water
While there is in the county a considerable agitation for steps that will develop water for the future growth and development of this section, there is plenty of water to meet the demands of factories requiring large volumes.

The laboring element of the county is strictly home-owning and contented, and offers to employers a dependable source of efficient help, free from strife and free from constantly menacing strikes.

Climatic conditions are ideal, there are many recreational advantages, in fact every type of living condition is found here, to induce a happy spirit, good energy and congeniality. This situation makes it possible for workmen to deliver to employers an honest and full day's work. Efficiency of workmen living in such surroundings as exist here is conceded to be superior to that of laborers who are forced by weather conditions to remain indoors several months in the winter, or who are exhausted by excessive heat in the summer.

Good factory sites are obtainable at reasonable prices. This is an important feature, especially when site costs in some of the larger manufacturing communities are taken into consideration. Several of the communities of the county have taken the initiative in acquiring industrial site property and holding it against justified advances that would be made by private owners.

County Plays Big Part In World Trade

Orange county plays a creditable part in the far-flung commerce of the world. Its oil well machinery is in demand from Colombia to the borders of Siam, and its petroleum products penetrate 3,000 miles up the Yangtze valley in China. Its perfumes are popular in the capital of Canada. Its gold leaf gilds the palaces of Pasadena bankers. Camping outfits made here project miners in Alaska. A yacht built by a Newport caster ties up at millionaire in South Africa. Electric energy generated near its oil fields turns the wheels of Los Angeles. Its pimientos and avocados have become national appetizers. Fifteen per cent of California's famous citrus crops start from Orange county to eastern tables, and the county's biggest walnut shipping point is in this county.

One hundred thousand people grow, pump, manufacture and ship out \$70,000,000 worth of products in a year. That's getting started!

BARR COMPANY AIDS BUILDING OF COMMUNITY

A man who lives in any community has his business there, is identified with its civic institutions, prospers and helps other to do the same. It is the type of desirable citizen Orange county is justly proud of. Commercially, he is important to many people. His business is woven into the fabric of community life and welfare. There are thousands of businesses and more than a hundred factories of this type, true products of town and country, not lacking in wider vision, but having their interests centered among the people of Orange county. Knowing these institutions and the main-springs of their actions, knowing that they are strong in their support of home development by service and by spending their money, the people extend to them a loyalty and friendship. They are sure their confidence will not be abused.

This is a long introduction to the Barr Lumber company, although it might serve for many others. The Barr organization adds to its other qualifications that of alert enterprise.

An acquisition of the company recently is that of three large display rooms for kitchen cabinets and various kinds of beds. Barr believes that the way to sell the built-in idea in the home is to display it in modern rooms. With beds it is the same. There are some fine examples in these rooms. And the newer upright roller bed, that folds up and may be kept in any room or fairly large closet by day, is one of the firm's most successful specialties.

One marked feature of home builders' present-day demand, according to Barr, is that most people want hardwood floors, having become convinced that these are not only better looking, but easier to take care of and economical. Furthermore, the demand for hardwood to finish interiors has brought on a canvass of the world's productive sections, and during the last few years has built up an import trade in this country for Philippine mahogany which is expanding rapidly. This wood is excellent for doors, woodwork and cabinet fixtures, according to Barr.

The Barr Lumber company is really a continuation of one of the oldest firms in Southern California, the Griffith Lumber company, which was started in 1878. This was bought out in 1921, along with a yard at Norwalk. About 34 persons are employed by the company in Santa Ana, and the payroll runs about \$1200 a week.

Electronic Treatment Parlors (the Abrams method) Commercial building, Sixth and Main streets, Santa Ana, Calif. Phone 1292W.

Knives, shears sharpened at Hawley's.

\$5.00 Hat Shoppe, 810 No. Main. Hemstitching, 5c per yard.

THERE ARE MANY USED CAR BARGAINS LISTED IN TODAY'S REGISTER WANT ADS!

Our Industrial Progress

This industrial section of The Register is published mainly for the purpose of making the 45,000 to 50,000 readers of The Register better acquainted with the individual manufacturing enterprises of Santa Ana and Orange county, with a view to enlisting their support for home industry. But also it is hoped that by massing information, in news articles and display advertisements, we may fix the industrial idea more firmly in the community consciousness.

We have talked much of industrial development. To some extent we have backed our talk with action. All in all, we have made substantial progress, both in inculcating the idea and in actual accomplishments. But much remains to be done, both in securing new industries and in developing those we have, before we can have the pay rolls necessary to supplement or agricultural resources in the support of a rapidly growing city and county.

In securing new industries, so far as initiative is concerned, comparatively few of our citizens can participate in a direct way; but all citizens can participate in the moral and material support of the industries we have now. And unless these are supported and developed, not only will they fall short of our expectations in the matter of pay rolls, but they will serve as a stumbling block instead of a stimulus for further progress in securing new industries.

It may be true that a prophet is not without honor save in his own country, but it ought not to be true that an industrial enterprise must look entirely for its markets outside of its own immediate environment. Indeed it must have first the confidence and support of those most familiar with its facilities and its products before it can hope for a wider field of acceptance.

One of the simplest and most self-evident truths ever uttered by Abraham Lincoln was his statement about steel rails. "If we buy our rails in Europe," he said, "we shall have the rails and Europe will have our money; but if we buy the rails in the United States we shall have both the rails and the money."

We believe that the people of Santa Ana and Orange county not only should buy made-in-Santa Ana and made-in-Orange-county goods whenever and wherever they are offered, but should ask for them where they are not offered. They will, as a community, thus not only have both the goods and the money, but they will be helping to enlarge the pay rolls we now have and to secure the other pay rolls we so much desire and need.

Without going into specific statistics, it is perfectly safe to say that wages paid to workers in productive manufacture in Orange county are now more than double the amount of five years ago; but they are still far short of the amount they might have been if every citizen at all times during the past five years had been conscious of his personal duty and opportunity, as a citizen, in the matter of buying made-in-Orange county goods.

ORANGE FORGES 2000 ARE GIVEN AHEAD AS CITY EMPLOYMENT IN INDUSTRIES S. A. FACTORIES

By V. D. JOHNSON
Secretary Orange County Chamber of Commerce

Prosperity in Orange county is not yet "balanced," but the beginnings are here. It is going to take some time for factory developments to balance up with \$30,000,000 worth of agricultural products and \$40,000,000 of oil taken from Orange county land in 1924. Nevertheless, within the past few years active interest in industrial development has been aroused and the result is shown in manufacturing establishments in a number of towns of Orange county.

The little city of Orange is well toward the front in this industrial progress. Its substantial prosperity during the years past and assured for the future, is based upon the annual production in this immediate vicinity, of \$6,000,000 in oranges, \$1,000,000 in lemons and \$900,000 in walnuts. Added to this source of revenue is the product of the busy factories which within the past three years have evidenced conclusively that there are no handicaps in Orange to the successful development of its industrial life.

Large Plants Built
The California Wire and Cable company is an instance of what can be done here by the product of a needed article under wise management, with the enterprise sufficiently financed.

Starting three years ago with \$250,000 capitalization in a small building, making weatherproof wire for electrical purposes, the business has expanded until today with a capitalization of \$3,000,000, housed in a factory structure many times larger than the original, the company is doing an annual business of \$2,000,000.

The twine department represents an investment of \$250,000 and makes cotton yarn for wire covering and for the trade. The capacity will soon have to be doubled. Cotton mops are another product.

The Western Cordage company makes Manila rope, importing the raw material from the Philippines. Just a year and a half old, it has been compelled recently to double its capacity. The output finds a ready market. The plant represents an investment of \$200,000.

The West Coast Textile company manufactures the finest quality of Terry cloth bath towels and robes. This company, moving from Redlands to secure

SANTA ANA HAS MUCH TO OFFER NEW FACTORIES

Chamber Industrial Secretary Outlines Opportunities Available Here

By H. S. SAMUEL
Industrial Secretary, Santa Ana Chamber of Commerce

All of us hear the remark made almost daily, "What we need in Santa Ana is more industries." Without argument, we grant that. You also hear, "Why don't we get more industries in Santa Ana and Southern California." This question has a multiplicity of answers. In the first place, have you seen or heard of any other place in the world which has had the rapid industrial growth that this country has experienced within the past few years?

You probably say "quite naturally it should have, for no other section has experienced the phenomenal growth that this country has had within such a short space of time. And with all this growth in population and the wonderful natural resources we have both as to local production, transportation facilities and virtually at the front door to two-thirds of the world's population, we feel that our potential industrial possibilities should be almost limitless."

We quite agree that the outlook is most promising and our possibilities are great. True enough, we have scarcely scratched the surface of what this country will be within a comparatively short number of years, but there are many things to take into consideration and building wisely and surely is much better than too much promotion and the sad reaction of "cold smoke stacks" later.

New Industries Daily

To bring it right down to our own community, just here in the city of Santa Ana. Do you know that scarcely a day passes but that one or more prospective industrial propositions are presented to the industrial department of the Chamber of Commerce. Most of these prospective concerns require additional capital either to move here with their plant or to start such an institution in our community. We are not considering this question in the many propositions received which are either directly, or bordering on simply a promotion project, or the desires of an individual or individuals who have or have a patent or stock in trade and who wish to promote a company to try out their ideas. We refer purely to the many legitimate prospective industries which may be going concerns in some other locality and which either wish to change their location for basic reasons or establish a branch in this community.

In the majority of cases, in order that such an industry can make a move they may require the sale of additional stock in their enterprises. This generally means that a goodly proportion of this additional finance must be secured in the community in which they carry on these plans.

In a community such as Santa Ana where a number of such worthy enterprises have located here within a short length of time, it is not a hard matter to soon reach a temporary saturation point in the sale of such securities to a community.

If this and other communities were able to absorb the securities of good legitimate concerns here is no question but that we could make even more rapid strides than we are in industrial development.

The Helping Hand
However, it is just as true that there are prospective industries obtainable for our community who are fully financed, or nearly so and of course every locality is desirous to locate them in their midst. In this respect, however, we think we are exceptionally favored in having the facilities which we have to offer.

An Industrial Lamp Company was fostered a year ago by the Chamber of Commerce to buy and sell land to industrial and commercial institutions on a cost plus carrying charge basis. This company has secured both by outright purchases and options a number of very desirable industrial locations and which can today be purchased at an exceptionally attractive figure and is an inducement to the location of new or expanding industries. Our transportation facilities are very favorable at the present time and with the development of Orange County Harbor to a port or at least possible calls, would mean a tremendous thing for Santa Ana and all of Orange County in its development industrially.

Just a couple of days ago a fully financed and going concern could doubtless have been secured for this community if assurance could have been given that Newport Harbor would be developed for seagoing ships at an early date. And the expression of this concern and their actions is merely typical of many such otherwise prospective industries for our community.

Many pages could be written on why Orange County Harbor should

(Continued to Page 26)

Industries Bring Steady Money to Orange County

There are more than 4000 people engaged in industrial work in Orange county. They receive, it is estimated, \$100,000 a week in salaries and wages. The total industrial output of the county is near \$30,000,000. This would place industry in the front row of county income producers, side by side with the citrus growers and the oil fields.

Following is a list of concerns represented in this industrial edition, and responsible for its success. They are among the most aggressive and successful in the county, and their example goes further than mere words in encouraging new industries to establish themselves in Orange county:

Boats, yachts: Thos. Broadway, Newport Beach. G. V. Johnson, Newport Beach. Brass foundry: James E. McGraw & Sons, Brea. Brick and tile: Brea Brick company, Brea. Bus and coach builders: O. H. Egge company, Santa Ana. Builders' supplies: Van Dienen company, Santa Ana. Cabinets and fixtures: Santa Ana Cabinet and Fixture company, Santa Ana. Camping outfits: Collapso Camp Bed company, Inc., Fullerton. Cement pipe: Tustin Cement Pipe company, Santa Ana and Turin. Cigars: Pitner & Weber, Santa Ana, Calif. Citrus by-products: Orange County Citrus Products company, Anaheim. Coat and dress hangers: Orange County By-products company, Santa Ana. Cultivators: A. J. Barnhart, Placentia. Farm implements: J. R. Gardiner company, Fullerton. Gas furnaces: George J. Cocking, Santa Ana. Glass knobs and specialties: Brock Glass company, Santa Ana. Glass and paint distributors: W. P. Fuller company, Santa Ana. Grape juice: Utt Juice company, Tustin. Investments, insurance: R. L. Bisby company, Santa Ana. Irrigation pumps: Funk Bros. Manufacturing Company of California, Inc., Anaheim; Dixon Pump Works, Santa Ana. Lumber and builders' supplies: Santa Ana Lumber company, Santa Ana; Barr Lumber company, Santa Ana; Liggett Lumber company, Santa Ana. Mattresses: Santa Ana Mattress company, Santa Ana. Office desks, stationery: Sam Stein's, Santa Ana. Perfumes: The Wilson Perfume company, Santa Ana. Printing, bookbinding: A. G. Flag, Santa Ana. Refrigerating system: Molesworth Refrigeration Service, Santa Ana. Varnish renewer, polishes: Scientific Varnish Re-Newer company, Santa Ana. Vending machines, gum, candy: Unique Vending company, Santa Ana.

Santa Ana Glass Knobs Becoming Widely Known

In the building of homes there are many minor details which are taken care of by the architect and the contractor but which are apt to be overlooked by the home seeker because of the expectation that everything is going to be "just so" after the home is completed and ready for occupancy. One of these essential details is glass door and drawer knobs and pulls. These articles, because of their artistic and sanitary qualities, freedom from rust and tarnish and adaptability to various wood finishes, have created a place for themselves that has justified the building up of an industry in Santa Ana that is contributing in no small way to the prosperity of Southern California.

By reason of their being made and sold in large volume they lose something of the personality and appeal which goes with other products commanding a much higher price, and because of this the fact that they are made in Santa Ana is perhaps lost sight of by a great many of the residents of Orange county who are not aware of what is being manufactured in their own immediate vicinity. On the other hand the manufacture of these articles calls for a large investment in special equipment and machinery plus a working force of skilled labor trained by long years of experience in the glass industry, and it can be truthfully said that the Brock Glass company of Santa Ana is today among the leading manufacturers, in this part of the country, of specialties in crystal and opal glass.

ROCK AND GRAVEL PAY
Rock and gravel pits of Orange county have proved source of wealth. Large works in the foothills districts employ many men regularly.

W. P. Fuller Co., paints, varnishes, plate and window glass, mirrors, 320 W. 4th St. Phone 861.

AREA ENDOVED BY NATURE WITH GIFTS FAVORABLE TO BIG SCALE MANUFACTURING

J. FREDERICK AHLBORN, Secretary
Orange County Industrial and Publicity Department

An abundance of cheap power, adequate transportation facilities by land and by water, nearness to a great center of population, accessibility to the sources of supply of raw materials and favorable climatic conditions—these are the great essentials necessary to the successful development of an industrial center. All of these Orange county possesses to a marked degree. Nature has so lavishly endowed Orange county with its bountiful gifts, that perhaps nowhere else are conditions so favorable to industrial development, as here. This is truly "Nature's Workshop."

Orange county's wonderful oil fields produce millions of barrels of oil annually and an unlimited amount of natural gas. No industrial center in the world can boast of a better supply or is more generously served in this respect than this county. The high B. T. U. content (1175) of the natural gas over the manufactured gas and its enormous supply here at a very low cost, together with the equally generous supply of fuel oil, eliminate the fuel problem entirely. Hydro-electric power potentialities in California and the great southwest may also be termed unlimited. The possibilities of the Colorado river alone being many times greater than that of the Niagara.

Adequate Transportation
Adequate transportation facilities by land and by water are an economic necessity to industry. Orange county is fortunate in this respect; it is being served by three transcontinental steam railroad systems and in addition to these lines, the world's largest electric railway extends its network throughout the county for both freight and passenger service. The 500 miles of paved highways connecting every city and community within the county serve as an excellent auxiliary for transportation by motor trucks.

Water transportation and the development of commerce have always been a potent factor in the upbuilding of industry. In this respect too, Orange county is especially favored. Not only is everyone of its larger communities located on a par with the city of Los Angeles, but has its own harbor at Newport Bay. Although still in a state of undevelopment at present, Orange county's harbor at Newport Bay will soon rank as one of the busy ports on the Pacific coast. The contemplated improvements making it accessible to deep sea going vessels. It is located on the great highway of world commerce and offers a most convenient port of call.

Raw Materials
The great sources of the world's raw materials are easily available to Orange county through Los Angeles harbor, and in the near future also through its own harbor at Newport Bay. Considerable time and expense may be saved on many of the raw materials imported on account of the nearness of the sources from which obtained and its cheap transportation by water. Most of the countries furnishing the world's raw materials are facing the Pacific coast, and the Panama canal, with Los Angeles Harbor as its nearest world's port of entry.

On account of the equable climate prevailing here throughout the year, it has been found that, a saving of from 25 per cent to 35 per cent can be made in the construction cost of plants. No provisions having to be made against low winter temperature and heavy snowfall; which require extraordinary precautions, such as deep foundations below the frost line, steamheat for employees, deep laid water and gas pipes, extra reinforcement of roofs to carry heavy snowloads and many other contrivances to counteract the rigidity of the cold season.

Not only can a considerable savings be effected here in the construction of the plant, but it has also been found that our climatic conditions are conducive to a higher labor efficiency, amounting to 9 per cent and as high as 15 per cent.

Exceptional Opportunities
Orange county is inviting industries and offers exceptional opportunities. Some nationally known manufacturers have located in Orange county recently and other important industries have established themselves here and are doing exceedingly well. Even though the industrial development of this county has only just begun, the record of last year indicates establishment of a new industry every 15 days. This record, remarkable as it may seem, will soon be eclipsed, as is evidenced by the many industrial propositions which are now pending.

Nearly every city in this prosperous county, ranging in population from 1000 to 30,000, is predestined to entertain worthwhile industries. Suitable sites, well located, with transportation facilities close at hand, are offered at a most reasonable price, ranging

(Continued to Page 26)

30 Industrial Plants In Brea District

By J. R. HUNT
Secretary-Manager
Brea Chamber of Commerce

No community in Orange county is so blessed industrially as Brea. Located in the northern part of this county, this thriving community boasts of some 30 producing industrial plants.

Far more astonishing is the aggregate monthly payroll of this prosperous community; it is estimated that nearly \$400,000 monthly is paid to the workmen of Brea.

The industrial growth of this section of the county has been rapid. The production of petroleum has steadily increased, and with this factor in evidence the manufacturers of oil well supplies, machine shops and the like have increased correspondingly. From a community of some 1500 residents in 1920, Brea has grown to the point where it boasts now of 3000.

The business section, and the residential section also have made rapid strides. Modern lighting systems, sewer and pavement have been given to this territory a city atmosphere. Brea has come to stay, and takes its place in the front rank of industrial development.

DATA STRESSES SIGNIFICANCE OF INDUSTRIES

What a harbor means to Orange county industry is summarized in a statement made at the hearing on the report of the Harbor commission held in Santa Ana on May 12. One speaker, well known throughout the county, said: "A committee of Orange county business men had that morning been sitting in with a manufacturing concern proposing to locate three factories in Orange county, and they were told that the investigations had all proven favorable to Orange county except the one important item of water transportation and it was probable on account of the lack of a harbor the factories would be located elsewhere."

At the industrial conference held in Anaheim early in the year a speaker known everywhere for his study of industrial problems, stated that taking the general average, one acre of land used in industry required the investment of \$100,000 and that an average of 50 men were employed to every acre devoted to industry. Think what 1,000 acres devoted to industry in Orange county would mean to everyone. This industrial acreage, properly utilized, would give work to 50,000 persons and require the investment of not less than \$50,000,000 of capital.

Increases in values in agricultural lands will be slower from now on and it is reasonable to expect they should be. The effort of thinking men must be directed to the creating of new values and new wealth and in no way can new values be brought about so quickly and so amply as through the locating of industrial enterprises.

True, the farm today is a business and an industrial unit, but only in a very small way when considered from the standpoint of the employment of labor or from the viewpoint of the wage earner. Every county goes through various phases of growth and development. In the west and in California particularly, a few years are sufficient to bring about changes in conditions which require very long periods to effect elsewhere. From the earliest days in California the changes have been rapid and it is natural that the

(Continued to Page 26)

NEWPORT FIRM BUILDS MANY FINE YACHTS

Boat building is a comparatively new industry in Orange county, but today some of the finest yachts are built at Newport Beach in the Broadway shipyards.

Tom Broadway is a pioneer there, having laid the first keels in his present location nine years ago. One of the interesting sights of Newport Harbor is the Lady Ann, a 35-ton yacht being built by Broadway for a Los Angeles contractor.

The Lady Ann is about the last word in boat construction, built of mahogany, teak, Douglas fir and other choice woods. She will be driven by a 60-horsepower Diesel motor, and will be capable of making 10 knots an hour and of cruising in any kind of a sea.

Comfortable staterooms are being finished in fine woods, and from the cabin to the cook's galley everything will be thoroughly "shipshape."

Radio equipment will add to the pleasure as well as the safety of those aboard the cruiser. The specially constructed small boats are equal to the yacht in finish, the dingy costing \$750.

Although the Broadway boat works can handle any ship up to 150 feet in length, a considerable portion of the business is that of supplying the demand for small, safe, moderately priced rowboats and sailing boats for family use on the harbor. The demand for this sort of craft is growing as rapidly as the population of the harbor district. Parents here and in the larger cities of California want their boys and girls to learn to handle a boat and to enjoy the summer months on the bay.

"It is not unknown for men to come to us and order a new and larger boat for the boy each succeeding summer," said Broadway. "Of course this type of training for the right boy makes a good seaman of him sooner or later and fits him for the big voyage of life."

One of the popular boats for family use is broad and very hard to turn over. It is known among

Cleaning Plant Is Given Low Insurance Rate

When the insurance inspectors came to Santa Ana to look over the new plant of the Crescent Cleaning company on East Fourth street, they reported back that the plant was one of the safest and most modern in Southern California and entitled to the lowest charge for insurance.

The blue prints disclose a great deal that is not noted by the casual observer. Beneath this plant is a system of tanks holding 1000 gallons of cleaning solvents and a complete purification system, which clears the fluid and sends it in a steady stream into the machines on the ground floor. The plant represents an investment of nearly \$20,000.

The Crescent plant is owned by Harry W. Lambert and George Lambert, both of whom have had many years of experience in this business in Santa Ana. The brothers, after four years of partnership and development of their present business, feel that the southern half of Orange county, which they cover, is an ideal field not only for cleaners, but for all businesses which establish city and country delivery routes. The beach cities and the orange belt are in convenient reach, and the roads are unexcelled.

There is nothing prosaic about the cleaning business where modern business and manufacturing methods are employed.

the boat builders as the "snowbird type."

Good workmanship is absolutely essential in boat building. It is the knowledge of marine requirements and of the nature of the woods that makes a master boat builder. How to make a hull seaworthy is an art and a science, acquired only by practice. Most of the skilled men at present live in the large harbor towns to the west, but more of them are coming to the Orange county coasts to make their homes.

SUGAR STAPLE OUTPUT

So long as swampy lands are being reclaimed near the ocean, the county is likely to have sugar factories. Beet growing is carefully supervised by experts and the factories get a high percentage of sugar.

MANY TURBINE PUMPS USED IN ORANGE COUNTY

California's dominant position in agriculture was not won through sunshine alone. The Spaniards who established the picturesque missions up and down the Pacific coast were forced to depend on imported food for a great many years. In the course of time water was put on the land, and the productive combination was complete. Among the first counties in crop production in the United States, California now places seven almost half, and most of them near the top.

In Southern California, a large amount of irrigation water is pumped out of the ground, and pump making flourishes as one of the important industries. In fact there has been such a drain on the underground supply that of late years the subterranean water levels have fallen sharply, and deep well pumping is the order of the day.

The Standard Twin Screw Turbine Pump, made at Anaheim by Funk Bros. Manufacturing Company, of California, Incorporated, is well adapted for deep well pumping. It lifts the water with a series of propeller units built on the principle of the twin screw used by ocean going vessels. This type of pump has been produced for six years, and is shipped to various parts of the southwest, where its powerful lift is being used as a countermeasure against the constantly falling water levels. According to its owners this pump "gets all the water in the well."

Some outstanding installations of the Standard Twin Screw Turbine Pump are at the following ranches: F. W. Waite, Placentia avenue near Olive and South street; J. E. Schumacher, Orange-wood and Placentia avenue; Haas Realty company ranch, Brookhurst and Lincoln, near Anaheim; W. C. Munerhan, Katella road; Leo N. Schadel, Perris valley; Reynolds ranch, near Perris.

R. V. Funk, who is in general charge of the company's operations, is an experienced manufacturer. He is assisted by irrigation engineers who analyze a situation where a pump is about to be installed, and advise the prospective purchaser as to the size of pump needed. Funk believes that ranchers may in the future be forced to go even deeper for water than at present and that the demand for substantial pumping equipment will increase as the matter of efficiency becomes more and more important.

CIGAR FACTORY MEN PIONEERS

Franklin R. Pitner and Charles B. Weber, proprietors of Pitner & Weber Cigar factory, Santa Ana, are pioneers in the manufacturing of cigars on the Pacific coast. Starting with the old M. W. Stewart company, Los Angeles, in 1898, which was afterwards consolidated with the St. Elmo Cigar company, they worked together for 20 years and more. About five years ago, they left the St. Elmo company and manufactured cigars under the name of El Templo Cigar company.

On moving their scene of activities to Santa Ana, one year ago, they set up under the present firm name, and have achieved a remarkable record of cigar output. Pitner doing the outside work, calling on distributors, and Weber having supervision of the factory, where an average of 25 cigarmakers and other employees are constantly at work.

Weber, who is conceded to be one of the most expert judges and blenders of tobaccos in the United States, picked Santa Ana particularly as a field for their work because the climate is ideally suited to the production of cigars. The atmosphere is such that tobaccos preserve their flavor during the handling and after being made up and boxed.

The most popular brands being made by Pitner & Weber are the Colonel, El Templo, La Cal, Calett, Perfectos, Caletts and California Hand Made. All of these cigars are hand made, of the finest imported Havana, Porto Rican and domestic tobaccos. They have

turned out 2,000,000 cigars during their first year in Santa Ana.

These cigars are distributed through the jobbers of the southwest. Roehm-Sylvester, Inc., are distributors for them in Orange county. Pitner & Weber manufacture also the El Orco cigars, which are controlled and distributed exclusively by W. H. Booth & Co., of Santa Ana.

NEW AUTO TIRE PRICES. Guaranteed. Rebuilt, 30x3 1/2, \$3.85. 31x4 cord, \$5.50. 32x4 cord, \$7.00. 34x4 1/2 cord, \$8.50. All sizes in stock. Gerwing, 312 Broadway.

Home building is the basis of a city's prosperity, according to D. E. Liggett, head of the Liggett Lumber company of Santa Ana. For five years he has been in the building supply business and millwork and he attributes his own success to the encouragement of home building.

At present the houses being built in the fruit growing belt of Orange county are of a better quality throughout than has ever prevailed before. There is less shoddy material going into houses and fewer small buildings thrown together to meet the demands of promotion. Cost of labor and materials are low enough now to justify much building.

Houses Building In Orange County Of Better Quality

Every successful industry has some points of superiority. A recent innovation is the covering of all lumber from the elements. Mr. Liggett is completing the first seasoning sheds in Santa Ana for the purpose of housing all dimension materials. Warping as well as checking and weathering is eliminated.

turned out 2,000,000 cigars during their first year in Santa Ana.

A Printing Service that Reaches Up to Meet Extraordinary Needs

Printing

Bookbinding

Commercial Art

WHILE the industries have been growing up in Orange County we have been preparing against the day when the big printing emergency should arise in the case of any one of them. For it's getting up against a rock-ribbed emergency that tries men's souls and puts printing equipment to the test. If the occasion arises when you wonder if a certain printing job could be handled in Orange County—give us a thought.

Volume—Accuracy—Economy

We've been preparing to meet all your needs, even when they come up suddenly and assume the proportions of the extraordinary. We can furnish you with art work, lay-out design, engraving service, printing and binding—all under one roof. We are equipped to handle large volume work; we make a special point of accuracy; we believe that good work is the most economical for the buyer of printing.

SEES CITY NOW WHERE GRAIN USED TO WAVE

It is not often that a boy born in a rural district finds himself at middle life a leading manufacturer in a city of 12,000 people sprung up as if by magic in the grain fields which once surrounded his home. Precisely this is what has happened to John R. Gardiner of Fullerton.

Born about 50 years ago within two miles of where he lives today, Gardiner had to wait a long time for a city to come to his part

of Orange county. When it did come the city and the country had adopted each other and today most people who know one know the other.

Fullerton is a fine city and Gardiner is a good booster. Yet the man retains all his old love for the farm, his old memories and some of the scars from shoeing mules, together with his old loyalty to the agricultural men who have made and still maintain the northern part of Orange county like a landscape garden.

"About the only factory in Orange county in the old days was a brewery down at the Anaheim settlement," said Mr. Gardiner recently. "That has changed here and at Anaheim too. I got my start right here and whatever success I have had has come from first-hand knowledge of the needs of the farmer. My cultivator has grown from one stage to another until I believe it is as good an orchard cultivator as there is on the market. And the way the

growers use it is the best proof that it is adapted to Orange county conditions."

Necessity Mothers Invention
John Gardiner's father found it necessary to run a threshing machine of summers in order to make old fashioned farming pay. At 19 the son left the farm and worked in a brother-in-law's blacksmith shop at Duarte. For seven years he labored at the forge and took care of the office and the books.

At the age of 27 he went into business in Fullerton, paying \$250 for a lot on the main street. This lot has been recently appraised at \$1000 per front foot. Five dollars to one thousand dollars change in valuation in twenty-five years is eloquent testimony to the growth of the city.

About eight years ago he started an implement business in his present location on Commonwealth avenue, manufacturing a furrower for the irrigator. At that time most men laboriously laid out their furrows with walking plows. The new implement was followed by others.

Now by using Gardiner's ridger and blocker, the farmer gets almost perfect control of the water in the orchard with a minimum use of the shovel. The revolving cultivator idea came to Mr. Gardiner about thirty years ago, when he built a crude implement, which he still has on display as a milestone in early orchard tool making. The later cultivators have power lifts and enable the driver to get close to the trees.

Cutting Farm Costs
"Some years ago it came to me that the farmer was in need of implement to cut the overhead expense and get the best results in cultivation," he said. "Ever since the days of the old farm I have been working out ways to get the most farm work done well at the lowest cost."

Knowing the man one can well believe that the service performed has fulfilled some of his deepest ambitions. All the hard knocks of pioneer work have failed to change his good disposition and his robust appearance.

"Hard work never kills a man who uses good judgment and does not strain himself," he says.

That it is not a bad philosophy for a man who designs labor-saving machinery, manufactures it and puts it within the reach of the workers of his community.

Dixon Develops Simple Pump At Santa Ana Plant

R. T. Dixon, inventor and manufacturer of Dixon pumps and equipment, has been the author of a number of original pump designs. He estimated the first of this year that the output of his plant at Garnsey and West Fifth street, Santa Ana, had amounted to a thousand pumps of all sizes.

A foundry, which is operated at the plant, occupies nearly half a city block of ground and employs from 14 to 30 men. Several thousand different parts for leading makes of pumps and windmills are kept in stock at the plant, where a great deal of pump repair work is done.

Dixon has recently developed a special service for subdivisions and cities in the form of a pressure pump and system which he installs himself, sometimes by means of equipment of his own design and manufacture, as in the case of a ditch digger used for laying the water mains.

Dixon's latest deep well pump has been greatly simplified and reduced in weight, and is operated by a small electric switch of the plain on-and-off variety. The head of this pump is convertible from water pumping to use as a stationary engine drive. Another feature of the pump is a simplified oiling system from top to bottom.

RADIO at Gerwing's, 312 Bryd.

REALTOR DISPLAYS LOCAL MADE GOODS

R. L. Bisby, head of the investment company bearing his name, recently located in new offices at 105 West Third street, Santa Ana, is one of those all around business men to whom it is comforting to go before launching important enterprises. His years of experience as manager and builder of the W.

R. L. BISBY

H. Spurgeon Realty Co. properties puts him in position to know values and at the same time, determine what is necessary for the proper upkeep of a property.

Desiring to render a service to the community this firm has invited the different manufacturing enterprises to use its windows for the display of their goods with the two-fold idea of not only rendering a service to the Santa Ana manufacturer but to the community as well. The public, seeing these goods, becomes familiar with them and naturally demands them when purchasing from their home merchants. Several sales have been made by the manufacturer to the local merchants due to these displays.

In planning the organization he has associated with him in the different departments, men who are qualified in their several lines of service. Herb O. Davis, for years connected with the automobile industry in Orange county, looks after the insurance end of the business, paying particular attention to automobile insurance.

Jack Wallace, who was prominent in the war work and more recently secretary of the Santa Ana Realty board is actively connected with the real estate department having associated with him, in that department, Noel A. Berry, formerly business manager for Santa Ana Daily News.

As insurance engineer, eminently qualified for the position, who for thirty years has been making surveys to determine the right kind of protection to the insured, looks after this end of the business.

The real balance to the organization is the able and efficient secretary, Miss Nell Warner.

A prospective factory owner asks whether Orange county residents will buy products made here. This question has been answered by advertisers in the affirmative.

Farmers are good buyers of made in Orange county goods. Cooperation with each other has taught the possibilities of community cooperation between all types of producers.

The meat packing in Anaheim still has to import some stock from Arizona to run to capacity.

The world is not panting for new articles to buy, but for opportunities to buy what it does buy at the best possible prices.

Property Service of Unusual Scope

The real estate department of our business operates on the basis of permanent and amiable relations with clients. Hence, in selling a piece of property listed we desire the exchange to be equitable and pleasing to both parties. Our experience as to real values benefits both buyer and seller. But this is only one phase of our service.

—We manage property for absentee owners.

—We rent, lease, keep up estates, no matter where located.

—We are equipped to render these services in a reliable and satisfactory way.

Evidence of Real Desire to Serve

We are displaying in our office windows the products of Orange County factories. We do this, not only for the good of the industries which bring payrolls and stability to a community, but for the information of the public, that our people may patronize home industries.

To serve SANTA ANA better—

It has ever been the policy of W. P. Fuller & Co. to make a substantial investment in real estate, buildings, etc., in the communities where it serves.

Completed last October, the Santa Ana warehouse, office and retail store, located at 520 West Fourth Street, was built to better serve the dealers, master painters

and the general public of this community.

To serve all of Southern California better, this company recently completed an additional unit to its manufacturing plant in Los Angeles, and is now greatly enlarging its warehouse facilities so that adequate stocks may be maintained at all times.

"A Paint or Varnish for Every Painting Need"

Here in Santa Ana you will find a complete stock of Fuller paints, enamels and varnishes for every painting need.

Whether you buy from any dealer handling the Fuller line, or direct from our retail store, you have the assurance that 76 years of paint making experience is back of every Fuller product.

If It's Glass— See Us

Plate glass, window glass, skylight glass, mirrors and windshields—no matter what the size or what the use—we can give you exactly the glass you want or need.

If there's a window broken—give us the measurement over the telephone and we'll have the glass ready when you call, or we'll send a man to put it in at a slight additional charge.

This Fuller retail store and warehouse is here in Santa Ana ready to serve you. Call and see us about any painting or glazing problem.

SANTA ANA MADE DURARD DESKS GAS FURNACE IS ARE HANDLED WINNING NAME BY S. A. FIRM

For seven years, George J. Cocking has been perfecting his gas furnace for heating homes and buildings, and the product today, under the name of Bung-Lo Gas Furnace, is finding its way to market in many sections of California.

The first furnace made by Cocking was, according to his present conception, "rather crude." It was turned on and off by a rod extending up through the floor of the house, and it was made in one size only.

Cocking's Bung-Lo Furnace, the result of successive improvements, is operated and controlled by electricity; a touch of a button turns on the gas heat, or turns it off, and an automatic thermostat keeps the temperature at whatever level is desired.

An average of 10 workmen is maintained in Cocking's plant on West Fifth street, Santa Ana, and the business of manufacturing these furnaces is steadily growing and causing the plant to expand to meet the demand. An underlying cause of this advancement is to be found in the loyal boosting spirit of those who have installed the furnace.

"But we are keeping within our capacity to produce," says Cocking, "rather feeling our way than plunging along. We know that we have a product that makes friends, and time is an element in our sound progress to larger things. We believe very sincerely in the golden rule; we put the best of materials into our furnaces and add the best of workmanship."

The payroll at this plant runs to \$400 a week on an average.

The day when buyers sought out the maker and distributor of articles having passed away, each branch of industry finds itself going more and more to the public to make sales. This means offices to facilitate the human contacts now so necessary in the carrying on of business. During the last 10 years the equipment of offices has been taken very seriously by all kinds of commercial concerns.

"As factory representatives for the Durard Desk Manufacturing company," says Eli H. Singer, manager of Sam Stein's Stationery store, Santa Ana, "we feel that we are in a position to render a welcome service to the industrial enterprises of Orange county. The products of this, the largest exclusive desk factory west of Chicago, are in demand where offices of the highest type are being equipped. With the full line of this factory on our floor we can offer to purchasers a complete choice of woods and designs."

"The Durard factory, which is at Los Angeles, has developed a quality tradition in the making of fine desks, and no finished piece is allowed to leave the factory until it has been carefully inspected in every detail to make sure that it comes fully up to the requirements of its name. Many business men are most discriminating in their selection of office furniture, and in the Durard we have a desk that never fails to impress the most particular of men."

Kerfoot's Gene Morris One Day Auto Painting, 410-412 West Fifth, Phone 2561 W.

Campaign Planned To Reduce Deaths At R. R. Crossings

CHICAGO, May 18.—Year by year the casualty rate at railway crossings is being reduced in proportion to the number of motor vehicles in use, figures made public at the meeting of the safety section of the American Railway association showed. A campaign to start June 1 and continue until September 30, the period of heaviest motor traffic, is scheduled for 1925 to further reduce the ratio.

"In 1921," according to the statement, "there was one casualty for every 4397 motor vehicle registered. In 1922 for every 4646 and in 1923 for every 5029. In 1924 after a similar campaign the proportion was one accident to every 6043 vehicles."

"Despite the increase in the number of automobiles this year it is expected that the casualty rate this year will show a much greater improvement than in 1924."

A poster, designed by H. Day Lowry, Richmond, Va., is to be one of the advertisements to be used in the 1925 attempt to reduce accidents. It portrays a dramatic picture of an automobile racing a train to a crossing. Platform and radio speakers will be enlisted to aid in the work symbolized by the crossing sign:

"Railway Crossing. Stop! Look! Listen!"

Declares Planes Save Time In War

LONDON, May 18.—"Is aerial warfare humane?" asked Air Marshal John Salmond in a lecture at the Royal United States Service Institution on the Air Force in Iraq.

He answered "No" to his own question. But declared that air war is quicker, more efficient and accompanied by infinitely less suffering than older methods of waging war.

There were instances where aerial action was successfully taken, when under the old form of warfare the employment of a division would have been needed.

FULLER PAINT HISTORY DATES BACK TO 1849

The history of W. P. Fuller & Co. from the days of '49 to the present time, is one of combined romance and success. In 1849, W. P. Fuller sr., a native of Walpole, N. H., sailed on an old wind-jammer for California via the old-time route, around the Horn. Arriving in California, he settled in Sacramento, which at that time was the gateway to a rich mining section and therefore a booming town. Here he started in the paint business known as Fuller & Heather. Thus was the foundation laid for the present immense organization of W. P. Fuller & Co.

During the great flood of 1862, Mr. Fuller removed a portion of his stock and established himself in San Francisco. This business continued until 1867 when the firm of Whittier, Fuller & Co. was formed, Mr. Heather retiring.

Business Grows Rapidly. During these old pioneer days, the business weathered many storms, but the determined spirits of the argonauts, whose energy and brains built up the west out of wilderness and desert, prevailed, with the result that the business grew by leaps and bounds.

Mr. Fuller sr. died in 1890, after 40 years of successful business life.

In 1894, the firm was incorporated as W. P. Fuller & Co., Mr. Whittier retiring.

In 1924, 30 years later, W. P. Fuller jr., grandson of the founder, took up the reins as president of the company to carry on the business policy as established by his predecessors.

Today branches of the firm cover the entire Pacific slope, there being 29 branches, as well as factories situated at South San Francisco, Los Angeles and Portland.

Branch Store in Santa Ana.

The branch stores are situated at San Francisco, Sacramento, Oakland, Portland, Los Angeles, San Diego, Stockton, Seattle, Tacoma, Spokane, Boise, Pasadena, Long Beach, Santa Monica, Salt Lake City, Hollywood, Walla Walla, Fresno, San Bernardino, Yakima, Santa Ana, Ogden, Glendale, Berkeley and Santa Barbara.

The main offices of the firm are situated in San Francisco and are housed in one of the most modern types of buildings. It is an example of a commercial building so designed and equipped that it renders the maximum service to the workers of the organization.

For the demonstration of the utility and beauty of the products of W. P. Fuller & Co., this building provides a display room decorated with a feeling of subdued richness, and soft tones of color. Here is an ideal place for architects and home builders to bring their clients for the purpose of choosing their color schemes and the materials of decoration, and also for the retailers to inspect a line of goods suitable for their stock. In the finishing of the executive offices, corridors and other rooms, the application of some of the company's products are attractively shown. The executive offices and board of director's rooms are among the most perfectly appointed. They open into a corridor which surrounds a beautiful Spanish tile garden court, with its lovely flowers, fountain and gold fish pool.

Look to Employees' Comfort. In the planning and building of the branch stores, the comfort and efficiency of the employees was also kept constantly in mind.

The main factories at South San Francisco are of great interest, occupying 22 acres of water frontage and connected with rail and water transportation systems. A tour through this beehive of industry is one of great interest. The immense sheds in which pig lead is corroded and converted into white lead; the extensive varnish manufacturing department with its large cooking furnaces; furnaces for the manufacture of red lead and litharge, are all sights worth seeing. It is, however, in the shipping department, where tremendous quantities of the firm's products are constantly being loaded onto huge freight cars, that the immensity of this important California industry is realized.

New York Buys Its Garment Hangers In Orange County

Garment hangers for a large section of New York clothing trade are made in Santa Ana, California. This specialization in production and distribution to the far points of the country is familiar enough, but the way an Orange county article comes into general use over the United States is perhaps not known to all residents of the community. The factory management secured several valuable patents and set to work to make a garment hanger that would practically prohibit the garment slipping off. In this they have succeeded to such a degree that an order from New York a short time ago for 2,000,000 hanger tips caused not a ripple of surprise. Many large repeat orders are coming in.

The tip of the hanger is formed of rubber, either set in or slipped over the end of the hanger. The rubber is cut in such a way that the clothes are held from many a serious fall into the dust.

Requests for agency representation have come from as far as New Zealand. The company already has an agency in Canada.

The manufacture of bottle crates is an important branch of the work. Counter display specialties are made to order. The California Crate company, closely allied, makes the onion crates for Coahuila valley. The wood is red gum and comes from Arkansas. The officers of the By Products company are Dr. C. D. Ball, president; C. B. Morgan, vice president; W. C. Baker, secretary, and J. A. Cranston, O. Z. Perkins and P. P. Jayne, directors. All live in Santa Ana.

Radio supplies at Hawley's.

MANUFACTURE TRACK-LAYERS IN FULLERTON

By GEORGE A. RAYMER
Secretary Fullerton Chamber of Commerce

One of the infant industries of Fullerton, the Moon Track company, began active operations September 1, 1924. This company manufactures a track-laying attachment that is especially adapted for use on the Fordson and

MRS. LOTTIE E. MORSE
President of Moon Corporation

International tractors, though they can be installed upon any axle-driven wheel type tractor. This track device, by giving additional traction, increases the draw bar pull from 50 to 100 per cent.

The Moon track attachment has been approved by the management of the Ford Motor Car company of Southern California as being particularly well adapted for their tractors, adding efficiency and economy.

Recognized by Big Concerns. It is quite unusual for a new product to receive recognition by large manufacturing concerns of the United States, but such has been the case with the Moon track. Not only has the Ford company recognized the product as having unusual merit, but the International Harvester company has investigated and approved the Moon track as an improved equipment for their tractors, in their new industrial catalogue, which has a wide distribution, not only in the United States, but in all of the agricultural countries of the world.

The Moon track company has promise of being one of the largest industrial plants in the Southland, and the knowledge and use of its product will encircle the globe.

The Moon track is manufactured at the plant of the John R. Gar-

diner company, on West Commonwealth avenue, Fullerton. The present output of the plant approximates \$40,000 a month, and plans are now under way for greatly increasing the output, owing to a very marked increased demand for the product. Gardiner, who has had many years of experience in agricultural machinery and tractors in northern Orange county, claims that the "Moon" has very great possibilities and that, at no far distant date, every axle-driven tractor will be equipped with this device.

Woman President of Company

One of the unique features of the Moon Track company is the fact that a woman heads the organization. The president is Mrs. Lottie E. Morse, of Fullerton, who is well known in agricultural circles in northern Orange county. Her well directed energies in orange culture and her wide knowledge of soil cultivation especially equip her for the position as president of the Moon track organization, and her unflinching zeal in many lines of business activity is now centralized in exploiting the Moon track.

GLASS FACTORY BROUGHT HERE BY IDEAL HOME

"Orange county makes a good home for our men; that's why we brought our factory to Santa Ana." This is the first reason given by F. A. Dixon, vice president of the Standard American Glass company, a thriving new enterprise, for his choice of this locality. The factory payroll now exceeds \$4000 a week, employing about 125 men steadily making window glass.

Mr. Dixon has two sons, W. L. Dixon, president of the company, and H. P. Dixon, secretary. He himself has had 24 years experience in glass manufacture, and his sons have studied in American and

European fields. The factory here is run as carefully as its melting furnace, which has to be inspected every 20 minutes and kept at the incredible temperature of 2400 degrees Fahrenheit, 24 hours a day. The consumption of gas by its furnaces amounts to 1,250,000 cubic feet daily.

Recent activities of the company include reservation of a frontage of 1000 feet on Newport Harbor. Mr. Dixon predicts terminal rates for Orange county as soon as enough of the manufacturers and shippers demand it. Transportation charges and expensive methods of production, and not lack of sand in Southern California, are given as reasons of using Belgian sand brought in as ballast in the ships.

The capacity of this plant is 50,000 square feet or 1000 boxes of window glass daily. Inquiries for glass have come from China, Hawaii and Central America. The present output is used largely in California, but these transpacific demands are believed to be significant of future possibilities in Orange county manufacture.

Full Factory Line DURARD DESKS and TABLES

Here on our floor in Santa Ana you can look over the entire factory line of the Durard Desk Manufacturing company—and buy as you select, in any quantity desired.

The Durard Desk comes in various of the finer woods, and is famous for its exquisite workmanship. Offices that demand the utmost in furnishings are most enthusiastic friends of the Durard name. Each desk is carefully inspected before it is permitted to go out under the name which has become a brand of quality.

HOSE CLAMPS MADE IN BREA GO TO BURMA

Numerous manufacturers in Orange county are enabled to do more work because they can depend on getting their castings and bushings from a factory at Brea. This is the James E. McGraw and Sons Brass Foundry.

Not only is this foundry the only one of its kind in the county, but some of its work, notably the manufacture of pure copper welding plates, is done nowhere else in Southern California. The welding plates are used wherever rotary well drilling machinery is being operated.

McGraw and Sons are known far and wide for their workmanship and business probity. Orders for their Hammer hose clamps have come to Brea from as far as British Burma. Their pump valves are the pride of irrigation engineers; their casing block bushings and welding plates are shipped in quantity to oil fields from Coalinga to

Huntington Beach and Newport Beach. They are known also for the Sampson post bearings and an endless variety of brass and bronze fittings they turn out.

Among the large concerns in the county using McGraw and Sons castings are: Funk Brothers Manufacturing company of California, Inc.; the Ulmer Machinery corporation, the Irvine ranch; H. F. Towne's Machine works; Yeager Rock company; Richards Brothers Machinery works; Union Oil company; Shell Oil company; Pacific Gasoline; Duro Engineering company; Schaffer Tool Works; Holly Sugar corporation; Standard Machine company.

Many boat makers are also large users of brass from this foundry. In a remarkably short time these trained men who came from Pittsburgh, Pa. 20 years ago, have built a business in Orange county that is southwestern in scope.

FUMIGATING IS IMPORTANT

The protection of Orange county's millions invested in citrus trees against invading pests and plant diseases requires an immense amount of fumigating and spraying, so that this activity has developed into quite an extensive industry, represented by numbers of plants, immense quantities of canvas and other equipments and hundreds of persons finding in this a profitable occupation.

PATENT OPENS NEW ERA FOR FRUIT JUICES

With the inauguration by the Orange County Citrus Products company, of Anaheim, of their patented solar vitalizing process for preserving the juice of citrus fruits, new vistas of profit making loom for Orange county growers of oranges and lemons. Aside from the growers who own and operate this company, all producers will benefit by the turning of surplusage and culls into revenue, leaving, as this would, a stabilized quantity of fruit to handle through the usual marketing channels.

The company is organized for two purposes. It will operate to eliminate the tremendous waste that is now the rule in handling culls. Also it is expected to return a profit to its owners, for the company plans to utilize every part of the fruit with a thoroughness very much like that practiced by meat packers, of whom it is said, they save everything of the pig except the squeal.

The products to be manufactured will be of the highest standard, and all operations will be under the supervision of the best chemists and other experts obtainable. No part of the fruit will be thrown away, which, considering the fact that heretofore thousands of culls have been wasted, means a real economic saving.

Chief among the output of the plants to be operated by the Orange County Citrus Products company will be the Golden Orange drink and the Golden Lemon drink. These consist of the fruit juices prepared under a natural process which retains the original properties of the fruit.

Inquiries from many parts of the United States, and from foreign countries, have already indicated a lively desire on the part of large distributors to obtain such a product to sell in their territories, and these inquiries have come, so far, voluntarily, in response to news items that have appeared in periodicals in this country.

Other by-products will be produced, such as Golden Orange concentrate for beverages, for ice cream flavoring and for soda fountain syrups and bottled Orange Candied lemon peel, orange peel and grape fruit peel will be manufactured. Orange and lemon oils, emulsions, citric acid, lemon cream and lemon soap will also be made from parts of the fruit. In addition, when all the other by-products have been obtained, the residue is to furnish a sweeping compound that, through its pleasant aroma, holds a strong appeal for dealers in such articles.

Thus the growers who own and operate this company will have a sure market for their culls and fallen fruit at a good price; a profit from the manufacturing plant and increase in value of their capital invested, and create a greater demand for their better oranges by means of advertising and keeping the culls from entering into competition with this fruit.

The offices of the company are at 350 West Center street, Anaheim, in charge of Samuel C. Patrick, manager of the financial and publicity department.

"Orange growers have suffered considerable losses," says Patrick, "through house to house selling by peddlars of culls and inferior

fruit. This tends to cut the price that can be had for good fruit. By turning the culls into profitable by-products the Orange County Citrus Products company will be stabilizing the whole matter of marketing citrus fruits. An intensive advertising campaign is contemplated to tell the people of this country of the health-giving properties of citrus fruits, their medicinal effects and the value of making them a part of every day's menu.

"Orange county will receive the advantage of this advertising through the slogan which will be used on the products as they go out: 'Made in Orange County from Orange County Oranges' etc. Thus, wherever these products go the slogan will carry a good word for Orange county."

MOTOR BODY FIRM STEADILY GROWING

The O. H. Egge company has been building motor bus bodies for seven years, taking in a larger territory as time went on, until at the present time the company's plant on West Fifth street, Santa Ana, employs an average of 40 to 50 men and is building 50 busses a year.

Last year this company turned out ten school busses for Imperial valley schools. From as far away as Tula, Calif., came an order for a 50-passenger school bus. One of the largest moving vans permissible under existing highway conditions is now being built at the plant for a Bakersfield firm.

But the most unusual output this year is a set of four De Luxe motor coaches now under construction for the Sutherland Station, San Diego. These bodies will be the last word in motor coach luxury. Instead of the rigid double seats these coaches will have individual revolving chairs, and will carry fewer passengers in greater comfort than existing types.

The rear of each coach will be enclosed in rounded glass and fitted up as an observation section, with many new departures in arrangement. These motor coaches to vie with anything the railroads have put on wheels, embodying, as they do, the best features picked from the best types in use up to this time. They are being built after original designs by Egge, who designs everything his plant turns out.

The elegance of the interior of these coaches, which will be upholstered throughout in velvet, will be heightened by artistic designing and handwork of Miss Frances Egge, daughter of the company's chief, who has attained more than local fame as an interior designer. One of the decorative features will be hand painted shades for individual electric lights at each seat in the coach, designed and painted by Miss Egge.

While building motor coaches and bus bodies is the largest specialty of the O. H. Egge company, a great deal of work along allied lines is turned out at the plant, which makes repairs on automobile bodies, fenders and tops, and does a big business in refinishing cars, having the agency here for Moto-Lac satin finish.

The management of the company was taken over by Egge in 1921, when he began to develop the body building department, which has won its present high standing and broad scope under his personal supervision.

WILSON PERFUMERS DO BIG BUSINESS

"The fact that a piece of merchandise is from California makes it sell more easily in the Eastern markets," says Roscoe Wilson, president of the Wilson company, California perfumers, of Santa Ana.

This appears to be true, especially of fruits, fruit products and articles that remind the purchaser of the luxuriant flowers of this state. This liking, doubtless highly developed by the uniform excellence of products shipped out of the state, has been of great advantage to this distinctive Orange county industry.

Some of the ingredients of good perfumes are produced here; but most of the essential oils, those containing the essence of fragrant flowers, are imported from the Mediterranean countries. The finished product of the factory travels as far afield as do the oils of the Levant. The major distribution of Wilson perfumes, however, is in the United States between Honolulu and New York, Portland, Chicago and St. Paul are among the banner markets.

But the local field is not overlooked. Orange county users of perfumes are good buyers. The manufacturer modestly attributes this demand in part to local patriotism and the desire to help the community by buying things made in Orange county.

The perfumery business, like the flowers, has its favorite season. But perfume is in greatest demand during the winter holidays. Consequently the factory is busiest after July 1, when at least 40 men and women are steadily employed. "Orange Blossom Perfume" from Orange county is one of the leading brands. Toilet creams also form an important part of the output.

HUNTINGTON BEACH GAINS
New oil wells at Huntington Beach have improved conditions in that city. Many men are turning to the production of oil drilling and storage machinery for shipment to fields elsewhere. A broom factory, an asphalt plant and other industries also employ many.

SILVERADO HAS MINE
The old silver mine up the Silverado canyon is proving to be quite productive of zinc. Fullerton and Anaheim capitalists are developing the zinc, lead and silver deposits to commercial advantage. Most of the output is sold to paint companies.

BANKER LAUDS FACTORIES AS LOCAL ASSETS

By W. B. WILLIAMS,
Vice President and Cashier
First National Bank of Santa Ana

There can be no question about the value to a community of a sound manufacturing concern. Financially, a factory that is successful is not only an asset to those who own it, but it is an asset to the entire county in which it is located.

Goods that are manufactured are sent away, and they bring money to the city in which the plant is located. It is easy to be seen that any activity that is able to take of itself and that brings to a city more than it has to send away for materials, is well worth while. A sound, successful manufacturing plant does that very thing.

Reflection of Success
The success of a good factory is reflected in numberless ways. It is seen in payrolls. The prosperity of workers means better business for the grocer, the clothing store, the dairy and the shoe dealer. They, in turn, pay rent and employ clerks.

No one can doubt the advisability and the duty of giving support to local institutions. Those of us who live in a community or a county ought to give preference to the manufactured products of the concerns that have their plants located near us. Though we may not be stockholders in the concern, we are all benefitted by the successful operation of the plant.

Must Know Business

The operation of a manufacturing plant is just like the operation of any other business; it calls for proper management and for operation by men who know that business. Given proper management and given reasonable support at home, there is no reason why the sum total of factories in this county should not grow. Success brings success. If we want more good factories, it is our duty to help make those that are already here successful.

Orange county receives millions of dollars annually from its oranges, lemons, beans, beets and walnuts. Other crops, though not so great in volume, bring in millions. Let us add to these millions from industries.

ELECTRIC PLANT HELPS

Seal Beach has benefited greatly by the erection of the first units of a \$15,000,000 electric generating plant this year. More than 300 men have been on the payroll, and the permanent employees will number about 100. The new transmission line to Los Angeles recently underwent a successful test. The plant will use natural gas and oil for generation of steam.

Southern California Knows Egge

From Bakersfield to San Diego the name of O. H. Egge Company stands for quality workmanship, and all Southern California sends business to us here in Santa Ana which keeps our plant with from 40 to 50 skilled workers busy the year around.

Bus Building

This firm began to specialize in bus building almost a decade ago, and during the past five years has become recognized as superior in this line.

De Luxe Coaches

We are now building some De Luxe motor stage coaches from our own design that go far ahead of anything yet produced in Southern California.

Automobile Bodies Fenders and Tops

With our expert workmen and complete equipment we can deliver the very best of repair work.

Moto-Lac

A proven, hard, non-checking lacquer finish that we have found most satisfactory for cars in this climate.

Appealing California Oranjuce Satisfying

Nature's Product From Producer to Consumer
Made in Orange County from Orange County Oranges
Owned and Operated by the Citrus Growers

This beverage at Soda Fountains and Soft Drink stands 5c and 10c the glass. It is also an excellent beverage for the home or to take on trips and outings in 60c and \$1.00 jugs. For dealers it is delivered to any part of the world in gallon jugs, ten-gallon kegs and thirty- and fifty-gallon barrels.

Supply and Demand Go Hand in Hand

This company is now operating two plants and remodeling and enlarging its other factory near Olive. Here will be installed the SOLAR VITALIZING PROCESS, for which the Orange County Citrus Products Company has the exclusive rights of manufacture in the State of California and can ship this 100% PURE ORANGE JUICE to any part of the world. C. P. 100% Orange and Lemon Juice and Grape Fruit Juice.

Distributors and Jobbers have applied for territory in all parts of the United States, the rights to many states have been allotted, and requests are on file in this office from London, England, Sydney, Australia, New Zealand, Honolulu and other parts of the world.

There is still plenty of good territory open and we are seeking distributors. A real opportunity awaits those fortunate enough to obtain rights to territory.

BARGE SERVICE STARTS
The first barge service to use Orange county's harbor is being operated by the McGaffey Transportation company, which makes the port every two weeks. The Santa Ana Lumber company received the first shipment brought in by the first barge, consisting of 60,000 feet of lumber.

MANUFACTURER MUST KNOW
Blind support of any and all manufacturing industries would not be a good thing for any community. There are certain requirements even of payroll industries. The product must be something useful and with possibilities of sale, and must be manufactured and got to market on an economical basis to insure its success.

GROVE ENTERPRISE GROWS
The progress of Garden Grove and the rich farming districts of the west end of the county has been a distinct advantage to local industries, notably the Garden Grove Lumber and Cement company. H. A. Lake is manager of this company, which makes a feature of cabinet work. Cement pipe works are also busy.

The difference in the quality of brass castings makes it important to manufacturers to know exactly what they are going to get when they place an order.

We are happy in having, as references, some of the largest factories in southern California.

REFRIGERATOR FOR HOME NOW IS AVAILABLE

The latest regular house service to be introduced is refrigeration. Refrigeration is now brought into the home as easily as domestic gas. No longer is it necessary to have the iceman call daily or in fact to call at all. The delivery of ice has been until recently the best method so far devised. But times are continually changing, and due to the progress of the American housewife, she now requires a better system of refrigeration. The Molesworth Refrigeration system supplies this need.

The new idea is an outgrowth of household needs. Refrigeration produced in the home at a greater efficiency without requiring delivery of ice is a long-felt need. The old system of making ice was to take machinery and chemicals, install them at a great expense in an immense, centrally located plant, and there the ice was produced. This ice was then cut up and delivered to the home. But now conditions have been reversed, and the "makings" are delivered to the home and refrigeration produced there.

In modern homes in Orange county today, the refrigeration man comes only once a month to deliver the service. The Molesworth service is better because of its convenience, cleanliness, and safety, and because it is colder.

C. E. Molesworth, a resident of Santa Ana, is the designer of this service. Mr. Molesworth has been a refrigeration engineer for 23 years. During a lifetime, he has noted the waste of the old methods, and has worked on a plan to bring refrigeration in a more practical form into the home.

While the general method of refrigeration that he is using has been in practical use for years, he has perfected equipment, and introduced new mechanical principles which make this system the most perfect yet devised.

The Molesworth refrigeration system is notable for its lack of machinery and any moving devices to get out of order or to require watching. The principles that govern its operation are as simple as those governing water running down hill.

The machine operates on a vacuum principle. The refrigerator is controlled entirely by the vacuum and exposure of the freezing coil to the air in the refrigerator absorbs the heat, cools the box and preserves the food.

The temperatures in the ice box are under perfect control and range from 15 degrees above zero in the freezing chamber to 40 above in that part where the foods are kept from one meal to another.

The plant is located at 1428 West Fifth street, Santa Ana. The present equipment is sufficient to take care of 500 homes. It will be enlarged as the number of services increase. M. D. James, also an experienced refrigerating engineer, has associated himself with the firm.

TRUNK FACTORY AT FULLERTON IS IMPORTANT

When C. D. McDonald was knocking about the coast, erecting huge buildings in many states and in Canada, he suffered the usual human woes at moving time.

"Why not have a complete house to carry about in a trunk?" he asked himself one day. He did not stop with the question, but pursued it to its lair in the realm of travelers' needs. Some years later he is found in Orange county with a solution that is worthy the attention of all. His factory at Fullerton now turns out trunks that literally carry everything one is likely to need on a trip of a hundred miles or many thousand miles. Incidentally, McDonald solved for himself another problem, that of whether it is better to be engineer on somebody else's payroll or architect of one's own fortunes. Perhaps the story of the Collapse Comfy Camp will reveal the solution of the economic problem.

Sales Good Here

West Commonwealth street, in Fullerton, is eminently located for factory work, and yet a neat, shaded and inviting place to live. Here McDonald has finally placed his factory, the Collapse Camp Bed company, with a stock of goods and machinery worth at least \$60,000, as against a paid in capital one-fourth as large. Such an installation is one to take pride in, especially where the sales are good. And Orange county is proving a good field for the salesman with good goods. The output is not confined to local distribution, however. A new sales office has been opened in Los Angeles. Another is established on North Main street in Santa Ana.

Always an outdoor man, and yet for years confined to office, construction camp and ship, McDonald finally set to work to embody his idea in collapsing tents, tables and beds that would take up the least space and yet carry real comforts wherever one might go. His marine and mechanical experience stood him in good stead, as did his knowledge of materials.

Study in Materials

So we find today, his beds are made of the lightest kapok material, one which does not absorb moisture. He employs Scotch canvas webbing instead of materials that chafe and cut the mattress. German silver non-rusting metal is used in exposed places and light spring steel instead of wooden poles.

The folding of a bed, a mattress, a table, chairs, and all the necessary camping materials up into a small trunk, which is easily carried on an automobile, is the striking result of his efforts. And the various pieces are convertible into extra beds, benches, head rests, clothes hammocks, and many other things. The trunk itself is made of sections of the table and the chairs.

Factory Most Efficient

Twelve men are steadily employed. The workshop contains crimpers, drills and cutting machines designed for the special uses of the factory, in themselves a great triumph of plant operation. These devices and the public demand for a good article reasonably priced have already placed the factory on a paying basis. Inventive genius employed in one's own factory has proved a solution for McDonald's economic problem and given him and thousands of others home comforts transported in a trunk to the great open spaces.

**LAY 50,000 FEET
OF PIPE MONTHLY**

An irrigated country is as good as its pipe, according to J. M. Wyne, of the Tustin Cement Pipe company, with yards in Tustin and Santa Ana. One is the more readily convinced of this when he finds that this firm has laid an average of 50,000 feet of irrigation pipe a month during the last eight months.

This output, totaling 400,000 feet, can be better appreciated, when translated into miles. Laid from Fullerton, through Anaheim and Santa Ana, to the beach at Newport, this quantity of pipe would make three good mains, most of it of 12-inch pipe.

Orange county ranks first in the world in total mileage of irrigation pipe in service. As water is destined to be used more and more carefully and economically, it would appear that this well-established cement pipe concern has great potentialities.

More than 20 years ago, Wyne and Fred Schwendeman, then living in Orange, decided they could make as good pipe as others were making, and started to work. A year ago, after long experience, they joined forces again, this time with A. V. Fewel, of Santa Ana, who is the other partner in the present organization.

Schwendeman was foreman of pipe lines on the big Irvine ranch for 15 years. Fewel and Wyne had been associated in business in Santa Ana since 1916. The firm regularly employs 28 men in the yards, and sometimes as many as 50, including the pipe-laying crews.

Pipe is all machine made by packer head type of machines, tamping, a strong pipe that becomes more durable with age. Distribution of Tustin Cement Pipe products covers a large portion of Orange county and spreads well into San Diego county. The pipes range from six to 36 inches in diameter.

The capital in this enterprise is all furnished by local men. The yards are running at full capacity, an indication, according to the management, that Orange county is enjoying business as usual.

FOR SALE—Complete camping outfit, 803 No. Main.
Rubber tired ball bearing skates, Hawley's.

Cut Irrigation Cost with the Right Pipe

We are not only making the pipe that gives irrigators maximum good results—but will lay it scientifically right.

Cement pipe made right and laid straight gives no trouble and should last for many years. Some of our work has been in for 17 years and is today as good as new. See it for yourself on the T. H. and H. R. Smith place on Prospect Ave., at Tustin. Then take time to inspect our later work on the Irvine ranch, the Marcy Ranch, the A. B. Haven Ranch, and the C. E. Utt Ranch on Lemon Heights.

People will Chew Gum

300,000.00 worth
Every Day in U. S.

At a penny a chew, 1-100th of a penny profit on the daily gum chewing in the United States alone would amount to \$3,000.00—but naturally, the profit is more than that, even when divided between producer and retailer.

OUR "SILENT" SALESMEN DO BIG BUSINESS

Already, in our comparatively brief period of activity, we have rented out many machines which sell "Twin Ball Gum" at a penny a chew. One hundred of these machines last year sold \$3500 worth of this tasty, candied gum. Every penny returned a profit, because these machines work for nothing, never lay off for holidays and never sleep. They commence to return a profit at the moment of installation. Hence our owners, among them several hundred Orange County folks, are receiving dividends regularly.

VENDOR COMPANY TO MANUFACTURE MACHINES AND GUM

The Vendor Company's factory is under way in the industrial district south of Santa Ana. It will make the machines and gum which the Unique Vending company rents out. This will keep the entire profit of producing and handling of this thrifty business within Orange county. Yet we will no doubt eventually do a national, international business, for all the world chews American made chewing gum!

MAN OF 80 IS STILL MASTER BOAT BUILDER

Eighty years old and still a master boat builder putting in his eight or nine hours a day, Captain G. V. Johnson of Newport Beach gives place to no man in the quality or quantity of work turned out. Born in New York, and grown to manhood in time to march with General Grant to Richmond, Captain Johnson has been a good boatbuilder for half a century, and those who know him say he is the best boat builder on the coast and has many years of usefulness ahead.

There is scarcely a shipyard on the Great Lakes, that Captain Johnson has not worked in. He became a specialist in building speedy craft of various kinds and sizes, and his yachts have won many of the races. About 35 years ago he came to the Pacific coast and built many fine pleasure boats on Puget sound, some of which were sent as far as South Africa. For about three years he has been located at Newport harbor.

"I never in my experience saw a place so well located and protected for a pleasure craft harbor as this right here," he said recently. He predicted large reinforcements for the present fleet of yachts in the harbor and a number of orders have been received this season for good sized boats. Among the orders for small boats, several have been received this spring from Stockton, California. Captain Johnson, and his son M. J. Johnson specialize also in small boats for family use, and in speedier sea-going types of cruisers.

TO MAKE AUTO POLISH AT NEW FACTORY HERE

To make every automobile in Orange county shine like new is one of the ambitions of E. W. Bruce and associates, manufacturers of varnish, renewers and polishes, who have recently completed their factory installations in the industrial district of Santa Ana. The marvels of modern chemistry are revealed by a visit to this new plant, which is already turning out finished products to compete in the American markets.

The realization of a dream of 30 years has come to Bruce in the equipment and operation of this factory. Since boyhood he has studied the finishing of furniture, fixtures and carriages and his inventive mind has enabled him to gather a knowledge of gums and wax rivaled by few.

Laboring often with explosive and inflammable materials, traveling into remote portions of the United States and Canada, fighting for markets in the big metropolitan cities of east and west coasts, he has pursued his ideal and finally has caught up with it on the plains of Orange county. As the rich soil of the country is the source of a luxuriant flora, so he is finding the commercial field here well suited to developing his business, one destined to spread far over the continent.

When the varnish renewer had been perfected in the kitchen laboratory of his home in Santa Ana, Bruce met an old friend from Kansas City and told him of it. The friend, a furniture man of prominence, took a sample with him, used it on a piano, which he left exposed to heat and cold in the attic for several seasons. At last he wrote back that Bruce's fortune was made—provided he could get financial backing to start a factory. This he did.

"We are already marketing our products through leading firms, and they expect to use them as fast as we can make them," said Mr. Bruce last week. "The varnish renewer, our masterpiece in the art of saving paint, will be in the hands of the distributors in about 60 days."

CABINET' FIXTURE BUSINESS GROWS

The Santa Ana Cabinet and Fixture company was organized on a small scale in 1919 by three men, A. M. Eaccon, J. Hansen and A. P. Lykke. These men have worked and succeeded together in a period that has been good for real producers, and their organization now employs 15 skilled workers and operates a large, well equipped plant on East Fifth street.

A special department of the cabinet and fixture business of this company is making show cases and shelves for retail establishments, which in the advancement that has come about through modern competition and other conditions, now call for the most convenient fixtures to make merchandise easier for customers to see and buy, and to facilitate serving them.

Built-in features for homes, that have become so popular in the compact styles of Southern California architecture, and cabinets and cases for offices form a considerable part of the company's work.

Bricks Made At Brea Placed In Many Buildings

Foot-hill clays are well adapted to brick and tile making, and are destined to be the source of much of the building material of the future. As timber grows scarcer, bricks and cement will come into greater use for homes. As fire limits are extended in the expanding cities, the cry is for brick and more brick.

One of the flourishing young brick factories of the county crowns a knoll in the northeast section of Brea. The Brea Brick company turns out good brick at the rate of 75,000 a day and can hardly keep up with its orders. Early enlargement of the plant, with addition of a tile department, is planned by Charles M. Haaker, president and manager. Mr. Haaker knows his bricks and may be found any day arranging for shipments. Some of the big kilns, made of "green" bricks and plastered over to confine the heat, contain as many as from 600,000 to a million bricks.

Orange and Los Angeles counties so far have taken care of most of the product. The new El Monte school is being built of Brea bricks. Telephone buildings, stores and numerous bungalows are also being erected with material from this plant. President Haaker and Secretary William A. Culp think this record is pretty good for a yearling and have no doubt their market will gradually extend over the southwest.

Barnhart Shovel In Use for Year Remains Sharp

Into the shop of A. J. Barnhart, at Placentia, last week, came A. C. Stansbury, first purchaser of one of Barnhart's self-sharpening shovel cultivators. Stansbury said his cultivator was still doing fine work after a year's regular use, and that it was "in great demand among the neighbors." Frequent sharpening of the shovels is required by many cultivators. This shovel, patented by the local man, is one of the newest chisel types, and penetrates deeply without bringing the moist soil to the surface to dry out.

Bung-Lo GAS FURNACES

for even heat throughout the house

The Bung-Lo Furnace will keep your home at a given temperature. This means health and convenience—it smooths the way of domestic life. You set the thermostat at a certain figure, and without further attention your rooms will be kept at that warmth—it won't vary more than two degrees.

You can start and stop this even flow of

heat throughout your home by a touch of a button. It responds instantly—it stops instantly. No over-heating—no chilly rooms, where Bung-Lo is used.

This is the better way. You get two or three changes of warm fresh air per hour in each room. Protect your family's health with a Bung-Lo Gas Furnace.

VISITORS CAN SEE MATTRESS MADE AT PLANT

One of the dark secrets of modern times that is a long time coming to light is the question of what goes into the mattress you sleep on. Even the large manufacturers apparently differ as to whether the public should be given a better mattress than it will appreciate, or one that will "get by" for long enough to outlast the debt an honest maker is supposed to owe the consumer.

But there is no unknown quantity in the mattresses turned out by E. L. Struble, proprietor of the Santa Ana Mattress company, 216 French street. His patrons frequently visit the factory and watch the proceedings by which their future sleeping hours are safeguarded.

Struble has built up a consid-

Armless Clerk Is Skillful with Pen

SYRACUSE, N. Y., May 18.—Armless though he is, Frank Vail is acknowledged the best penman in the employ of S. C. Duff & Son company, wholesale butter and egg dealers, where his ability to write with a pencil between his teeth enables him to hold the position of billing clerk. Although crippled by an accident that would have made most men absolute dependent for life, he not only earns his own living, but cares for his aged mother as well.

Protected Birds Ravage Orchards

WENATCHEE, Wn., May 18.—Flocks of gorgeously plumed Chinese pheasants infesting orchards and uplands of this section of the northwest make life a burden for gardeners and fruit growers. Game laws prohibit the killing of the birds, so they continue to rip out spring gardens and fly through open windows into family circles. To shoot away the pheasants or chardisks must rise early, for they do much of their prowling just at daybreak.

erable business in Southern California, selling direct to the individual consumer, to hotels and resorts. He recently received an order to make the mattresses for all the luxurious cabins at Mile High Resort, at Strawberry flats, in the San Bernardino mountains.

"Our renovating work shows us that a great deal of junk is put into mattresses, even some that sell at respectable prices," says Struble. "So far as we can we are stemming this tide by making a quality article. For our better mattresses we use an interesting material called Kapok floss. It grows on the island of Java, is something like cotton. This material is so naturally dry and buoyant that it is used also in the manufacture of life preservers. In mattresses it is indeed a sleep preserver. Visitors are welcome at our factory."

VENDING FIRM CONSTRUCTING NEW FACTORY

Already firmly established as a Santa Ana industry, the Unique Vending company, distributors of sugar coated chewing gum and vending machines, is making extensive plans for the future as evidenced by the order for new equipment which has gone forward. The equipment will be installed at once in the Vendor company's new factory being built in the Santa Ana industrial section.

Will Rent Machines
The Unique Vending company will rent out the machines and sell the gum that the Vendor company produces, but in the meantime it has a large number of machines in operation.

These little machines, selling candied chews at a penny each, are so economical in their salesmanship that they will return a nice profit on money invested in them though their sales should be no more than two cents a day. Sales by 100 machines last year amounted to more than \$3500, or \$35 each, according to a printed statement of the company.

The gradual increase in the number of vending devices to handle articles in universal demand is evidence of a general tendency toward reducing the cost of distributing goods. A machine needs no holidays, never indulges in a grouch, and never sleeps. The total amount of goods sold in this way in the United States is astounding. M. L. Flanagan, assistant treasurer and sales manager for the Unique Vending company, with headquarters in Santa Ana, calls attention to the impressive totals rolled up by various vending devices. He cites, for example, a weighing scale kept in a Santa Ana store which during 1924 registered 20,000 "weighs".

The machines put out by the Unique Vending company are extremely economical, and, through arrangements under which they are placed, they commence to return profits the moment they are installed. Their contents are attractively colored ball gum chews that come out one at a time on insertion of a penny. Seventy per cent of sales made by these machines are to grown-ups, according to a check-up, which does away with any idea that they are merely a toy for children.

According to figures cited by the company's prospectus, the people of the United States spend \$300,000 every day for chewing gum, and exports to foreign countries are growing year by year. This indicates a field large enough for considerable enterprise, and with the handy machines and attractive product the Unique Vending company looks forward to securing a national distribution in due time.

Officers and directors of the Unique Vending company, whose head offices are in Santa Ana, where several hundred people are financially interested in the company, are: G. K. McEwan, president; E. L. Matthews, first vice-president; F. M. Bottorff, second vice-president; J. F. Ranney, treasurer; E. C. Roper, secretary, and P. B. Fidel, director.

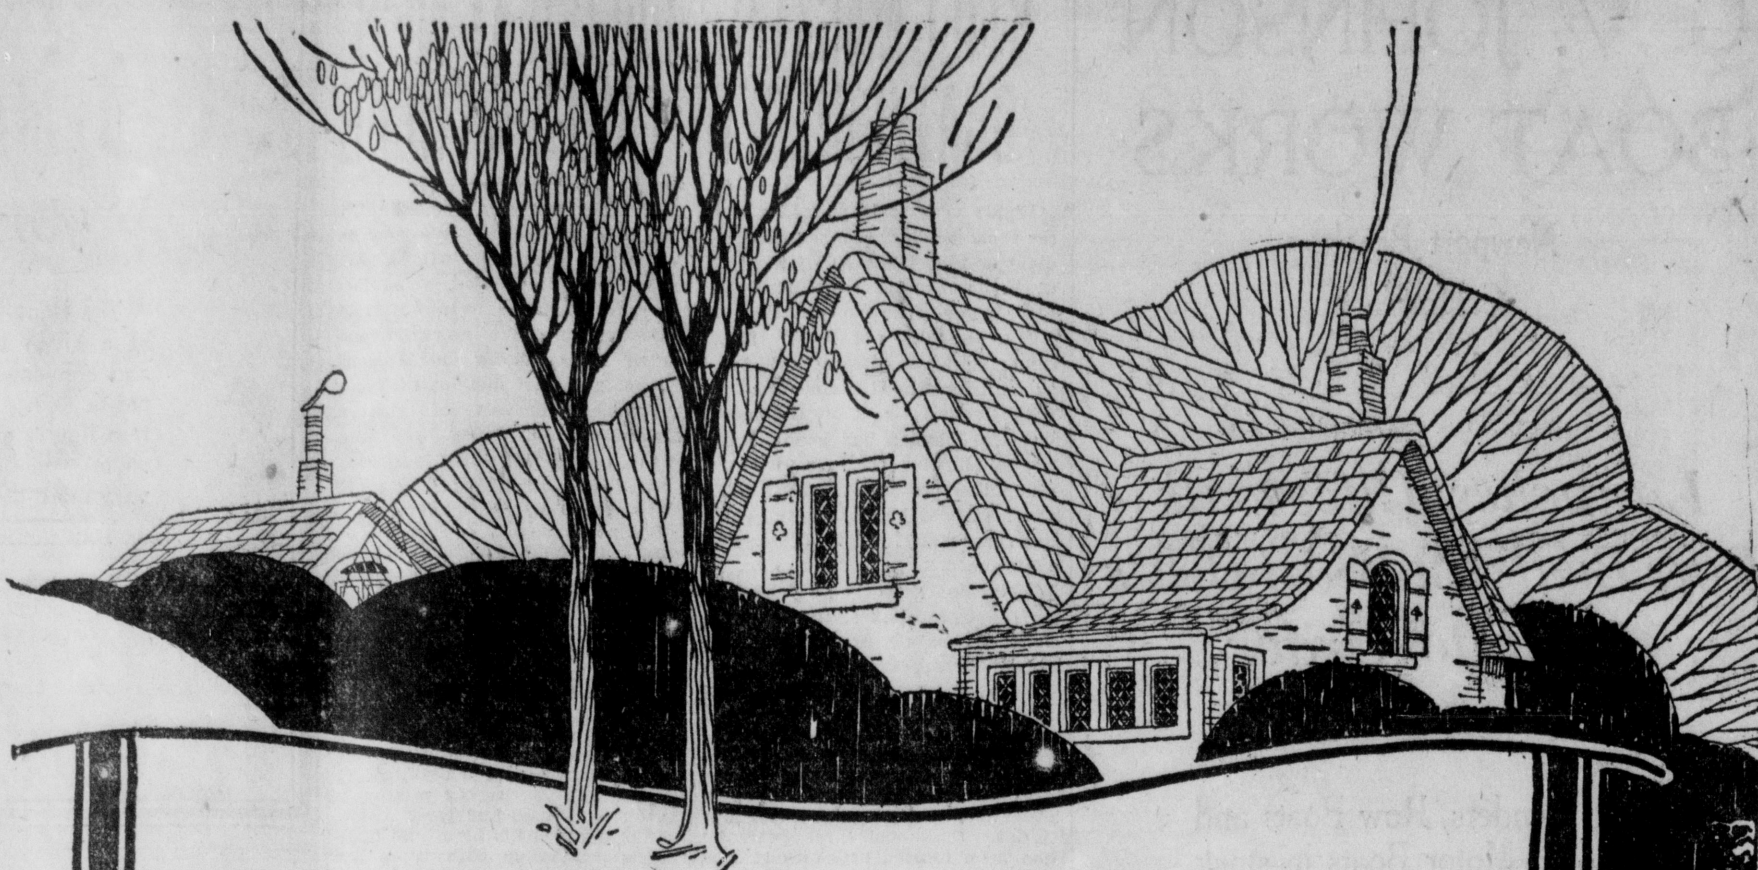

UTT JUICE CONCERN SHIPS TO PORTO RICO

Fruit juices more and more occupy a prominent place in Orange county industries. If you chance to be from elsewhere and drive through this county, do not fail to stop at one or more of the cities astride the King's highway and call for a drink of orange juice or lemonade or California grape juice. You will get the freshest and the best, also the most for your money. Grape juice has been added to the list of popular luxuries in the last few years. More than 400 years ago, Columbus discovered and claimed Porto Rico for Queen Isabella, of Spain. Today that island is the biggest single buyer of Queen Isabella grape juice, manufactured and bottled at Tustin. The Utt Juice company of Tustin, has other valued customers throughout most of California and in Arizona. C. E. Utt and A. L. Schellhaus are owners and managers of this new factory. For many years, Mr. Utt has been developing wonderful orchards and vineyards in the foothill regions and finally production of grapes was joined to the manufacture of juice in a very practical way. American Concord grapes from the sunny hillsides are pressed for the mild flavored juice, which already rivals that marketed by some of the oldest manufacturers in the United States.

The juice output of this factory is already worth over \$20,000 annually. It is believed that Mexico and South America will soon buy large quantities, and for this reason the industry is expected to expand in the great grape-producing state of California. Mr. Schellhaus believes the county harbor will play a part in this development of foreign commerce.

The grapes are picked in late summer and fall, and are crushed and stored at a rate of some 2500 gallons a day. Interesting processes keep the juice sweet and preserve its fresh flavor. As needed, the product is bottled and labeled, some of it with labels printed in Spanish. The factory also manufactures a grape jelly, which, by reason of its purity and taste, is rapidly displacing older packs.

FISHING INDUSTRY GROWS
Two dozen species of sea food are shipped annually out of Newport Beach to western markets, with mackerel, smelt, halibut and barracuda leading in quantity. The tonnage of this export business amounts to more than half a million pounds. The industry of drying and canning sea foods is springing up at the beach.

Among the Leaders In a Paramount Industry

The Payroll's the Thing!

In growing Santa Ana greater payrolls is the ingredient which will carry us on to a city of 100,000. The Santa Ana Lumber Company feels that it is forging to the front as a part of the community's greatest activities—the building industry. Our annual payroll totals \$100,000, distributed among 50 or more employees among which are 30 skilled mechanics and lumber experts. They are investing and spending this \$100,000 yearly in Santa Ana.

The Investment Counts!

Lumber distributors, with others, must fight the outside competition which comes in to cut a swath in its home plant overhead. It is the industry which establishes in Santa Ana and develops this community that deserves the support of home folks. Our investment in this city amounts to a quarter of a million dollars. Tax on this sum is no mean factor. Beyond this yield it adds value and earning capacity to Santa Ana. It tends toward the prosperity for which we are all striving.

The "At Home" Policy

It is not our policy to preach the doctrine of trade at home only to drop it by the wayside. We employ Santa Ana men and patronize Santa Ana merchants and manufacturers so far as it is possible. Trucks, motor cars and accessories; printing and supplies; brick, sand, gravel and building material; architectural service, iron work and building specialties make up a part of a long list of these purchases. It is conservative to say that this increases local trading \$100,000 yearly.

The Proper Spirit

More than all this we believe Santa Ana and Orange County should be wealthier and greater—better equipped for bigger things. We are behind any movement to boost our community. During recent months we have docked three quarters of a million feet of lumber at Newport Harbor. We believe that tonnage is better than talk in winning a harbor. We hope and strive for greater opportunity so that we may participate therein and profit thereby. In this we are but a party of a great progressive majority. It must be the right spirit because Santa Ana is winning new homes and new industries through this united effort.

Santa Ana Lumber Co.

Fourth at Artesia

Mattress Integrity

A QUALITY MATTRESS IS CLEAN WHEN YOU GET IT!

We make mattresses, and also we renovate them. So we know, from both angles, what goes into them, and we cannot emphasize too much the advisability of buying what you absolutely know to be REAL QUALITY.

In our best grade mattresses we use the famous Kapok Floss, from Java, the softest and most cushiony material available for the purpose.

Watch the Process Yourself

We are glad to have patrons visit our factory and see the process going forward step by step. Through strictly adhering to a quality policy we are building up a large patronage for our mattresses, pillows and cushions.

SIGNIFICANCE OF INDUSTRIES SHOWN

(Continued from Page 17)

transition from one line of effort to another should continue.

First California was a great wide sweep of country devoted to stock raising. Settlements were few and far between. Then came the era of the great grain ranches, to be followed by the cutting up of the land into smaller ranches and the practice of irrigation methods. This to be followed by more intensive cultivation in orchard and on the truck farm. This method of farming again to be succeeded in a great many sections by the subdivision of orchards, fields and farms into residential areas. Now other areas of agricultural land will be turned over to industries and it is at this point where the greatest number of people per acre are employed and where highest values are reached. After all it is population that fixes prices; it is demand that creates a market, and where most people are located and employed there are land values highest.

Orange county is a wonderful garden spot, but it has certain areas where factories can be located without destroying the great values and at the same time placed convenient to all the facilities which go to make for successful operation. That is, they can be if the one important requisite—deep water facilities—can be provided. All Orange county is a field for industrial enterprise, all of the county being within easy distance of its harbor opportunity, with this one important factor taken care of.

Orange county must diversify its resources; it must develop every field of effort. It is only by doing so that a better balance of business and prosperity can be maintained. It should move carefully but quickly, as opportunities long neglected, are often lost for all time. It is time to act now when investigations extending all over the west are being made by manufacturing concerns which wish to locate on the western coast.

The land question which crops up so frequently will soon be settled according to all reports and an estimate of the acreage which will accrue to the county as a result of the settlement shows that probably 350 to 400 acres will become part of the assets of Orange county.

Not many counties in the United States can at a stroke create such an addition to its assets. Figuring the acreage at the lower figure of 350 acres, the possession of this land alone would warrant a considerable investment.

Without any work done on Orange county this land is of little or no value, but harbor improvement and development will make it worth several hundreds of thousands of dollars. The item of rental which could be collected as revenue each year from these lands when they are developed, is not to be overlooked. These lands can be rented, as already many inquiries have been made as to some sort of basis on which rentals can be estimated after harbor improvement is undertaken.

Until the ownership of particular areas is decided of course no leases could be made but among those who are in some position to estimate a suitable figure, no figure less than one based on a \$5000 an acre valuation has been suggested. If only 350 acres are secured when all the lands are improved and rented on a basis of \$5000 a year, the income from rental is equivalent to the payment of interest at five per cent on over two million dollars.

ORANGE RAPIDLY FORGING AHEAD

(Continued from Page 17)

greater climatic humidity, erected \$30,000 factory building and installed \$90,000 worth of new machinery. The largest department stores of the country feature "Thistle Towels." The quality and beauty of this merchandise is without an equal in the United States.

The California Fig-Nut company manufactures delightful cereal breakfast foods, Fig-Nut and Fig-Nut Agar, and has customers all over the country.

The Orange Ice and Creamery company is an enterprise only a year old, yet within the year a \$10,000 addition to the building and a like sum in machinery have been added. Catering to the wholesale and retail trade, this addition to the Orange industrial life has a bright future. It represents an investment of \$75,000.

Less than six months ago the Forget-Me-Not Cookie factory was an infant industry. It is now comfortably housed in a commodious building and is turning out 5000 dozen cookies daily. The product is sold over Southern California.

Here are located the only gold beating plants west of Chicago. The gold leaf is used in plating picture frames, sign work, etc. It is a peculiar art in that two thousand years have furnished a new way to beat and handle this gold which finally reaches the thinness of 120-1000 of an inch.

Three miles north of Orange and as a part of the Orange community district is located the Garber Brick and Tile company, representing a large investment. The tile is all hand-made after the pattern of the old mission tiling.

Citrus Packing Houses

Citrus fruit packing should properly be classed with the industrial life of Orange and vicinity. In Orange is located the largest exclusive orange packing house in the state, the Santiago Orange Growers association, and this house packs annually an average of 1000 cars of oranges. The Central Lemon association of Villa Park is the largest exclusive lemon house in California. There are a dozen citrus packing houses in Orange and vicinity employing 1400 men and women and with a payroll well over a million dollars annually.

In addition to the industries mentioned above there are located at

COUNTY IDEAL FOR MANY INDUSTRIES

(Continued from Page 17)

from \$350. to \$7,500 a acre. Every condition, be it a suitable site at a reasonable price, adequate transportation facilities, labor conditions, climate, power, fuel, water, raw materials, markets or what not, can be met in a most satisfactory manner in Orange county.

Opportunity in Textiles

One of the greatest opportunities, which Orange county offers, is in the textile field. Bordering as it does upon the Pacific ocean and with an abundance of very high class labor, 85 per cent of which is American, it is peculiarly desirable as a location for textile mills and industries of either cotton, wool or silk.

Southern California and Arizona grow the best grades of cotton in the world, and Orange county enjoys a low rate from these agricultural districts to the door of the manufacturer.

The same condition applies as to wool textile manufacturing. The western grazing areas produce by far the greater bulk of the wool grown in this country. Whatever imports are made of wool, come from Australia. This gives the woolen manufacturer in Orange county every advantage in securing his raw materials at a lower cost.

Ninety-seven per cent of the silk industry of the United States is located in the east. In this manufacture there was used last year more than 50 million pounds of raw silk, and 90 per cent of this raw silk comes to us from China and Japan.

This means that raw silk, which is carried on special trains at extremely high freight and insurance rates, must be unloaded from the boats on the Pacific coast, hauled 2000 miles across the country, manufactured into the finished product, and a large portion of it, returned to western markets.

\$25,000,000 Worth of Silk

Southern California uses annually \$25,000,000 worth of silk, and \$70,000,000 is a safe estimate for the Pacific coast states, \$8,000,000 more for the mountain states, and approximately \$6,000,000 for export to the Orient.

All this vast amount of money represents the finished product that first must be shipped to the east as raw material, then back here for distribution. With the freight rate of from \$5.00 to \$9.00 per hundred pounds on raw and finished silks, for shipment across the country, it is readily apparent that the Pacific coast should have its own silk mills and silk textile manufacturing.

With conditions for this class of manufacturing ideal in Orange county, proving 100 per cent perfect; raw materials nearer at hand than to eastern manufacturers and a ready market right here at our very door, the opportunity to locate here is now.

Other Industries

Other industries are finding in Orange county ideal conditions for the manufacture of their products. In this connection may be mentioned the automobile industry, which is beginning to establish itself here now for a good and sufficient reason. Nowhere in the world are conditions for the motoring public so ideal as here.

The manufacture of glass in Orange county by three glass plants established here during the past year, augurs well for the successful development of this industry and already points the way to Orange county becoming the chief supply center of glass for Australia and the Orient. This for the reason of its geographical proximity to that market, which enables the Orange county plants to make quicker deliveries by 20 days and at a lower cost in transportation.

Nearly every other industry of importance will find in Orange county all the conditions to the successful manufacture of its product. Space will not permit to go into detail concerning all of the different branches of industry now established here. Suffice it to say in conclusion that, Orange county is destined to become a great industrial center for reasons of its geographical location on the world's highway of trade and its accessibility to the essential raw materials, cheap power, ideal climate and ready markets.

FROM ORANGE COUNTY TOWNS

STANDARD BANK IN FULLERTON CHANGES NAME

FULLERTON, May 18.—The Standard Bank of Orange county, for five years a local institution in this city today became the First National Bank of Fullerton, official permission for such a change having been received by S. W. Smith, president, from the comptroller of currency in Washington, D. C.

The change became possible when the original First National bank of this city merged with the Pacific Southwest Trust and Savings bank, thereby giving up its charter as a national institution.

The new First National bank has had a growth, during its comparatively brief life, that is extremely pleasing to its sponsors. It was organized October 12, 1919, with a capitalization of \$50,000 and surplus of \$5,000. April 19, 1925 the capital stock was increased to \$100,000 with a surplus of \$11,500, on April 19, 1925.

The officers of the institution are: S. W. Smith, president; H. L. Hale, first vice-president; E. E. Beazley, second vice-president; A. A. McCormick, cashier and assistant secretary; Mauricia Spring, assistant cashier; Bert Annin, secretary and J. H. Land treasurer. The directors are S. W. Smith, E. E. Beazley, W. L. Hale, H. W. Schultz, R. T. Davies, C. W. Almes, J. H. Lang, D. M. Thompson and Bert Annin.

L. A. ROTARIAN IS SPEAKER AT BEACH

HUNTINGTON BEACH, May 18.—Maurice Houser, a member of the Los Angeles Rotary club, was the speaker at the regular meeting of the Rotary club Friday noon at the Obar banquet hall. Houser gave a very interesting talk on "Boys Work." He spoke on the subject in regard to luncheon and service clubs assisting the boys in their play and work. Members of the local club gave short talks. Wiley Griffith and Willis Warner were the chairmen of the day.

The club entertained several guests, among them being three visiting members including Houser of Los Angeles, Len Swales and William Spurgeon of Santa Ana. Other visitors included George Miles, Santa Ana; Rev. S. J. Rogers, S. E. Andrews, Donald Woodington and Eber Flaws of this city.

Building Permits At Orange Listed

ORANGE, May 18.—Building permits, totaling a value of \$4475, have been issued here by Cal D. Lester, city clerk, since May 1, according to the city records.

The largest permit, for \$4000, was issued to J. E. Prentice of Santa Ana, who is contemplating the erection of a dwelling at 2310 East Walnut street. The frame structure previously occupying the property was destroyed a few weeks ago by fire.

Other permits follow:

F. B. Hunter, South Main street, chicken houses, value, \$150.

H. C. Moss, remodeling of house and erection of garage at 183 North Grand street, value \$2125.

Mrs. L. C. White, garage, at 615 East Almond street, value, \$200.

Lacy Hobson, dwelling and garage at 404 South Pixley street, value, \$2000.

Tustin News Notes

TUSTIN, May 18.—Mrs. L. A. Cook was the hostess to the members of the W. C. T. U. at her home on D street. Mrs. Sarah Brown, president of the organization, was in charge of the meeting. Following a short business meeting, round table discussion was held on the subject of "Narcotics." The prize essays written recently by local grammar school students were read. Arrangements were made for the next meeting, which will be held May 25 at the home of Mrs. Sarah Brown.

Mr. and Mrs. Floyd Turner and Mr. and Mrs. Frank Greenwood were the hosts at the regular meeting of the "Neighborhood Club." Mrs. Owen Murray and Roy Rannels were the winners at cards. Mrs. Forest Collar and Arthur Lindsey were awarded the consolation. Refreshments were served at a late hour. Among those present were Mr. and Mrs. Owen Murray, Mr. and Mrs. Earl Sharpless, Mr. and Mrs. Arthur Lindsey, Mr. and Mrs. Roy Rannels, Mr. and Mrs. Earl Murray, Mr. and Mrs. John Kiser, Mr. and Mrs. Forest Collar, Mr. and Mrs. W. B. Risk, and the hosts, Mr. and Mrs. Floyd Turner and Mr. and Mrs. Frank Greenwood.

Mrs. Alice Freeman, accompanied by her two children, has arrived here from Calexico to spend the summer with her parents, Mr. and Mrs. J. A. Phiney.

Barley Cutting Gets Under Way

TALBERT, May 18.—The cutting of barley has started. A few ranchers, however, moved their crops two weeks ago. Local men who have bailing outfits are getting them in readiness to begin the bailing season this week. The hay in general this year is short, but of fine quality.

EDITOR, BLIND FOR 20 YEARS, SEES BY RADIO

ANAHEIM, May 18.—World's events are paraded daily before the blind eyes of Henry Kuchel, 66-year-old editor and publisher of the Anaheim Weekly Gazette, and are "seen" through the miracle medium of radio.

More than 20 years ago Kuchel, through the playful poke of his baby's fingers in his eyes, became totally blind.

During the years in which he continued to edit each line of copy and dictate all the editorials that went into his paper, he was kept fully informed on the news happenings of the day by his wife's faithful reading of all the wire stories and outside papers to him.

With the recent advent of radio came a new "pair of eyes" for the man who has been robbed of vision for 20 years.

Second Oldest in State

A craze, perhaps a tentative fad for thousands, radio is the life blood of Kuchel's weekly publication, second oldest in California.

For Henry Kuchel now edits his entire paper by radio!

"This little headset is the best reporter I ever had," say Kuchel, sitting at his desk before the radio

box. "There are few persons now who can 'see' more than I do."

Kuchel was born in San Francisco in 1859 and, while a baby, was brought here by his parents.

When Kuchel was 11 years old George Washington Barter launched the Gazette. Young Kuchel went to work for Barter, turning an old Washington hand press. After the editions had been printed each Saturday afternoon, Kuchel delivered them on horseback to the few subscribers.

Followed a few years in which Kuchel roamed the country as an itinerant printer. In 1889 he returned to Anaheim to become editor and publisher of the paper he now heads.

Son to Succeed

Conrad Kuchel, his 25-year-old son, has been associated with his father during the past few years. Soon, however, Henry, Jr., now in high school, will take his father's chair, Kuchel says.

"Then," says the blind editor, "my ambition will have been realized. The boys can run the paper and I can sit home and listen to the radio all day and maybe all night, too."

Talbert

TALBERT, May 18.—L. M. Von Schiltz, who has for a number of years been one of the most extensive ranchers of Greenville section, has moved to his ranch one half mile north of Talbert, where he and Mrs. Von Schiltz will make their home.

Mr. Von Schiltz is making extensive improvements on his dairy ranch. An electric motor has been installed, the extension of the electric line to his place having been completed. New pipe lines are being laid, new fences put in. Improvements have been made on the house, which has been repainted.

A contest which was engaged in the past week by the pupils of the seventh and eighth grades of the Fountain Valley school ended Friday with a party given in the school room by the two losing sides to the winning side, which was captained by Dora Davis. The Greens, under the name of "Rudy" won and their opponents were "Sparkplug" or orange team, captained by May Worthy and the "Barney Google" or red team captained by Billie McCormack.

The room was trimmed in wreaths of honeysuckle and school was dismissed at 2:30 o'clock. For two hours the pupils, teachers and their visitors enjoyed games and the party closed with the serving of refreshments. Present were the winners, Dora Davis, Cash Milwauke, Lola Gilbert, Doyle Gilbert, Wayne Fulbright and their hosts, Billie McCormack, Joe Rodriguez, Mary Ellen Isenor, Jennie Lecravin, Frank Joshiel, Shiel Matsui, Delbert Preston, Willie Starkey, Henry Boer, the teachers, Miss H. Cummings, of the seventh and eighth grades; L. Hayes of the fifth and sixth; Mrs. M. Kelly of the third and fourth; Mrs. C. Denet of the second and Mrs. S. Burd of the first grade, and Harry Fulton, one of the board of directors of the school.

Pigs grown on the high altitudes of Tibet are covered with thick, rusty-colored hair, quite different from the half-naked animals of the plains.

Nine million of the world's annual production of twelve million pounds of camphor is produced in the island of Formosa, which is only 257 miles long.

London is now able to speak by telephone to virtually all of the countries of Western Europe.

In some sections of China the graves are annually decorated with streamers of colored paper.

After spawning, Pacific coast salmon soon undergo tissue degeneration and die in the fresh water streams.

London has nearly 1,700 regularly organized charitable and philanthropic institutions.

The largest Sunday newspaper ever issued in London consisted of 32 pages.

How Puny Weak Boys Grow Strong

New Way to Take Cod Liver Oil—McCook's Cod Liver Oil Tablets are Sugar Coated and Kids Take Them Like Candy.

Make that underdeveloped boy or girl of yours grow strong, vigorous and robust in a short time by giving him McCook's Cod Liver Oil Compound Tablets for 30 days.

It's the new way to take cod liver oil. You'll be surprised at the results and especially if the child has rickets, or is weak, or has no appetite. Your doctor will tell you that there is nothing in the world so good for rickets as cod liver oil.

So now, Mother, you can help the little underdeveloped, sickly, backward child to grow normal again so that he can play and romp with other children.

And remember that if you aren't delighted with results after 30 days trial—why White Cross Drug Co., C. S. Kelley Drug Co., Mateer's or any drugist will gladly return your money.

Try them on this fair basis but be sure—very sure—to ask for McCook's Cod Liver Oil Compound Tablets—the original and genuine—60 tablets—50 cents.

Here's a firm which believes in advertising and believes that horse-shoes are lucky. Several years ago Julian and Trump, blacksmiths of Greenville, Ill., began piling up the old horse-shoes taken from animals. The chimney-like heap contains thousands of shoes and weighs several tons.

In 1849 the National Library of France purchased a map which has recently been declared to be the identical map used by Columbus on his voyage of discovery.

Man Fined \$17.50 For Shot at Robin

MIDDLETOWN, N. Y., May 16.—Alex Amols of New York, caught in the act of shooting a nesting robin, was taken before Justice Song at Livingston Manor, in Sullivan county, and fined \$17.50. Game Protector Daniel R. Bacon testified that while he was driving through the town of Rockland he saw Amols hit the bird. The officer placed the robin in a box and took it home to care for it until it was able to fly.

BATH HOUSE AT NEGRO RESORT BEING RUSHED

HUNTINGTON BEACH, May 18.—The huge bathhouse now under construction on the property of the Pacific Beach club, a negro summer resort colony located between this city and Newport Beach, will be completed within the next two weeks and will be open for the summer trade of bathers who have invested in the resort. It was dedicated today by workmen who are on the job at the tract.

Work was started last week following a long period of inactivity on the part of building contractors, who are said to have a contract for \$120,000 worth of buildings to be placed on the ground. The land lays about two miles southeast of Huntington Beach along the beach between the Pacific Electric tracks and the ocean. Considerable difficulty is being experienced in getting the tracks by the club who were refused a right of way across the tracks by the railroad.

To Be of White Stucco

Charles E. Rowe, Long Beach contractor, who has the contract for the buildings has a large crew of men working on the bathhouse. The structure will be of white stucco. All of the buildings which will be placed on the property will be of white stucco and will be placed on pillars. Pillings for the bathhouse were driven some time ago. The building will be 100 feet wide by 100 feet long. It is reported, and will accommodate approximately 2000 people.

Plans for the club include a large club house, dance hall, banquet room, amusement concessions, 200 cottages, a white stucco fence about three sides of the land and a sea wall in front.

Numerous setbacks have been encountered by the builders who have experienced trouble in securing service. Despite the alleged refusal of the Pacific Electric railroad to grant a right of way to the property, the railroad has hauled lumber to the scene of building during the past few days.

Meanwhile local persons, who have offered determined opposition to the project, are still negotiating with county supervisors to have land along the coast between this city and Newport Beach condemned for public park purposes. Local civic bodies have also taken up the proposition of condemning the land. They base their plea on the grounds that they are opposed to any organization which will fence off and prevent the general public from enjoying any portion of the beach along the coast of Orange county.

It is understood that those backing the colony will make every effort to make the project a success. The company behind the summer resort is understood to have a large financial backing and have already expressed their intention of fighting any action intended to cause them to lose the land.

Swimming Pool At Fullerton School To Open May 29

FULLERTON, May 18.—The Fullerton Union high school's new swimming pool will be opened with ceremony on May 29, it was announced here today. The executive board of the school is planning a grand fiesta to celebrate the occasion and a program for both the afternoon and evening of the day is planned.

The pool itself will be thrown open to the public at about 3 o'clock in the afternoon and numerous events will take place there. Carnival features, including waffle stand, a vaudeville show and bowling alley, will be in charge of the faculty members.

Cloudy Weather Forces Chili Men To Replant Crops

TALBERT, May 18.—The cloudy and foggy weather lately has worked a hardship on the chili growers who are now forced to replant a large acreage of their crops due to the inroads made by the worms which flourish in the dull weather.

Planting, which began about May 1, continues. Some of the more extensive ranchers have not yet completed their planting and others have delayed purposely on account of the weather.

Fountain Valley Will Graduate 8

TALBERT, May 18.—The members of the eighth grade of the Fountain Valley grammar school who are graduating June 12 are preparing for the graduation program and have chosen as the class play "One Maddening Night" which will include in the cast all the eight class members.

Rehearsals of the play will not begin until after the completion of the examinations.

The following are members of the graduating class: Deda Gilbert, Henry Boer, Mary Worthy, Jennie Lecravin, Mary Ellen Isenor, Dora Davis, Joe Rodriguez, Wayne Fulbright.

Orphans' League To Have Booth At Orange Show

ANAHEIM, May 18.—One of the booths at the coming Valencia Orange Show which will open here Friday, will be maintained by the crippled children's association of northern Orange county. Mrs. Thomas McFadden and Mrs. Fred Cline, both of Placentia, have received big donations of oranges, lemons and grapefruit to sell at the booth, and the various women's organizations will furnish volunteer workers to have charge of the booth during the hours which the show is open.

Many Seek Place As Principal Of New High School

BREA, May 18.—Twelve applications have been received by the newly elected high school board for the position of principal of the school soon to be established here. No selection has yet been made by the trustees; a special meeting having been called for tomorrow night, when it is thought such action will be taken.

Former Nobleman Turns Errand Boy

VIENNA, May 18.—What has happened to the old Austrian nobility since the Hapsburg dynasty was overthrown and the Republic of Austria established?

This question—one of the first which is asked by American visitors to Vienna—has just been answered in part at a local police station.

Leonold Hapsburg, one of the famous old line which once dominated practically all of Europe, was hauled into court for riding over a postman while speeding along the street one evening on a motorcycle.

At the trial it was revealed that this former army officer is now running errands for a syndicate of motion picture houses, his job being to rush films from one theater to the other on a motorcycle. It was while thus engaged that he bumped into the postman.

The ex-nobleman was fined 20 Austrian schillings (about five dollars) by a police magistrate.

The postman was entitled to bring suit for damages also, but when he learned that the Hapsburger is having a difficult time supporting his wife and two children, he waived the right, saying at the time that he would not add to the misery of one who had already suffered so much through his fall from such a great position in life. Whereupon the nobleman-errand-boy returned to his work.

Drouth In Texas Causes Mexican To Go Southward

LAREDO, Tex., May 16.—As a result of drouth in Texas, thousands of Mexican farm laborers are leaving the country. On all highways leading to Rio Grande border points are to be seen daily great numbers of Mexican families, all trekking south to Mexico. Farm labor has been at a standstill for weeks and Mexican laborers find that the usual demand for their services no longer exists.

The molexodus exists of these laborers will, it is feared, create a serious shortage of farm hands when the planting and cultivation time arrives. It is not expected that many of them will return to Texas until next cotton picking season.

It is estimated by border immigration authorities that besides the thousands of Mexican laborers who have crossed into Mexico through regular ports of entry during the last few weeks, many more thousands have swum the river and escaped having record made of their crossing.

Man Fined \$17.50 For Shot at Robin

MIDDLETOWN, N. Y., May 16.—Alex Amols of New York, caught in the act of shooting a nesting robin, was taken before Justice Song at Livingston Manor, in Sullivan county, and fined \$17.50. Game Protector Daniel R. Bacon testified that while he was driving through the town of Rockland he saw Amols hit the bird. The officer placed the robin in a box and took it home to care for it until it was able to fly.

EVENING SALUTATION

Star of eternal morning,
Sun that shall ne'er decline,
Day that is bright with unfading light,
Ever above me shine!
For the night shall be all noontide,
And the clouds shall vanish far,
When my path of life is gilded
By "the bright and morning star."
—George Matheson.

COMMENDS LAW ENFORCEMENT

The National Automobile club, in publicity matter just issued, declares that "Orange county has made an enviable reputation in the regulation of traffic and its public officials are to be commended for the manner in which they have safeguarded their citizens, as well as motorists in general."

The comment from the club headquarters came as a result of the activities of Justice of the Peace K. E. Morrison, successor to the renowned Judge Cox, in which the new justice has taken the ground that "a person who drives his car at an excessive rate of speed through the business district of a town endangers the lives of everyone on the streets, and a speeder of that kind will get little sympathy from me."

The position taken by the National Automobile club is interesting and refreshing. It is to be hoped that its policy will be consistent. Hitherto automobile clubs have done a great deal to promote safety on the highways, but at the same time have been in duty bound to make an arrest of a member as easy a circumstance as possible. They pay his fine so that he won't be put to the trouble of appearing in court. If the law allowed it, we have no doubt that they would have men to serve jail sentences for their members.

However, there has been quite a change in the attitude of all of the automobile clubs. There was a time when one of the older automobile clubs advised its members not to motor through Santa Ana, because, forsooth, a law-breaking automobile driver might be caught and given punishment. The same club afterward issued proclamations in favor of severe penalties as a means of stopping reckless driving, but it continues to take care of its members who happen to be inconvenienced by the activity of motorcycle police. Probably there can be no serious objection raised to that so long as the automobile club does not send its attorneys into court to fight cases involving good public policy.

At any rate, the publicity matter sent out by the new National Automobile club indicates that its attitude in relation to speeding is right. There ought to be no condonance given by any automobile club to any member's recklessness or misconduct.

DEPENDS ON YOUR OFFICERS

The lawbreaker in America doesn't last long when the authorities go after him wholeheartedly.

Two weeks concentrated effort on the Atlantic coast broke up its rum row, designated aptly as "a national disgrace." Two or three federal vessels scattered the rum runners off the Southern California coast.

It has always been true in every city, every county and every state, and it is true in relation to the nation, that when those selling liquor illegally find that the authorities really mean business, that they are actually out on their trail, that the courts are waiting a chance to handle them, the traffic in contraband liquor is reduced forthwith from fifty to ninety per cent. Activity has an immediate effect.

And this is true in its relation to any city in Southern California. If a city is full of bootleggers—as a rule they are not as numerous as the sweeping statements of those who like to be thought smart and wise would indicate—you may rest assured that it is full of bootleggers for no other reason than that your police officers, constables and deputies are not making a business of going after the lawbreakers. Sitting back in contentment and handling just what cases are brought to them is one thing; the place that handles booze illegally along with a legitimate business, and the enterprising peddler ask for nothing better than that. Going out vigorously, making it known that you mean to enforce the law, is another thing; the booze-selling lawbreaker will hit for tall timber.

SOUTHERN LAND SETTLEMENT

A new land-settling movement is to be planned soon and gotten under way as rapidly as possible. It is directed toward some of the swampy-cut-over and abandoned farm lands of the South. The United States Secretary of the Interior, the commissioner of reclamation and other officials are to meet soon to discuss the whole problem. Everyone concerned is anxious to see the most businesslike procedure followed, with avoidance of many of the mistakes made in settling the West.

Congress has authorized federal co-operation with the states and will appropriate the necessary funds at its next session. There will be more careful selection of the settlers, for it has been discovered that knowledge and interest are essential to agricultural success. Responsibility for financing the settlers will be shared by state and local interests.

In addition to the importance of getting idle or waste land reclaimed and under cultivation, the movement is intended to stem the tide of farm tenancy in the South.

The industrial development of the southern states is a fine thing, but it should not and probably cannot be promoted at the expense of sound agricultural development.

CARELESSNESS ON FOOT

An analysis of fatal traffic accidents in one of the larger cities shows, according to the police department, that three-fourths of them were attributable to the carelessness of pedestrians.

There is something for the pedestrians to think about, before they do any more criticizing of automobilists.

Half the victims were children. Virtually all of the accidents, the police say, occurred outside of the congested district, and at times when the traffic was not heavy. These facts in themselves suggest the carelessness of the victims. It should be easier for a pedestrian to take care of himself under such conditions than in the thick traffic down town.

Careful driving is always enjoined. But the police declare that it is more important now to reform

the jay-walkers and keep children from playing on the street. A human being on his feet can usually control his own movements easier than an automobile can, if he will take half as much care as the driver is expected to take.

Beautifying the Highways

San Bernardino Sun.

Several communities in various parts of the state have undertaken the task of planting shade trees along the highways, most of them, however, within the city corporate limits. Yet a number have had a wider vision and have planted trees for some distance on both sides, so as to beautify the avenues of approach through which the cities are approached. The fact that our railroads and our highways enter most of our cities through their back doors is not calculated to make a first impression a favorable one. If judgment of the qualities of most cities were to be based upon what met their eye as an entrance was made few would be classed as either beautiful or desirable as a place of residence.

Chambers of commerce could perform their function of "selling the city" to possible investors in no more effective way than to make the approach by train or motor a beautiful and alluring one. Trees, flowers, well-kept lawns, neat and well painted houses, all have their attraction, and if this attraction begins some distance from the city itself in lines of trees bordering the roads, so much the greater will be the first favorable opinion be.

One thing is noticeable in this matter of tree planting, and that is a number of communities have selected such deciduous trees as elm, ash, walnut, locust, etc. It may be that trees are easier to get started and to care for, but they are far less desirable from a beautifying and advertising point of view than trees that have green foliage all the year around, such as may be grown almost anywhere along California highways in the great valleys and coastal regions. Tourists from the east are accustomed to see trees with barren limbs six months of the year. That is one reason why they leave home and come to California for the winter, and to be greeted here with bare-limbed trees instead of green foliage is a keen disappointment to them. In the matter of beautifying the highways with trees, we should always keep in mind that the time we need foliage on our trees the most is in the winter months. We have plenty of trees of that kind. Why not use them?

Booze and the Motor Car

Dearborn Independent.

Those persons who ascribe the number of traffic accidents to the increase in the number of motor vehicles are simply betraying the great American habit of attempting to reason without the facts. An agency that has investigated hundreds of cases says that booze is a controlling factor in nearly every traffic accident other than those where children or aged persons are involved. Sometimes it is the driver and sometimes it is the pedestrian who is affected, but liquor is the greatest cause. The automobile is essentially a "dry" affair, and though the country should go "wet" again, the automobile would force it to return to its dry status.

Scientific tests prove that moderate trial doses of so-called good liquor decrease both the speed and accuracy of the eye and hand movements and coordination and also increase body sway about seventy-five per cent. The patellar reflex, a standard gauge of nervous and muscular coordination, shows a negative variation of between twenty-five and fifty per cent. Moonshine and wood alcohol liquors and etherized beer, of course, make the above distortions of mind and body functions seem too mild for consideration. The bootleg consumer's ability to make his wits and eyes and arms and legs connect is almost negligible at times.

Prohibition is not a social experiment that society can either retain or toss aside; it is the only means whereby man can utilize the machinery that permits him to conquer the land and the sea and the air and survive. Progress itself is prohibitive of alcohol as a beverage.

Importance of River

Riverside Press.

Members of the Tri-County Reforestation committee who inspected the water spreading work on the debris cone of the Santa Ana Thursday came away with a quickened interest in the importance of water and a better conception of the tremendous and vital relation of this part of the prosperity and development of this part of Southern California. The Santa Ana has the largest watershed of any river in Southern California and that fact is not generally realized. The water shed is much greater than that of the San Gabriel river and far more extensive than the water shed area of the Whitewater, the San Antonio creek, the San Diego river. But vast sums are being spent on the streams in Los Angeles county for conservation and storage where only trifling amounts have been expended on the Santa Ana. It is hoped that the bill for \$50,000 appropriation now in the hands of the governor will be signed and that the survey made possible by the measure will be the beginning of a real program of state aid in the development of this great water shed, such as its importance justifies.

State Reapportionment

Riverside Press.

Los Angeles is threatening to put a measure for "constitutional reapportionment" on the ballot by initiative at the 1926 election. If that is done, the constitutional amendment proposed by the farm bureau of the state two years ago should also be put on the ballot. That plan provides for a strict population apportionment for the assembly and an apportionment in the senate that would give the majority to the agricultural counties. Fifteen senators would be allotted to Los Angeles, San Francisco and Alameda counties and the other 25 would be distributed among the other counties according to population. The amendment was before the legislature at this session in amendments proposed by Assemblyman Heisinger of Selma and Senator Kline of San Jacinto. That plan is very acceptable to Riverside and other rural counties and would command strong support outside the three big cities.

YOUR HEALTH

By DR. CLIFFORD C. ROBINSON

HEART SYMPTOMS

Most people suffering from an organic disease of the heart are not conscious of any pain.

But pain in and around the heart is frequent with a large number of people, and when felt is a fair warning that something is wrong.

The pain may be a symptom of a serious heart trouble or it may be due to a great variety of conditions having nothing to do with the heart, such as gas in the stomach, intercostal neuralgia, muscular rheumatism or pleurisy.

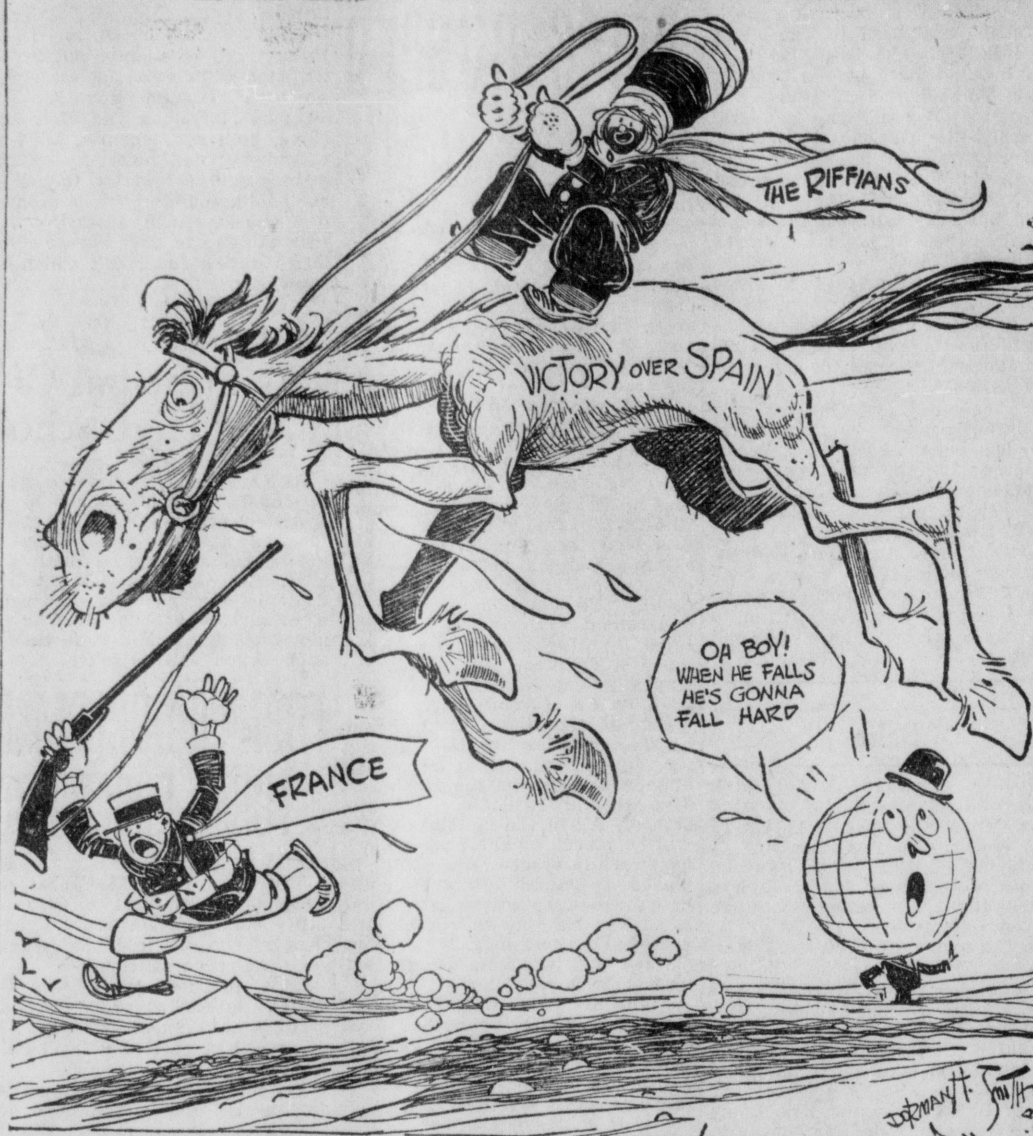

Being a bit "puffy" after climbing a flight of stairs may be the result of overweight, nervousness, lack of physical exercise, pleurisy or one of several other conditions.

Still it is wise to investigate. Heart trouble may be at the bottom of it.

Swelling of the ankles is a sign which at once suggests a poor circulation in the legs. This may be caused by a weak heart, an obstruction in the veins, disease of the kidneys or anemia.

The swelling usually is more pronounced when the patient has been standing on the feet all day. Often the swelling subsides after a night's rest.

Riding His High Horse

Common Sense Economy

San Francisco Chronicle

"Hope Springs Eternal," but optimists have had their illusions shattered many times. So even the most upward-looking kept their fingers crossed while hoping there might be something after all in the tax reduction promises in the 1924 Presidential campaign.

Now they have come to the traditional pot of gold at the end of the rainbow. Budget-Director Lord has reported to President Coolidge that there will be \$108,000,000 surplus in the treasury on June 30, with an even larger surplus in sight for the next fiscal year.

The saving has been effected by providing things that are needed, not by going without them. Efficiency in the Federal service has increased, not diminished. The economy has not been a pinchpenny policy, but common sense spending of public money, so that each dollar has brought 100 cents' worth of public service.

President Coolidge found that a large part of the Federal revenues were going into the junk pile. He called to his aid some able economists. They diverted valuable material from the discard into immediate use.

Duplication of effort has been curbed. Short cuts have been taken to put public business on something like an approximate level with private enterprise. If a thing is worth doing at all it is done at once without circumlocution. Instead of allowing one department to buy motor trucks while another was discarding them, with the government buying at the top and selling at the bottom, the trucks are simply transferred from the department that does not need them to the department that does need them. Such incidents have been repeated a sufficient number of times to pile up a surplus that will give a margin for further reduction of taxes.

If state and municipal governments everywhere would follow the simple paths of common sense by which President Coolidge has led the taxpayers to the fabled treasure, there would be less need for complaint about taxes and the high cost of living.

Worth While Verse

MAY, THE PIED PIPER, CALLS
Come, take the long sky trails with me,
And join that happy band
Who love the winding ways and free
Of my green wonderland—

Joyous explorers of the Spring
Who climb the snow peaks high,
Or follow where the wild geese wing
Beneath a sunrise sky.

Who sleep beneath the stars at night
Enwrapped in tranquil dreams,
Whose thousand campfires softly light
The hills, the woods, the streams.

Are you a brother to the sun,
A sister to the rain?
Then follow where deep rivers run
Down to the blossoming plain.

And do you love the silver spin
Of water 'neath the moon?
Then follow where its music thin
Carols a wanderer's tune.

Seek you my flower realms that sweep
The mesa high and cool?
Know you my fairy guards that keep
The hidden forest pool?

And you would find the magic gold
That fringes sunset skies?
Or watch my desert dawns unfold
Their veils of myriad dyes?

Then take the glad sky trails with me,
The rainbow's long-sought prize
Is only Beauty—scattered free
Beneath my singing skies.

Grace Clementine in the New York Times.

Little Benny's Note Book

by Lee Page

Mrs. Hews and Mrs. Shepperd came to see me this afternoon, both being fat ladies, and they was tawking to me in the parlor and ma sed, I have a little surprise for you ladies, in a way its a pleazant surprize and in a way its possibly not, to put a long story in a nutshell, the intire 3 of us are overweight and we're forever tawking about dieting, so this afternoon I havent pervided a single thing to eat except a little froot for appeerance sake.

Well thats a very good idee, because we'll never stop eating unless its forced down our throats, so to speak, Mrs. Hews said.

Yes, theres no question about it, Mrs. Potts acted very wisely and persnally Im very gratefill to her, Mrs. Shepperd sed, I know perfectly well that if there had bin a lot of pastry heer Id of eaten it in spite of all my resolutions, and espeshilly the pastry from that little shop around the corner was Mrs. Potts always gets her delicious pastry, I jest passed there on my way heer and they had some cream puffs in the window that positively looked as if they were made by angels for other angels, she sed.

And their Napoleon tarts, O my deer, their enuff to make Napoleon tern in his grave, with plezure I mean, Mrs. Hews sed.

Yes, its a wonderfill little shop, the mans name is Schultz but I bleeve he's French descent, ma sed. Im sure that nobody without at least a smattering of French blood in their vaines could make French crullers like that mans French crullers, she sed. O deer, I gess I better sed Benny eround for some now that we've all got our appetite aroused, she sed.

Wich she did, and they each ate so much there wasent anything left for me but one French cruller and a half of a Napoleon tart.

IN THE LONG AGO

14 Years Ago Today
From the Register Files

MAY 18, 1911

The Standard Oil company re-coded a third lease entered into for drilling on properties in the Fullerton foothills.

Maj. L. L. Vestal of Santa Ana was ordered to San Diego for two weeks' attendance at government maneuvers.

Petitions were started at Huntington Beach for the recall of Ed Manning and E. E. French, city councilmen.

The Santa Ana Church Federation plans to go before the city council next week and urge the passage of a law closing motion pictures theaters on Sundays.

Santa Ana stars prepared to observe the new California 8-hour law for women which goes into effect Monday.

The second trial of S. H. Overacker, charged with the murder of S. H. Winn, will begin in superior court tomorrow. Overacker was convicted at the first trial but a new trial was granted on appeal.

Carl Stevens and Cecil "Rum my" Dubois, Santa Ana baseball players, are to report to the Oakland club of the Coast league in September.

"To Me"

Hal Cochran's
DAILY
POEM

There's a wee little fellow I want you to meet. Just a regular type of a boy. Behavior is good, and his manner is sweet, and he knows the full meaning of joy.

His name is jes' Jack, and he's growin' on three. He's a picture of health, he's so ruddy. When mother's around he's her helper, you see, and with dad, he's a pal and a buddy.

You never would think that a wee tot like this would be usin' his mind every day. But Jack never lets any chance go amiss—you can tell by the things he will say.

For instance, when daddy comes home every night, little son is as cute as can be. He'll pat father's pockets; then say, in delight, "Say, what have you got fo' me?"

That's just like a youngster—expectin' a treat; then, takin' what comes with a smile. But tots are so spirit-inspiring and sweet, that they make wee surprises worth while.

Criminal Law Inefficient

Kansas City Star

Perhaps the most sweeping indictment yet made by a high authority against criminal law in this country is that of Mr. Herbert S. Hadley, chancellor of Washington University and former governor of Missouri. Mr. Hadley told delegates to the American Institute of Law that the administration of these laws was 90 per cent inefficient. He should know. He is a lawyer of large experience. He has studied the problem along with his duties in university chairs and in the halls of the legislature. He is chairman of a special committee that has made a survey of the defects of federal and state criminal laws.

The layman will be disposed to take this statement as closely approximating the truth. Failure in pursuing indictments in forcing the attendance of witnesses, in bringing causes to trial, in getting violators to the law tried on the merits of the case, in getting verdicts that will stand the test of the appellate courts, and, finally, in having sentences served in spite of generous parole boards and sympathetic executives—these various miscarriages might easily cover 90 per cent of the cases.

The fault is mainly with the legal profession. It makes the laws. Its members sit on the bench. They prosecute the criminal cases. Many of them make a game of legal practice. They regard procedure as a "box of tricks," to use the term employed by Chief Magistrate McAldoo of New York. State and national associations of lawyers have made preliminary efforts to bring about the needed reforms. At least many individual lawyers have spoken out, as Mr. Hadley has spoken out, and numerous committees have made ringing reports against the defects of law and procedure. But the movement within the profession encounters the same obstacles encountered in legislative bodies and in the courts. Law, fundamentally, is ultra-conservative; its movements are slow; its processes are entangled with red tape; it is dreadfully afraid of being "revolutionary." The result is that reform in criminal procedure has broken down, and the public regards it as a crumbled institution; so does the criminal, whether a bandit or a bank wrecker.

The legal profession must establish and enforce higher standards among its own members. It must take the lead in clarifying and simplifying criminal law. And these things cannot be done by a century-plant growth; they must be accomplished by a determined effort, a movement that has some momentum.

Fossil Bananas

Fossil remains of bananas from the period known to geologists as the Tertiary, some hundred thousand years or more ago, were presented before the meeting here of the National Academy of Sciences, by Prof. Edward W. Berry, paleontologist of the John Hopkins University. The bananas of that distant time were not like the lyric fruit of today, for they had large seeds and little pulp, but undoubtedly bananas they were, none the less, and surprisingly like certain wild African types of bananas still in existence, Prof. Berry said.

This discovery settles a dispute that has been waged for a couple of centuries as to the place of origin of the banana. Early Spanish writers stated that the fruit was native to the new world, but recent botanists have been inclined to regard this as a mistake, and to hold for an origin somewhere in southeastern Asia.

ADVENTURES OF THE TWINS

Olive Roberts Barton

NO. 13—MRS. RAZOR-BILL'S TEA PARTY

Peter Penguin began to laugh until his white shirt front shook up and down like a boiled pudding. "Oh, dear! I have to laugh when I think of something," he said. "Please excuse me. But really when I think of the way Polly Puffin Bird got fooled I just can't help it."

"Who fooled her and what was it all about?" asked Nancy. "Yes, do tell us," said Doctor Bill, "so we may all laugh about it, too."

"Well," said Peter Penguin. "It happened at a tea party that Mrs. Razor-Bill gave. Mrs. Razor-Bill is one kind of a sea bird and Polly Puffin is another, but still they are fast friends and you will never find them very far apart. They always live on the same cliff near the sea, although their families have different floors, you might say. Like an apartment house. The Razors live on the top ledge and the Puffins live lower down. Oh, yes, I forgot. Mrs. Kittiwake was there, too, when it happened and she was fooled just as much as Polly Puffin. Mrs. Kittiwake lives on the lower floor of the same rock, and she is almost as great a friend of Mrs. Razor-Bill as Polly Puffin. Yes, she was there, too, and she got fooled just the same as Polly Puffin."

"My goodness!" said Nick. "What are you talking about, Mister Penguin? It takes you a long time to get started."

"Well, then, I'll start right now," said Peter, wiping his eyes with his hand, for he had laughed so hard the tears had come.

"Mrs. Razor-Bill took it into her head to have a tea party, and in-

lited down to them from her window and said she'd be pleased to have them at five o'clock."

"So at five o'clock they arrived in their best bib and tucker. Mrs. Razor-Bill had spent most of the day hunting up tid-bits for the party, and you would be surprised at the number of goodies she had collected."

"What did they have?" asked Nancy curiously.

"Well, if I stop to tell you everything I'll never get on with my story," said Peter Penguin. "But now that you ask, I'll see if I can remember."

"Well, they had clams to begin with on the half shell Mrs. Razor-Bill had opened them herself one at a time. She is one of the few people who can do it easily."

"Then they had shrimps, and limpets and prawns and sea-urchins (little things like chestnut burrs) and scallops and—and just everything."

"This is a real party," said Polly Puffin as she sat down. Then she noticed something. "What a fine lot of eggs you have, Mrs. Razor-Bill," she said. "But they are lying right near the edge of the rock. Aren't you afraid they will fall off?"

"Oh, no!" said Mrs. Razor-Bill. "They are safe. My eggs always take care of themselves. I never have to put them into a nest. No matter how flat the rock is, they never roll off."

"Well, I declare!" said Polly Puffin and Mrs. Kittiwake together. (To Be Continued.)
